2. Important Safety Information

WARNING: Failure to follow these safety instructions could result in fire, electric shock, injury, or damage to the product or property.

- Always place the warmer on a stable, level, heat-resistant surface.
- Do not immerse the appliance, cord, or plug in water or other liquids.
- Unplug from outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts, and before cleaning the appliance.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner.

- Close supervision is necessary when any appliance is used by or near children.
- Always check the temperature of the warmed milk or food before feeding to a baby. Stir or swirl the contents and test a few drops on the back of your hand.
- Do not use attachments not recommended by the appliance manufacturer.
- This appliance is for household use only. Do not use outdoors.
- Do not touch hot surfaces. Use handles or knobs.

3. Product Overview and Components

The Bubos Bottle Warmer is designed for ease of use and versatility. Familiarize yourself with its main components:

Main Unit: The primary body of the warmer, housing the heating element and water reservoir.

Control Panel: Features an LCD screen and intuitive buttons for mode selection and time adjustment.

Water Reservoir: The chamber where water is added for warming and steaming.

Lid: Helps to retain heat and steam during operation.

Baby Food Jar: A complimentary BPA-free jar for warming baby food.

4. Setup

1. **Unpack:** Carefully remove all components from the packaging.
2. **Initial Cleaning:** Before first use, wipe the exterior of the warmer with a damp cloth. Clean the water reservoir and the included baby food jar with warm, soapy water, then rinse thoroughly. Do not immerse the main unit in water.
3. **Placement:** Place the warmer on a flat, stable, and heat-resistant surface, away from direct sunlight or heat sources. Ensure there is adequate ventilation around the unit.
4. **Connect Power:** Plug the power cord into a suitable electrical outlet. The LCD screen will illuminate briefly.

5. Operating Instructions

The Bubos Bottle Warmer offers four distinct warming modes to suit your needs:

Figure 5.1: 4-in-1 Working Modes

General Operation:

1. Place the bottle or food jar into the warmer.
2. Add the appropriate amount of purified water to the reservoir. Refer to the internal markings for guidance: Line 1 for steady warming/defrosting, Line 2 for quick warming. Ensure the water level does not exceed the maximum fill line to prevent splashing.

Figure 5.2: Water Fill Lines

3. Press the power button to turn on the warmer.
4. Use the mode selection button (often labeled 'M' or with mode icons) to cycle through the available functions: Quick Warm, Gentle Warm, Defrost, Steam.
5. Adjust the warming time using the '+' and '-' buttons if necessary. The warmer has a cycle memory feature that remembers your last heating time.
6. The warmer will automatically shut off and emit 5 soft beeps when the cycle is complete.
7. Carefully remove the bottle or jar. Always test the temperature of the contents before feeding.

Figure 5.3: Always Test Temperature

Specific Mode Usage:

- **Quick Warm:** Ideal for rapidly heating milk or formula from refrigerated or room temperature. Use water up to Line 2 for faster heating.
- **Gentle Warm:** Provides a slower, more even warming process, preserving nutrients in breastmilk. Use water up to Line 1.
- **Defrost:** Safely thaws frozen breastmilk or baby food. Use water up to Line 1.

Figure 5.4: Warming Breast Milk Bag

- **Steam:** Use this mode for steaming baby food in the included jar or for general steaming purposes.

Figure 5.5: Warming Baby Food

Note: A detailed time chart for various volumes and starting temperatures is typically provided with the product. Adjust warming times based on your specific needs and always verify the temperature before feeding.

6. Maintenance and Cleaning

Regular cleaning ensures optimal performance and hygiene of your Bubos Bottle Warmer.

Daily Cleaning:

1. Unplug the warmer and allow it to cool completely.
2. Empty any remaining water from the reservoir.
3. Wipe the interior and exterior of the warmer with a damp cloth. Do not use abrasive cleaners or scouring pads.
4. The included baby food jar can be washed with warm, soapy water.

Descaling (Monthly or as needed):

Mineral deposits from water can build up in the heating chamber, affecting performance. Descale regularly to prevent this.

1. Mix 2 oz (60ml) of white vinegar with 4 oz (120ml) of cold water.
2. Pour the solution into the water reservoir.
3. Turn on the warmer and run a
