

## Bose Bass Module 700

# Bose Bass Module 700 Wireless Subwoofer Instruction Manual

Model: 809108-1200

## 1. INTRODUCTION

This manual provides essential information for the setup, operation, and maintenance of your Bose Bass Module 700 wireless subwoofer. The Bose Bass Module 700 is designed to complement Bose soundbars, delivering enhanced bass performance for music, movies, and television audio. Its compact design and wireless connectivity offer flexible placement options within your home audio system.

## 2. WHAT'S IN THE BOX

---

Verify that all components are present before proceeding with the setup.

- Bose Bass Module 700
- Line Cord (Power Cable)

## 3. SETUP

---

### 3.1 Placement

The Bose Bass Module 700 is a wireless subwoofer, offering flexibility in placement. For optimal bass performance, consider placing the module in a corner of the room or near a wall. Experiment with different locations to find the best sound for your listening environment. Ensure the module is placed on a stable, flat surface.

**Image 3.1:** The dimensions of the Bose Bass Module 700, measuring approximately 11.6 inches deep, 11.6 inches wide, and 12.88 inches high.

### 3.2 Power Connection

1. Connect the line cord to the power port on the back of the Bass Module 700.
2. Plug the other end of the line cord into a working AC (mains) power outlet.

### 3.3 Wireless Pairing with a Bose Soundbar

The Bose Bass Module 700 is designed to wirelessly pair with compatible Bose soundbars.

1. Ensure your compatible Bose soundbar is powered on and connected to the Bose Music app.
2. Open the Bose Music app on your mobile device.

3. Navigate to the settings for your soundbar within the app.
4. Look for an option to "Add Auxiliary Speaker" or "Add Bass Module" and follow the on-screen instructions to complete the pairing process.
5. Once paired, the Bass Module 700 will automatically connect to your soundbar when both devices are powered on.

**Note:** Compatible devices include Bose Smart Ultra Soundbar, Bose Smart Soundbar; Bose Smart Soundbar 900; Bose Smart Soundbar 600; Bose TV Speaker; Bose Smart Soundbar 700; Bose Smart Soundbar 300; and Bose Soundbar 500.

## 4. OPERATING THE BASS MODULE 700

---

### 4.1 Automatic Operation

Once successfully paired with a compatible Bose soundbar, the Bass Module 700 operates automatically. It will power on and off with your soundbar and reproduce low-frequency audio signals from your soundbar's output.

### 4.2 Adjusting Bass Levels

Bass levels can be adjusted through the Bose Music app. Open the app, select your soundbar, and access its settings to find options for bass adjustment. This allows you to customize the intensity of the bass to your preference and room acoustics.

**Image 4.1:** Front view of the Bose Bass Module 700, highlighting its minimalist design.

## 5. MAINTENANCE

---

### 5.1 Cleaning

- Ensure the Bass Module is unplugged from the power outlet before cleaning.

- Use a soft, dry cloth to wipe the exterior surfaces.
- Do not use liquid cleaners, sprays, or solvents, as these may damage the finish or internal components.
- Avoid getting moisture into any openings.

## 5.2 General Care

- Keep the Bass Module away from heat sources, direct sunlight, and excessive moisture.
- Do not block any ventilation openings.
- Avoid placing heavy objects on top of the module.

# 6. TROUBLESHOOTING

If you encounter issues with your Bose Bass Module 700, refer to the following common troubleshooting steps.

## 6.1 No Sound from Bass Module

- **Check Power:** Ensure the Bass Module is properly plugged into a working power outlet.
- **Check Connection:** Verify that the Bass Module is wirelessly paired with your Bose soundbar via the Bose Music app. If not, attempt to re-pair it.
- **Soundbar Status:** Confirm that your Bose soundbar is powered on and producing audio.
- **App Settings:** Check the bass level settings in the Bose Music app to ensure it is not set to minimum or muted.

## 6.2 Intermittent Sound or Connection Issues

- **Interference:** Move the Bass Module or soundbar away from other wireless devices (e.g., Wi-Fi routers, cordless phones) that might cause interference.
- **Distance:** Ensure the Bass Module is within the recommended operating range of your soundbar (typically within 10 meters for Bluetooth).
- **Restart Devices:** Power cycle both the Bass Module and the soundbar by unplugging them for 30 seconds and then plugging them back in.

## 6.3 Poor Bass Quality

- **Placement:** Adjust the placement of the Bass Module. Corners or walls often enhance bass response.
- **Room Acoustics:** Room size and furnishings can affect bass. Consider using the ADAPTiQ audio calibration system (if available with your soundbar) to optimize sound for your room.
- **Source Material:** Ensure the audio source contains sufficient low-frequency content.

# 7. SPECIFICATIONS
