### 3.2 Threading the Upper Thread

1. Place the spool of thread on the spool pin.
2. Guide the thread through the upper thread guide.
3. Bring the thread down through the tension discs, following the numbered path indicated on the machine.
4. Thread the take-up lever from right to left.
5. Guide the thread down through the remaining thread guides to the needle.
6. Use the built-in needle threader to easily thread the needle from front to back.

### 3.3 Winding and Inserting the Bobbin

1. Place an empty bobbin onto the bobbin winder spindle.

2. Guide the thread from the spool through the bobbin winding tension disc.
3. Wrap the thread around the bobbin a few times, then push the bobbin winder spindle to the right.
4. Press the foot pedal to start winding. The machine will automatically stop when the bobbin is full.
5. Remove the full bobbin and trim the thread.
6. Open the bobbin cover plate located on the needle plate.
7. Insert the bobbin into the bobbin case, ensuring the thread unwinds in the correct direction (usually counter-clockwise).
8. Guide the bobbin thread through the tension spring and pull it out a few inches.
9. Replace the bobbin cover plate.
