Jura S8 15212

Jura S8 15212 Automatic Coffee Machine

User Manual

Introduction

This manual provides essential information for the safe and efficient operation, setup, and maintenance of your Jura S8 15212 Automatic Coffee Machine. The Jura S8 is designed to deliver a wide range of coffee specialties with ease, featuring a complete touchscreen interface and the innovative Pulse Extraction Process (P.E.P.) for optimal flavor extraction.

Setup and First Use

1. **Unpacking:** Carefully remove all packaging materials. Ensure all components are present.
2. **Placement:** Place the machine on a stable, level surface. Ensure adequate ventilation and keep it away from heat sources and direct sunlight.
3. **Water Tank:** Remove the water tank, rinse it thoroughly, and fill it with fresh, cold water. Insert the CLARIS Smart filter cartridge into the water tank as instructed by the machine's display. The machine uses RFID technology to detect the filter.
4. **Bean Container:** Open the aroma preservation cover and fill the bean container with fresh coffee beans. Do not use ground coffee or instant coffee in the bean container.
5. **Power Connection:** Connect the power cable to the machine and then to a suitable power outlet.

6. **Initial Start-up:** Follow the on-screen instructions for the initial setup process, which includes rinsing cycles and water hardness programming.

Operating the Machine

The Jura S8 features an intuitive touchscreen display for selecting and customizing beverages.

Image: A close-up view of the Jura S8's high-resolution color touchscreen, showing beverage selection options and a finger interacting with the display.

- **Beverage Selection:** From the home screen, tap on the icon for your desired specialty, such as Espresso, Coffee, Cappuccino, Flat White, or Latte Macchiato. The machine offers 15 programmable specialties.
- **Customization:** Before preparation, you can adjust settings like coffee strength, water volume, and milk foam quantity directly on the touchscreen. These settings can often be saved as personal preferences.
- **Milk System:** For milk-based beverages, ensure the milk pipe is correctly connected to the milk spout and immersed in a container of cold milk. The machine will guide you through the preparation process.

- **Pre-ground Coffee:** If using pre-ground coffee, open the filler funnel for pre-ground coffee, add one level scoop, and then select your desired beverage. Note that only one portion of pre-ground coffee can be used at a time.

Maintenance and Cleaning

Regular maintenance ensures optimal performance and longevity of your Jura S8 machine.

- **Daily Milk System Cleaning:** After preparing milk-based beverages, the machine will prompt you to clean the milk system. Follow the on-screen instructions using the Jura milk system cleaner. This prevents blockages and maintains hygiene.
- **Coffee System Cleaning:** The machine will indicate when a coffee system cleaning is required. Use Jura cleaning tablets and follow the guided process on the display. This removes coffee oil residues from the brewing unit.
- **Water Filter Replacement:** The CLARIS Smart filter needs to be replaced approximately every 1-2 months, or as indicated by the machine, depending on water usage. The machine will prompt you when a replacement is due.
- **Descaling:** If you operate the machine without a CLARIS Smart filter, descaling will be necessary. The machine will prompt you when descaling is required. Use Jura descaling tablets and follow the instructions.
- **Emptying Drip Tray and Coffee Grounds Container:** The machine will prompt you to empty these components when full. Remove, empty, rinse, and reinsert them.
- **Exterior Cleaning:** Wipe the exterior of the machine with a soft, damp cloth. Do not use abrasive cleaners.

Troubleshooting

This section addresses common issues you might encounter with your Jura S8 machine.

- **"Insert filter" message persists:** If the machine does not recognize a new CLARIS Smart filter, ensure it is correctly inserted and fully clicked into place. The machine uses RFID technology to detect the filter. If the issue persists, try removing and reinserting the filter, or contact customer support.
- **Touchscreen Unresponsive:** Ensure the screen is clean and dry. If unresponsive, try restarting the machine by turning it off and on using the main power switch.
- **No Coffee Dispensed:** Check if the water tank is filled and correctly seated. Ensure the bean container has enough beans. Verify that no error messages are displayed.
- **Milk Not Frothing Correctly:** Ensure the milk pipe is clean and properly connected. Use fresh, cold milk. Perform a milk system cleaning if prompted or if frothing quality deteriorates.
- **Error Messages:** If an error message appears on the display, consult the machine's on-screen help or refer to the full Jura S8 manual for specific error codes and solutions.

Specifications

Key technical specifications for the Jura S8 15212 Automatic Coffee Machine.

Image: A diagram illustrating the dimensions of the Jura S8 15212 Automatic Coffee Machine: 12.7 inches deep, 20.1 inches wide, and 16.7 inches high.

Feature	Detail
Brand	Jura
Model Name	S8
Item Model Number	15212
Color	Chrome
Product Dimensions	12.7"D x 20.1"W x 16.7"H

Feature	Detail
Item Weight	20 pounds
Water Tank Capacity	64 ounces
Bean Container Capacity	10 ounces
Voltage	120V
Operation Mode	Fully Automatic
Special Feature	Programmable, Pulse Extraction Process (P.E.P.), Touchscreen
Included Components	Coffee Machine
