

## Fellow Corvo EKG Electric Tea Kettle (Model 1171)

# Fellow Corvo EKG Electric Tea Kettle Instruction Manual

Model: Corvo EKG (Matte Black) | Brand: Fellow

## INTRODUCTION

The Fellow Corvo EKG Electric Tea Kettle is a sophisticated appliance designed for precise temperature control and efficient water heating. Crafted from durable 304 stainless steel, this 0.9-liter capacity kettle combines minimalist aesthetics with advanced functionality, making it ideal for preparing a variety of hot beverages, including coffee and tea.

Key features include to-the-degree temperature control, a built-in brew stopwatch, and a 60-minute temperature hold option, ensuring your water is always at the optimal temperature for your brewing needs.

## SETUP INSTRUCTIONS

### 1. Unboxing and Initial Inspection

Carefully remove all components from the packaging: the kettle, the base, and the lid. Inspect all parts for any signs of damage. If any damage is found, do not use the kettle and contact customer support.

### 2. Placement

Place the kettle base on a dry, flat, and stable surface, away from the edge of the countertop and out of reach of children. Ensure there is adequate space around the base for ventilation.

### 3. Initial Cleaning

Before first use, wash the inside of the kettle and the lid with warm, soapy water. Rinse thoroughly with clean water. Do not immerse the base in water or any other liquid. The kettle is designed for hand washing only.

### 4. Filling the Kettle

Fill the kettle with fresh, cold water. Do not fill above the maximum fill line indicated inside the kettle (0.9 Liter capacity). Overfilling may cause boiling water to overflow, posing a burn hazard.

### 5. Power Connection

Place the filled kettle securely onto the base. Plug the power cord into a grounded electrical outlet. The display on the base will illuminate.

The Fellow Corvo EKG Electric Tea Kettle, showcasing its sleek matte black finish and compact design on its heating base.

## OPERATING INSTRUCTIONS

---

### 1. Setting Temperature

Use the control knob on the base to select your desired temperature. The digital display will show the target temperature. The kettle will begin heating the water to the set temperature.

### 2. Quick Heating

The 1200W heating element ensures rapid boiling. The display will show the current water temperature as it heats up.

### 3. Temperature Hold Function

Activate the 'Hold' function to maintain your desired temperature for up to 60 minutes. This feature is useful for multiple pours or extended brewing sessions.

