## SIMPLI-MAGIC 79117

# SIMPLI-MAGIC 360° Spin Mop and Bucket with Wringer

Model: 79117

## INTRODUCTION

---

The SIMPLI-MAGIC 360° Spin Mop and Bucket system is designed to simplify your floor cleaning routine. This manual provides essential information for the proper assembly, operation, and maintenance of your new cleaning system. Please read these instructions carefully before first use to ensure optimal performance and longevity of the product.

## COMPONENTS OVERVIEW

---

Your SIMPLI-MAGIC Spin Mop and Bucket system includes the following components:

- Durable Stainless Steel Wringer Basket
- Stainless Steel Mop Handle (Telescopic)
- Built-in and Removable Easy-to-Fill Soap Dispenser
- Bucket with Sliding Handle and Wheels
- 3 Multi-Color Microfiber Mop Heads

## SETUP INSTRUCTIONS

1. **Assemble the Mop Handle:** The mop handle consists of multiple sections. Connect the sections by twisting them together until secure. Ensure the locking mechanism (green lever) is disengaged during assembly.
2. **Attach Mop Head:** Align a microfiber mop head with the mop plate and press down firmly until it clicks into place.
3. **Install Wheels and Drain Plug:** If not pre-installed, attach the wheels to the bottom of the bucket. Insert the green drain plug securely into the drainage hole at the bottom of the bucket.
4. **Fill Soap Dispenser:** Remove the soap dispenser from its slot on the bucket. Fill it with your preferred cleaning solution and place it back into its designated holder.
5. **Fill Bucket with Water:** Fill the bucket with water to the indicated maximum water level. You may add cleaning solution directly to the water or use the soap dispenser.

# DURABLE STAINLESS Steel Wringer Basket

Sliding Handle and Wheels on Bottom of Bucket Provide Easy Moving from One Room to the Next with NO Heavy Lifting

### OPERATING INSTRUCTIONS

#### Wetting the Mop Head:

1. Ensure the mop handle's locking mechanism (green lever) is in the "unlocked" position, allowing the handle to move freely up and down.
2. Place the mop head into the water compartment of the bucket.
3. Gently push the mop handle up and down to agitate the mop head in the water, ensuring it is thoroughly wet and clean.

#### Wringing the Mop Head:

1. Move the wet mop head to the stainless steel wringer basket.
2. With the handle still in the "unlocked" position, push the mop handle down rapidly into the wringer basket. The basket will spin, removing excess water from the mop head.
3. Repeat pushing down until the desired dampness is achieved. For drier floors, wring more times.
4. Once wrung, engage the handle's locking mechanism (green lever) to secure the mop head for cleaning.

Image: The spin cycle in the drying basket effectively wrings water out of the mop head, allowing for faster drying.

### Mopping Floors:

- With the mop head damp and the handle locked, you can now mop your floors. The mop head's 360° swivel allows for easy maneuverability around furniture and into corners.
- For optimal cleaning, use a gentle back-and-forth motion.
- The bucket's wheels and sliding handle allow you to easily move the system from one room to another without heavy lifting.

## EASY TO USE

Our Spin Mop Makes Rinsing Easier - You Don't Have To Spend As Much Energy To Get The Mop Head To Spin

Image: The SIMPLI-MAGIC Spin Mop in use, highlighting its ease of maneuverability for effective floor cleaning.

## MAINTENANCE

---

### Mop Head Care:

- The microfiber mop heads are machine washable. For best results, wash in cold water with similar colors and air dry. Do not use bleach or fabric softeners.
- To remove the mop head, place your foot on the mop head and pull the handle upwards.
- Replace mop heads when they show signs of wear or reduced cleaning effectiveness.

### Bucket Cleaning and Storage:

- After each use, empty the dirty water from the bucket by removing the drain plug located at the bottom.
- Rinse the bucket thoroughly with clean water. The removable wringer basket can be lifted out for easier cleaning.
- Store the mop and bucket in a dry place. Ensure the mop head is dry before storing to prevent mildew.

## TROUBLESHOOTING

---

Problem	Possible Cause	Solution
Mop head not spinning effectively.	Handle locking mechanism engaged; insufficient force applied.	Ensure the green lever on the handle is in the "unlocked" position. Apply firm, rapid downward pressure on the handle.
Water splashing out during wringing.	Bucket overfilled; excessive force during wringing.	Do not fill water above the indicated maximum level. Reduce the force or speed of pushing the handle down.
Mop head not cleaning effectively on certain surfaces (e.g., grout).	Mop head material may not be ideal for specific textures; mop head is too wet or too dry.	Ensure mop head is wrung to appropriate dampness. For stubborn areas, pre-treat or use a brush.
Bucket leaking from drain plug.	Drain plug not securely inserted or damaged.	Ensure the drain plug is fully and securely inserted. Inspect the plug for any damage and replace if necessary.

## SPECIFICATIONS

---

**Brand:** SIMPLI-MAGIC

**Model Number:** 79117

**Product Dimensions:** 11 x 12 x 20 inches

**Item Weight:** 5.17 pounds (2.35 Kilograms)

**Material:** Microfiber, Plastic, Stainless Steel

**Handle Material:** Stainless Steel

**Handle Type:** Telescopic

**Special Feature:** 360° Spin

**Included Components:** 3 Microfiber Mop Head Refills, Bucket, Soap Dispenser, Stainless Steel Mop Pole, Wheels

**Assembly Required:** Yes

**Care Instructions:** Rinse (Mop heads machine washable)
