

Intex 26784NP

Intex Prism Frame Rectangular Pool Set 26784NP Instruction Manual

Model: 26784NP

1. INTRODUCTION

This instruction manual provides important information for the safe assembly, operation, and maintenance of your Intex Prism Frame Rectangular Pool Set, model 26784NP. Please read all instructions carefully before installation and use. Retain this manual for future reference.

The Intex Prism Frame Rectangular Pool is designed to offer a spacious swimming area, holding more water than traditional round frame pools. Its robust prismatic frame is suitable for various outdoor settings.

2. SAFETY INFORMATION

WARNING: Failure to follow these warnings can result in serious injury or death.

- Always supervise children under 5 years old when they are near or in the pool. Continuous adult supervision is required to prevent drowning.
- Consult local building codes and regulations for installation requirements.
- Install the pool on a flat, level, and compact surface. Failure to do so may lead to pool collapse and potential injury.
- Do not lean, sit, climb, or put pressure on the top rail or sides of the pool. This can cause injury or flooding.
- Ensure all filter pump units are placed at least 2 meters (6.5 feet) away from the pool.
- Turn off the filtration system when the pool is in use.
- Read the entire product instruction manual carefully before use.

CARGA DE USO*: 743 kg/m²

*Carga de uso calculada con 4 usuarios de 50 kg de peso.

IMPORTANTE: para cualquier instalación sobre cubiertas o forjados (terrazas, balcones, azoteas, áticos, patios...) consultar con un técnico la carga máxima soportada por la construcción.

4. SETUP INSTRUCTIONS

Proper site preparation and assembly are crucial for the stability and longevity of your pool.

4.1 Site Preparation

- Choose a flat, level, and compact area in your garden. Uneven ground can cause the pool to collapse.
- We recommend using a smooth concrete slab as a suitable base. Consult a local builder for advice on local soil conditions.
- Clear the area of any sharp objects, debris, or roots that could damage the pool liner.

4.2 Pool Assembly

1. Unpack all components and lay them out. Familiarize yourself with the parts using the included diagrams.
2. Assemble the metal frame according to the detailed instructions provided in the separate installation guide. It is recommended to have at least two people for assembly.
3. Carefully spread out the pool liner in the prepared area.
4. Attach the liner to the frame structure, ensuring it is properly aligned and secured.
5. Fill the pool with water, ensuring the liner settles evenly as it fills.

