14 Inch Pizza

20 Pound Turkey

18 Slices Of Bread

This image demonstrates the 55L extra-large capacity of the LUBY toaster oven, capable of preparing large meals such as a 14-inch pizza, 20-pound turkey, or 18 slices of bread.

The French door design allows for easy and unobstructed placement and removal of food, as shown by a child inserting a baking tray.

SETUP

1. Unpacking:

Carefully remove the toaster oven and all packaging materials from the box. Ensure all accessories (bake tray, wire rack, tray handle) are present. Dispose of packaging responsibly.

2. Placement:

Place the appliance on a stable, level, and heat-resistant surface. Ensure there is adequate clearance (at least 4 inches) on all sides and above the oven for proper ventilation. Do not place it near flammable materials or under cabinets that may be damaged by heat.

3. Initial Use (Burn-Off):

Before using for the first time, operate the oven empty to burn off any manufacturing residues. This may produce a slight odor and some smoke, which is normal. Ensure the area is well-ventilated during this process.

1. Plug the oven into a grounded electrical outlet.
2. Set both upper and lower temperature knobs to 450°F (230°C).
3. Set the timer knob to "Stay On" or for 15-20 minutes.
4. Allow the oven to run until the odor and smoke dissipate.
5. Once cooled, wipe the interior with a damp cloth.

OPERATING INSTRUCTIONS

Controls:

Simply Control

easily re-heats or perfect for more delicious food

The control panel features three distinct knobs for precise temperature and time adjustments.

- **Upper Temperature Knob:** Controls the temperature of the upper heating elements (0°F-450°F).
- **Lower Temperature Knob:** Controls the temperature of the lower heating elements (0°F-450°F).
- **Timer Knob:** Sets the cooking time from 0 to 60 minutes. It also includes a "Stay On" function for continuous operation. The timer will automatically shut off the oven and sound a signal bell when the set time expires.

Cooking Modes:

The independent temperature controls allow for various cooking configurations:

- **Toast/Bake:** Set both upper and lower temperature knobs to the desired temperature.
- **Broil:** Typically uses only the upper heating elements. Set the upper temperature knob to the desired broil temperature and the lower knob to OFF.
- **Warm:** Set both temperature knobs to a low setting (e.g., 150°F) to keep food warm.

Rack Positions:

The oven features four rack positions to accommodate different food sizes and cooking needs. Adjust the wire rack or bake tray to the appropriate height before preheating.

Preheating:

For best results, preheat the oven for 10-15 minutes at the desired temperature before placing food inside.

MAINTENANCE AND CLEANING

Regular cleaning will help maintain the performance and appearance of your LUBY Toaster Oven.

General Cleaning:

1. Always unplug the oven from the power outlet and allow it to cool completely before cleaning.
2. Wipe the exterior surfaces with a damp cloth and mild detergent. Do not use abrasive cleaners or scouring pads.
3. For the interior, wipe down with a damp cloth. For stubborn stains, a solution of water and vinegar with a little baking soda can be used (as suggested by users). Apply with a spray bottle, let sit for 15 minutes, gently scrub with a sponge, then wipe clean with a damp cloth and dry thoroughly.

Cleaning Accessories:

- The bake tray, wire rack, and crumb tray can be washed with warm, soapy water. Rinse thoroughly and dry completely before returning to the oven.
- Ensure the crumb tray is always in place at the bottom of the oven to catch crumbs and drips, making cleaning easier.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Oven not heating.	Not plugged in; power outage; timer not set.	Ensure the oven is securely plugged into a working outlet. Check household circuit breaker. Set the timer or use the "Stay On" function.

Problem	Possible Cause	Solution
Uneven cooking.	Incorrect rack position; insufficient preheating; food too crowded.	Adjust rack position for optimal heat distribution. Always preheat the oven. Avoid overcrowding the oven; cook in batches if necessary.
Knobs/markings fading.	Wear and tear from frequent use or cleaning.	Handle knobs gently. Avoid harsh chemical cleaners on the control panel.
Racks feel flimsy or slide out.	Heavy items; racks not fully seated.	Ensure racks are fully inserted into the support grooves. Use caution when pulling out racks with heavy items; support the rack with an oven mitt.
