## SPACE MAX SMMD-6

# SPACE MAX Premium Space Saver Vacuum Storage Bags Instruction Manual

Model: SMMD-6 | Brand: SPACE MAX

## INTRODUCTION

---

The SPACE MAX Premium Space Saver Vacuum Storage Bags are designed to significantly reduce the volume of your stored items, such as blankets, comforters, bedding, towels, and clothing. This manual provides detailed instructions for the proper use, care, and maintenance of your vacuum storage bags to ensure optimal performance and longevity.

## SAFETY INFORMATION

---

**WARNING:** Risk of Suffocation. Keep out of reach of children. Do not allow children to play with the bags. These bags are not toys.

Do not store sharp objects in the bags as they may puncture the material. Avoid overfilling the bags beyond the indicated fill line.

## SETUP AND PREPARATION

---

Before using your SPACE MAX vacuum storage bags, ensure the items you wish to store are clean and dry. For best results, fold items neatly to maximize space efficiency within the bag.

Image: Examples of bulky items such as duvets, clothes, pillows, and towels that can be stored.

## OPERATING INSTRUCTIONS

Follow these steps to effectively use your SPACE MAX vacuum storage bags:

### 1. Step 1: Pack

Fill the vacuum storage bag with your textiles. Do not overfill; ensure items remain below the red stop line to allow for proper sealing and compression. Overfilling can prevent the bag from sealing correctly or cause damage.

### 2. Step 2: Zip

Firmly slide the zipper along the edge to close. Use the provided plastic clip to ensure a complete and airtight seal across the entire double-zip closure. Run your fingers along the seal to confirm it is fully closed.

### 3. Step 3: Vac

Open the cap on the valve. Place the nozzle of your vacuum cleaner hose (or the included hand pump) onto the valve and draw air out of the bag. Continue until the bag is fully compressed and all air is removed. For the hand pump, screw it onto the valve for a secure connection.

#### 4. Step 4: Store

Once all air is removed, quickly tighten the screw cap on the valve to create an air-tight seal. Ensure the cap is securely fastened to prevent air from re-entering. You can now store the compressed bag in your desired location, such as a closet, under a bed, or in luggage.

Medium 50cmx70cm(20x28inch)

**HOW TO USE**

- 1 PACK**  
Spread out the vacuum storage bag and open zip fastener. Fill the bag with your textiles. **Important: Overfilling will cause the bag to re-inflate. For optimum compression, only fill up to the 'stop' line on the bag.**
- 2 ZIP**  
Hold one side of the closing edge of the bag and firmly slide the zipper along the edge of the bag to close.
- 3 VAC**  
Clean the cap and place the top of the vacuum (which includes hand pump) over the valve and vacuum for out. **Important: Do not remove the foam valve piece inside the cap. Re-inflating will cause the bags to re-inflate.**
- 4 STORE**  
After vacuuming all the air out of the bag, stop and close the cap quickly to create an air-tight seal. Listen carefully for any signs of air leaking out of the cap or zipped part of the bag and repeat step 2 if necessary.

**TRIPLE SEAL TURBO VALVE**  
Designed to provide the best air-tight suction

**DOUBLE ZIP SEAL**  
Easy to close and ensures no air will get in or out of the storage bag

**SPACE MAX LIFETIME REPLACEMENT GUARANTEE**  
If the above instructions are followed correctly, your SpaceMAX brand Vacuum storage bags should not re-inflate! We're so confident in our product that every bag is covered by our lifetime replacement guarantee. If any of your bags re-inflate simply contact us at [www.spacemaxbags.com](http://www.spacemaxbags.com) and we'll expedite replacements, free for life!

**WARNING: Risk of Suffocation**  
Keep out of reach of children

## CARE AND MAINTENANCE

To ensure the longevity and effectiveness of your SPACE MAX vacuum storage bags:

- **Cleaning:** Wipe the bags with a damp cloth and mild soap if necessary. Ensure they are completely dry before storing or reusing. Do not machine wash or tumble dry.
- **Storage:** When not in use, store the bags in a cool, dry place away from direct sunlight and extreme temperatures.
- **Reusability:** The bags are designed for repeated use. Always handle the zipper and valve carefully to maintain their integrity.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Bag re-inflates after vacuuming.	<ul style="list-style-type: none"> <li>Zipper not fully sealed.</li> <li>Valve cap not tightened securely.</li> <li>Small puncture or tear in the bag.</li> <li>Bag is overfilled.</li> </ul>	<ul style="list-style-type: none"> <li>Re-seal the zipper, ensuring the plastic clip runs across the entire length.</li> <li>Ensure the valve cap is screwed on tightly and straight.</li> <li>Inspect the bag for any damage. If damaged, the bag may need replacement.</li> <li>Remove some items to ensure the bag is not overfilled and can seal properly.</li> </ul>
Difficulty removing air.	<ul style="list-style-type: none"> <li>Vacuum hose/pump not properly aligned with valve.</li> <li>Valve cap not fully open.</li> </ul>	<ul style="list-style-type: none"> <li>Ensure the vacuum hose or hand pump is firmly pressed onto the valve opening.</li> <li>Confirm the valve cap is completely unscrewed and removed during the vacuuming process.</li> </ul>
