SETUP

1. **Unpack:** Carefully remove the dehumidifier and all packaging materials from the box.
2. **Placement:** Place the unit on a flat, stable surface in the desired location. Ensure there is at least 10 cm (4 inches) of space around all sides for proper airflow. Avoid placing it in direct sunlight or near heat sources.
3. **Power Connection:** Insert the power adapter into the power adapter port on the back of the dehumidifier. Plug the other end of the power adapter into a suitable electrical outlet (AC 100-240V, 50/60Hz).

OPERATING INSTRUCTIONS

1. **Power On:** Press the power button located on the top of the unit. The indicator light will illuminate, and the dehumidifier will begin operating.

2. **Operation:** The dehumidifier will continuously remove moisture from the air. It operates quietly, making it suitable for bedrooms, offices, and other small spaces.
3. **Auto Shut-off:** The unit features an automatic shut-off function. When the water tank is full, the dehumidifier will stop operating, and the indicator light may change color (refer to specific model light indications if available, otherwise assume a general indicator).
4. **Emptying the Water Tank:**
 - When the water tank is full, gently pull out the water tank from the back of the unit.
 - Carefully pour out the collected water.
 - Slide the empty water tank back into the dehumidifier until it clicks into place. The unit will resume operation automatically.
5. **Power Off:** Press the power button again to turn off the dehumidifier. The indicator light will turn off.

MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your dehumidifier.

- **Cleaning the Exterior:** Wipe the exterior of the unit with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Cleaning the Water Tank:** Periodically clean the water tank with mild soap and water to prevent mold or mildew buildup. Rinse thoroughly and dry before reinserting.
- **Air Inlet/Outlet:** Ensure the air inlet and outlet grilles are free from dust and debris. You can use a soft brush or vacuum cleaner attachment to gently clean them.
- **Storage:** If storing the unit for an extended period, empty and clean the water tank, unplug the unit, and store it in a cool, dry place.

Troubleshooting

Problem	Possible Cause	Solution
Dehumidifier does not turn on.	No power supply. Power button not pressed.	Check if the power adapter is securely plugged into the unit and the wall outlet. Press the power button firmly.
Dehumidifier is running but not collecting water.	Room humidity is too low. Temperature is too low. Air inlets/outlets are blocked.	The unit will not collect water if humidity is already low. Optimal operating temperature is above 8°C (46°F). Ensure there is sufficient clearance around the unit and grilles are clean.
Unit stops operating.	Water tank is full. Unit is unplugged.	Empty the water tank. Check power connection.
Unusual noise.	Unit is not on a flat surface. Internal component issue.	Place the unit on a flat, stable surface. If noise persists, contact customer support.
