TENGA SPN-001

TENGA Spinner Cup SPN-001 Tetra Instruction Manual

Model: SPN-001 Tetra

1. INTRODUCTION

This manual provides comprehensive instructions for the safe and effective use of your TENGA Spinner Cup SPN-001 Tetra. Please read this manual thoroughly before first use and retain it for future reference. The TENGA Spinner Tetra is a reusable male masturbator designed to provide unique sensations through its internal twisting mechanism and textured interior.

2. SAFETY INFORMATION

- This product is intended for personal use only.
- Do not share this product with others to maintain hygiene.
- Discontinue use immediately if you experience any discomfort, irritation, or pain.
- Keep out of reach of children.
- Store in a cool, dry place away from direct sunlight and extreme temperatures.
- Use only water-based lubricants with this product. Oil-based lubricants may damage the material.

3. PACKAGE CONTENTS

Your TENGA Spinner Cup SPN-001 Tetra package should contain the following items:

- 1 x TENGA Spinner Cup SPN-001 Tetra device
- 1 x Drying stand (integrated into the packaging)
- 1 x Sample lubricant (water-based)

4. SETUP

1. **Unpack the Device:** Carefully remove the TENGA Spinner Cup from its outer packaging. The packaging itself serves as a drying stand.
2. **Prepare for First Use:** Remove the top cover of the drying stand. Gently pull the internal sleeve out of the clear outer casing.
3. **Apply Lubricant:** Apply a generous amount of water-based lubricant directly into the opening of the sleeve. Ensure the entire inner surface is adequately lubricated for optimal experience and to prevent friction.

Image 4.1: Illustration of applying lubricant into the device opening.

5. OPERATING INSTRUCTIONS

The TENGA Spinner Cup SPN-001 Tetra features an internal coil designed to create a unique twisting sensation during use.

1. **Insertion:** Gently insert into the lubricated opening of the device.
2. **Engage Twisting Motion:** Hold the device firmly from the top. As you move the device up and down, the internal coil will expand and contract, causing the inner sleeve to twist. This action generates the distinctive spiral motion sensation.
3. **Adjust Pressure and Speed:** Experiment with different pressures and speeds to find your preferred level of stimulation.

Image 5.1: Visual guide demonstrating how to hold and move the device to activate the twisting sensation.

6. MAINTENANCE AND CLEANING

Proper cleaning and maintenance are essential for hygiene and to prolong the lifespan of your TENGA Spinner Cup.

- Rinse Immediately:** After each use, rinse the internal sleeve thoroughly under lukewarm running water. Ensure all lubricant residue is removed.
- Air Dry:** Place the sleeve onto the provided drying stand. The stand is designed to allow air circulation, facilitating hygienic drying.
- Do Not Use Harsh Cleaners:** Avoid using alcohol-based cleaners, abrasive soaps, or dishwashers, as these can damage the elastomer material.

Image 6.1: Illustration of rinsing the device under running water after use.

Image 6.2: Visual guide for placing the device on its dedicated drying stand.

7. STORAGE

Once completely dry, reassemble the device by placing the sleeve back into the clear outer casing. Store the TENGA Spinner Cup in its original packaging or a clean, dry place away from direct sunlight and extreme temperatures. Ensure it is stored discreetly and hygienically.

8. TROUBLESHOOTING

- Difficulty with Insertion or Feeling Too Tight:** Ensure sufficient water-based lubricant is applied. If the issue persists, consider that individual anatomy varies, and this model might not be suitable for all users. TENGA offers various models with different diameters and textures.
- Air Bubbles During Use:** To minimize air bubbles, apply lubricant generously and slowly insert, gently pressing the device to expel excess air before full insertion.
- Device is Slippery to Hold:** Ensure your hands are clean and dry before handling the exterior of the device. If lubricant gets on the exterior, wipe it off immediately.
- Sensation Not as Expected:** The Tetra model features geometric tiles with mild edges, offering a balanced stimulation. If you desire different sensations, TENGA offers other Spinner models (e.g., Hexa for sharper stimulation, Pixel for varied textures).

9. SPECIFICATIONS

Attribute	Detail
Brand	TENGA
Model Name	TENGA SPINNER TETRA
Item Model Number	SPN-001
Style	TETRA
Material	Elastomer
Product Dimensions	2.2 x 2.2 x 5.51 inches
