Operating (Puzzle Assembly)

Assembling your Ravensburger puzzle is a process of observation, strategy, and patience. Follow these guidelines for an optimal experience:

1. **Edge First:** Begin by finding all the straight-edged pieces and assembling the border of the puzzle. This provides a framework for the rest of the assembly.
2. **Sort by Image:** Given the collage design of 99 individual European landmark images, sorting pieces by their respective image sections can be highly effective. Focus on completing one small image at a time.
3. **Softclick Technology:** Ravensburger puzzles feature "Softclick Technology," ensuring that each piece fits perfectly and securely. You will experience a satisfying "click" when pieces are correctly joined. No two pieces are exactly alike, preventing incorrect placements.
4. **Color and Detail Matching:** Pay close attention to the colors, patterns, and details within each image. The fine linen-structured paper provides a glare-free image, aiding in detail recognition.

Maintenance

- **Cleaning:** If necessary, gently wipe the puzzle pieces with a dry, soft cloth to remove any dust. Avoid using liquids or abrasive cleaners.
- **Storage:** Store unassembled pieces in the original box in a dry, cool place to prevent damage. If the puzzle is completed and you wish to preserve it, consider using puzzle glue and framing it.
- **Handling:** Handle pieces carefully to prevent bending or tearing. The extra-thick European blue board is designed for durability, but proper handling extends its lifespan.

Troubleshooting

- **Missing Pieces:** Ravensburger puzzles are precision-made, and missing pieces are rare. If you believe a piece is missing, thoroughly check your work area, under furniture, and inside the box. If a piece is genuinely missing, refer to the warranty information for assistance.
- **Difficulty with Assembly:** For challenging sections, refer to the image on the box lid. Sorting pieces by color, shape, or specific image details can help. Working in natural light can also improve visibility.
- **Pieces Not Fitting:** Due to Softclick Technology, pieces should fit perfectly. If a piece does not fit smoothly, it is likely incorrect. Re-examine the shape and image details to find the correct placement.
