Pro Breeze PB-P02F

Pro Breeze PB-P02 Air Purifier Replacement Filter User Manual

Model: PB-P02F

INTRODUCTION

This manual provides essential information for the proper installation and maintenance of your Pro Breeze PB-P02 Air Purifier Replacement Filter (Model PB-P02F). This multi-layer filter is designed to work specifically with the Pro Breeze PB-P02 Air Purifier, ensuring optimal air quality by capturing various airborne particles.

FILTER FEATURES

- **Multi-layer filtration:** Features a Pre-Filter and True HEPA Filter.
- **High Efficiency:** Filters up to 99.7% of airborne particles.
- **Compatibility:** Genuine replacement filter specifically for the Pro Breeze PB-P02 Air Purifier (CADR 11.93).

Multi-Layer Filter.

Pre-filter

Captures large airborne particles including dust and pet dander

True HEPA Filter

Traps particles as small as 0.3 microns including pollen, dust mites and other allergy triggers

INSTALLATION GUIDE

Follow these steps to replace the filter in your Pro Breeze PB-P02 Air Purifier:

1. **Power Off and Unplug:** Before attempting any maintenance, ensure the air purifier is turned off and unplugged from the power outlet to prevent electrical hazards.
2. **Access the Filter Compartment:** Gently twist the base of the air purifier counter-clockwise to unlock and remove the bottom cover.
3. **Remove Old Filter:** Carefully pull out the used filter from the compartment. It may appear dirty or discolored, which is normal.
4. **Insert New Filter:** Unwrap the new Pro Breeze PB-P02F replacement filter. Insert the new filter into the air purifier, ensuring it is seated correctly and snugly within the compartment.
5. **Secure the Cover:** Place the bottom cover back onto the air purifier and twist it clockwise to lock it securely in place.
6. **Restore Power:** Plug the air purifier back into the power outlet.

OPERATING WITH NEW FILTER

After replacing the filter, your Pro Breeze PB-P02 Air Purifier is ready for operation. Turn on the unit using the power button. The air purifier will begin to draw in air, filtering it through the new multi-layer filter. You should notice improved air quality and efficient operation.

MAINTENANCE AND FILTER REPLACEMENT SCHEDULE

To maintain optimal performance of your Pro Breeze PB-P02 Air Purifier, it is crucial to replace the filter regularly. Pro Breeze recommends replacing your filter every **2000 hours** of operation. This ensures the filter continues to effectively capture airborne particles and maintain clean air output.

Signs that your filter may need replacement include:

- Decreased airflow from the air purifier.
- Noticeable odors returning to the air.
- Increased noise from the unit.
- Visible dirt or debris accumulation on the filter surface.

TROUBLESHOOTING

If you encounter issues after replacing your filter, consider the following common solutions:

- **Air Purifier Not Turning On:**
 - Ensure the power cord is securely plugged into both the air purifier and a working electrical outlet.
 - Verify that the bottom cover of the air purifier is correctly aligned and fully locked into place. The unit may have a safety mechanism preventing operation if the cover is not secured.
- **Reduced Airflow or Ineffective Purification:**
 - Check if the new filter was unwrapped from its protective plastic packaging before installation.
 - Ensure the filter is correctly oriented and fully seated within the filter compartment.
 - Confirm that you are using the genuine Pro Breeze PB-P02F replacement filter, as incompatible filters may hinder performance.
- **Unusual Noises:**
 - Verify the filter is installed correctly and not obstructing any internal components.
 - Ensure no foreign objects have fallen into the air purifier.

If problems persist, refer to the original Pro Breeze PB-P02 Air Purifier user manual or contact Pro Breeze customer support.