### 4. Built-in Brew Stopwatch

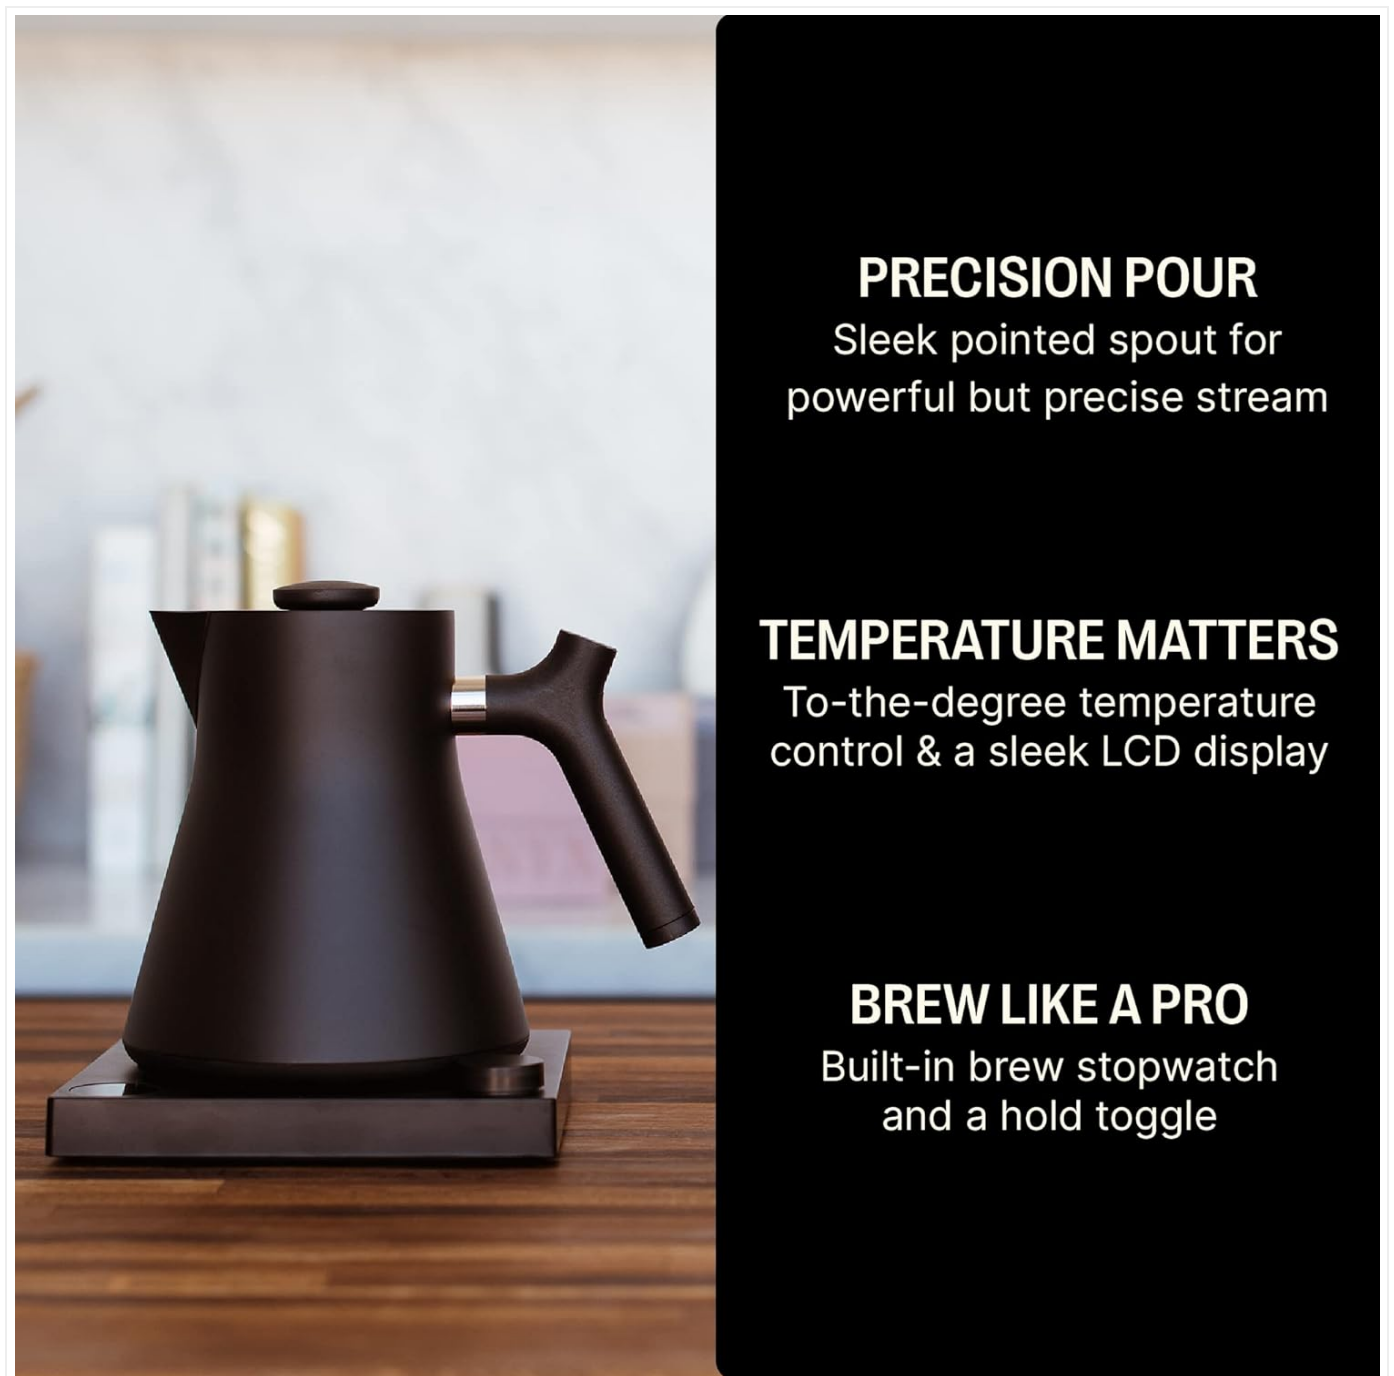

The integrated brew stopwatch can be activated to time your pour-over coffee or tea steeping, ensuring consistent results.

## 5. Fahrenheit & Celsius Option

Toggle between Fahrenheit and Celsius temperature readings on the display to suit your preference.

## 6. Pouring

The precision pour spout is designed for controlled and steady pouring, ideal for pour-over coffee methods. Lift the kettle from the base to pour.

Key features of the Corvo EKG kettle: precision pour spout, accurate temperature control with LCD display, and a built-in brew stopwatch.

The kettle in use, demonstrating its compact size and aesthetic appeal in a home setting.

Demonstration of the kettle's precise pouring capability, ideal for controlled water flow.

## MAINTENANCE

---

### 1. Daily Cleaning

After each use, allow the kettle to cool completely. Wash the interior of the kettle and the lid by hand with warm, soapy water. Rinse thoroughly and dry with a soft cloth. Do not use abrasive cleaners or scouring pads, as these can damage the finish.

### 2. Descaling

Over time, mineral deposits (limescale) may build up inside the kettle, especially in areas with hard water. To descale, fill the kettle with a solution of equal parts white vinegar and water. Bring the solution to a boil and let it sit for at least 30 minutes, or longer for heavy buildup. Empty the kettle and rinse thoroughly several times with fresh water to remove any vinegar residue. For stubborn deposits, a dedicated descaling solution designed for kettles can be used following the product's instructions.

### 3. Exterior Care

Wipe the exterior of the kettle and the base with a damp, soft cloth. Do not use harsh chemicals or abrasive materials. Ensure the

