## SportDOG YT-100

# SportDOG Brand YardTrainer 100 Remote Trainer User Manual

Brand: SportDOG | Model: YT-100

## INTRODUCTION AND OVERVIEW

---

The SportDOG Brand YardTrainer 100 is designed for basic obedience training, ensuring your pet's safety and good behavior around the house, in the yard, or at the park. It offers versatile training options with tone, vibration, and 8 levels of static stimulation, tailored to your dog's temperament.

- **TRAINING FREEDOM:** Experience the ease and freedom of training your dog with the SportDOG Brand YardTrainer 100. This sport training collar is perfect for basic obedience training around the house, yard, or park, ensuring your dogs are well-behaved and safe, even when they're not on a leash.
- **CUSTOMIZABLE TRAINING:** The SportDOG Brand YardTrainer 100 allows you to customize your dog's training with a choice of vibration, tone, or 8 levels of static stimulation. This dog training collar tailors the training process to your dog's unique needs, making it more effective and enjoyable for both of you.
- **WATERPROOF DESIGN:** The SportDOG Brand YardTrainer 100 keeps the fun going, even in the water, with its waterproof and submersible design. Built with DryTek technology, these shock collars for dogs can withstand up to 25 feet of water, ensuring the collar continues to work effectively, whether your dog is splashing in the lake or caught in the rain.
- **RECHARGEABLE BATTERY:** The SportDOG Brand YardTrainer 100 ensures you'll never worry about running out of battery at a crucial moment thanks to its lithium-ion, rechargeable batteries. This e-collar features a 2-hour quick charge and a low battery indicator to let you know when it's time to charge.
- **VERSATILE FIT:** The SportDOG Brand YardTrainer 100 is adjustable for dogs weighing 8 pounds or larger with neck sizes ranging from 5 to 22 inches, ensuring a comfortable and secure fit, regardless of your dog's size or breed.

## SETUP AND GETTING STARTED

---

Before first use, fully charge both the remote transmitter and the collar receiver. The included charger allows simultaneous charging of both units. Ensure the collar is properly fitted to your dog for optimal performance.

# YardTrainer 100 Remote Transmitter

Figure 2: Key features of the YardTrainer 100 Remote Transmitter, including buttons for Tone, Static, Vibration, and a dial for intensity adjustment.

# YardTrainer 100S Collar Receiver

**YT-100S has a higher stimulation range than YT-100 & is intended for stubborn dogs.**

Figure 3: Key features of the YardTrainer 100S Collar Receiver, highlighting its range, dog size compatibility, stimulation types, and power button.

# Fitting the Collar Receiver

∴ The Collar should fit snugly, ensuring the probes don't rub your dog's skin

∴ Only one finger should fit under the strap

∴ Recheck fit after several minutes of wear

Figure 4: Instructions for properly fitting the collar receiver to your dog, ensuring comfort and effective contact.

## OPERATING INSTRUCTIONS

The YardTrainer 100 offers three distinct stimulation types: tone, vibration, and static stimulation. The remote transmitter features dedicated buttons for each, along with a dial to adjust static intensity levels from 1 to 8. The remote provides instant response, crucial for effective and timely correction during training.

## 3 Safe & Effective Stimulation Methods

**STATIC  
STIMULATION**

**TONE**

**VIBRATION**

Figure 5: Overview of the three safe and effective stimulation methods available: Static, Tone, and Vibration.

### MAINTENANCE

The YardTrainer 100 features lithium-ion rechargeable batteries for both the remote and collar. A 2-hour quick charge ensures readiness, and a low battery indicator signals when charging is needed. It is recommended to charge the units daily or after each training session, as the charge may last approximately 12 hours depending on usage.

Figure 6: DryTek Technology ensures the device is waterproof and submersible, making it suitable for use in various conditions.

## TROUBLESHOOTING

- **Collar Fit and Skin Irritation:** Ensure the collar fits snugly but not too tightly. Only one finger should fit under the strap. Regularly check your dog's neck for any signs of irritation or sores, especially if wearing the collar for extended periods. Adjust fit or remove the collar if irritation occurs.
- **Stimulation Intensity:** Always start with the lowest static stimulation level (Level 1) and observe your dog's reaction. The goal is to get their attention, not to cause pain. If your dog vocalizes or shows signs of distress, the intensity is too high.
- **Remote Delay:** The SportDOG YardTrainer 100 is designed for instant response. If you experience a delay between pressing a button and the collar's response, ensure both units are fully charged and properly paired. Older or faulty units might exhibit delays.
- **Battery Life:** The lithium-ion batteries are designed for a 2-hour quick charge. If the battery drains quickly (e.g., less than 12 hours of use), it may indicate a need for more frequent charging or a potential battery issue. The low battery indicator will signal when charging is required.
- **Dial Rotation:** The intensity dial on the remote does not rotate in a full circle. To change from the highest to the lowest setting (or vice-versa), you must rotate through all intermediate levels.

## SPECIFICATIONS

---

Attribute	Value
Brand Name	SportDOG
Model Name	YT-100
Item Model Number	YT-100
Item Weight	1.76 ounces
Product Dimensions	2.6 x 1.2 x 1.3 inches
Batteries	1 Lithium Ion batteries required (included)
Waterproof Technology	DryTek
Submersible Depth	Up to 25 ft
Range	100 Yard Range
Stimulation Types	Tone, Vibration, 8 levels of Static
Fit for Dogs	8 pounds or larger
Neck Sizes	5 to 22 inches
Manufacturer	Radio Systems Corporation
Country of Origin	China
