7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Cabinet is wobbly/unstable.	Loose fasteners; uneven floor.	Ensure all screws are tightened. Place the cabinet on a level surface. Use shims if necessary.
Sliding doors do not move smoothly.	Debris in track; misaligned rollers; damaged track.	Clean the tracks of any dust or debris. Check if the plastic roller wheels are properly seated and undamaged. Ensure doors are correctly installed in the tracks.
Parts do not align during assembly.	Incorrect orientation of parts; manufacturing defect.	Double-check the instruction manual for correct part orientation. If a part appears defective, contact customer support for a replacement.