base and electrical components remain dry.

## TROUBLESHOOTING

If you encounter issues with your Fellow Corvo EKG Electric Tea Kettle, please refer to the following common troubleshooting steps:

Problem	Possible Cause	Solution
Kettle does not heat up.	Not properly seated on base; power cord not plugged in; no power to outlet.	Ensure kettle is correctly placed on base. Check power cord connection. Test outlet with another appliance.
Water not reaching desired temperature.	Incorrect temperature setting; mineral buildup.	Verify the set temperature on the display. Perform descaling if mineral buildup is present.
Kettle turns off prematurely.	Kettle is empty or underfilled; overheating protection activated.	Ensure kettle is filled above the minimum fill line. Allow kettle to cool down before refilling and restarting.
Display not working.	Power issue; temporary electronic glitch.	Unplug the base from the outlet for 30 seconds, then plug it back in. Ensure power is supplied to the outlet.
Slow heating.	Mineral buildup.	Perform descaling to remove mineral deposits.

If the problem persists after attempting these solutions, please contact Fellow customer support for further assistance.

## PRODUCT SPECIFICATIONS

Brand	Fellow
Model Name	Corvo Matte Black
Item Model Number	1171
Color	Matte Black
Material Feature	Durable and temperature-resistant stainless steel body
Special Feature	Temperature Control
Capacity	0.9 Liter
Product Dimensions	8.74"L x 6.73"W x 8"H
Item Weight	2.69 Pounds
Included Components	Base, lid, and kettle
Product Care Instructions	Hand Wash
Recommended Uses	Boiling water for hot beverages (tea, coffee), and other culinary applications requiring heated water
UPC	852212007274
