Koss CS200 USB Communication Headset (Model 194390)

Koss CS200 USB Communication Headset User Manual

Model: CS200 USB Communication Headset (Model 194390)

INTRODUCTION

The Koss CS200 USB Communication Headset is designed for clear audio communication and comfortable wear. Featuring a double-sided, on-ear design with soft foam cushions, a noise-cancelling electret microphone, and a flexible microphone arm, this headset is suitable for various applications including conference calls, language learning, and general office communication. The USB connection ensures broad compatibility with computers and other USB-enabled devices.

WHAT'S IN THE BOX

- Koss CS200 USB Communication Headset
- User Manual

SETUP

To set up your Koss CS200 USB Communication Headset, follow these simple steps:

1. **Connect the Headset:** Locate an available USB port on your computer or device. Insert the USB plug of the headset firmly into the USB port.
2. **Driver Installation:** The headset is plug-and-play. Your operating system (Windows, macOS, Linux) should automatically detect the device and install the necessary drivers. This process may take a few moments.
3. **Verify Audio Settings:** Once connected, open your computer's sound settings. Ensure that the Koss CS200 USB Headset is selected as both the default playback (output) and recording (input) device.
4. **Adjust Volume:** Use your computer's system volume controls to adjust the listening volume.

OPERATING INSTRUCTIONS

The Koss CS200 USB Headset is designed for ease of use. Here are instructions for its operation:

- **Wearing the Headset:** Place the headset over your head so that the ear cushions rest comfortably on your ears. The headband is adjustable; slide the earcups up or down to achieve a secure and comfortable fit.
- **Adjusting the Microphone:** The microphone arm is flexible and pivots. Position the microphone approximately 1-2 inches (2.5-5 cm) from your mouth for optimal voice pickup. The microphone features noise-cancelling technology to reduce background noise during calls.
- **Communication:** Once connected and configured, the headset is ready for use with communication software (e.g., video conferencing, VoIP applications) or for listening to audio.

MAINTENANCE

Proper care and maintenance will extend the life of your Koss CS200 USB Communication Headset:

- **Cleaning:** Use a soft, dry cloth to wipe down the headset and microphone arm. For ear cushions, a slightly damp cloth can be used, but ensure they are completely dry before storage. Avoid using harsh chemicals or abrasive cleaners.
- **Storage:** When not in use, store the headset in a clean, dry place away from extreme temperatures and direct sunlight. Avoid tangling the cable.
- **Cable Care:** Do not pull on the cable to disconnect the headset. Always grasp the USB plug. Avoid bending or crimping the cable excessively.

TROUBLESHOOTING

If you encounter issues with your Koss CS200 USB Communication Headset, try the following troubleshooting steps:

Problem	Solution
No sound from headset	Ensure the USB plug is fully inserted into the port. Check your computer's sound settings to confirm the Koss CS200 is selected as the default playback device. Increase the volume on your computer. Test the headset on another USB port or computer.
Microphone not working	Ensure the microphone arm is positioned correctly. Check your computer's sound settings to confirm the Koss CS200 is selected as the default recording device. Ensure the microphone is not muted in your operating system or communication software. Test the headset on another USB port or computer.
Poor audio quality	Ensure the USB connection is secure. Avoid using the headset near strong electromagnetic interference. Update your computer's audio drivers if available.