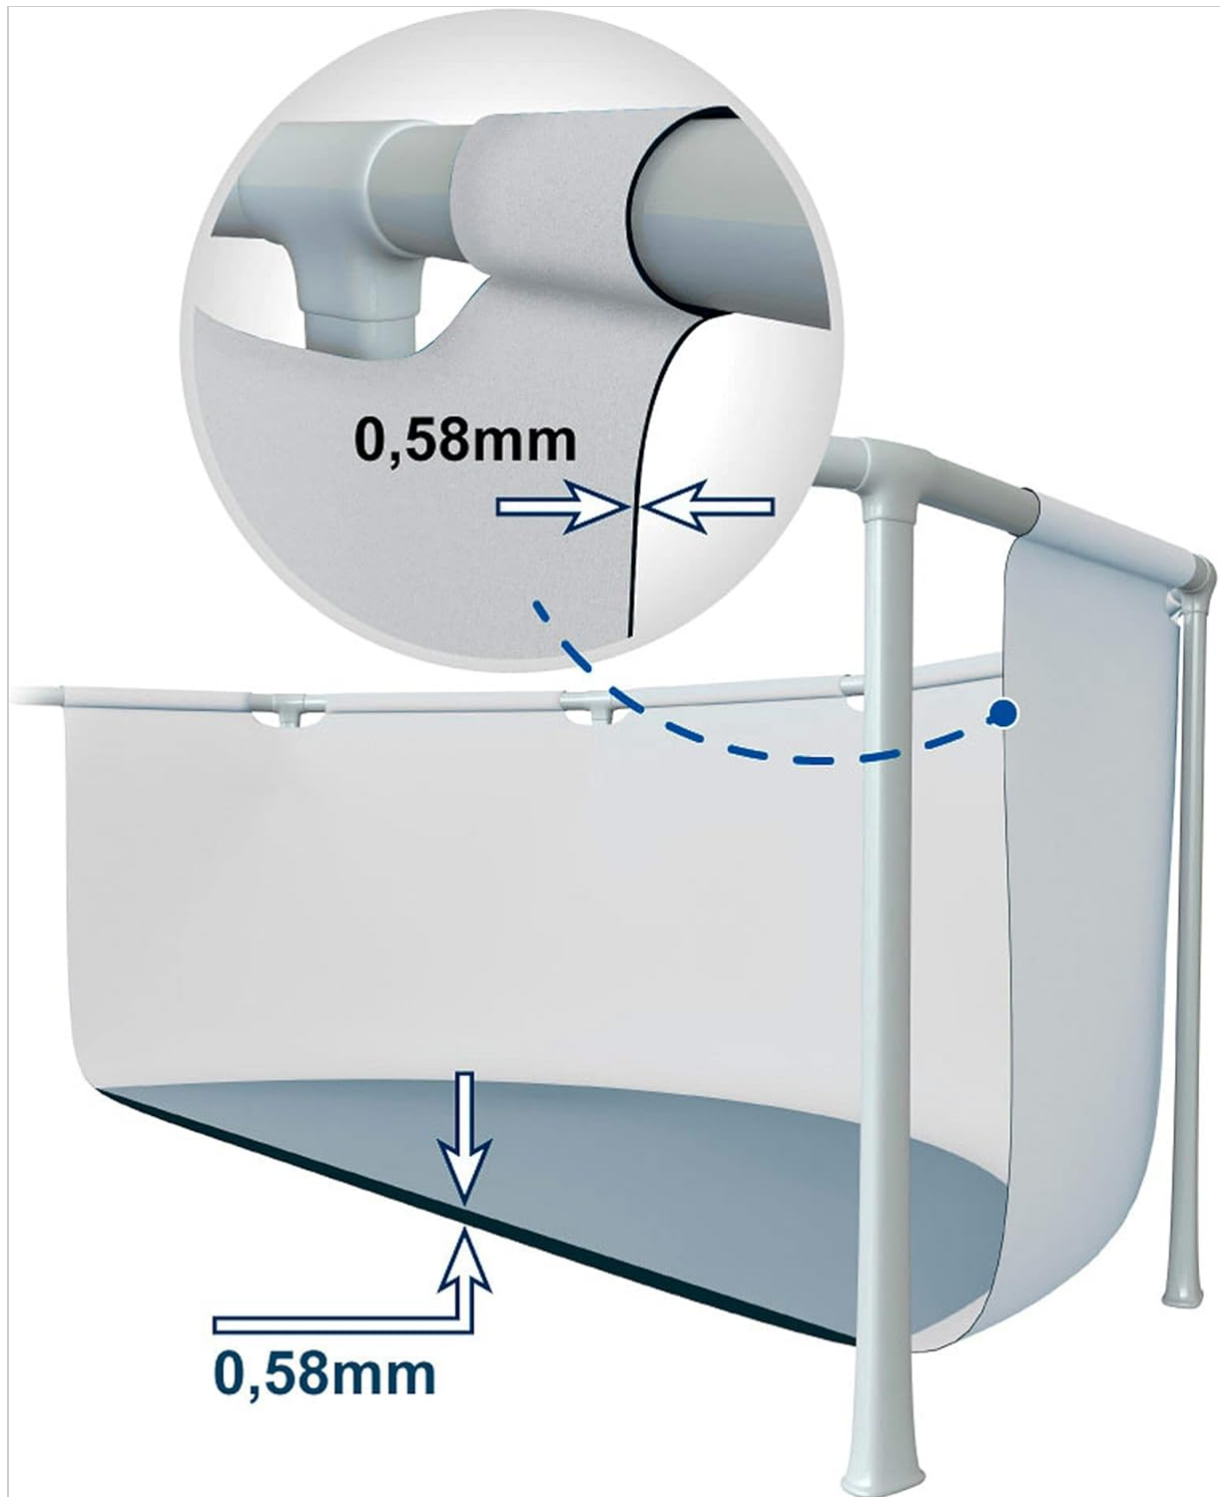

Image: Diagram illustrating the multi-layered construction and thickness of the pool wall (0.58mm), highlighting its durability.

5. OPERATING INSTRUCTIONS

5.1 Filter Pump Operation

- Connect the filter pump according to its specific installation guide.
- Ensure the filter pump is placed at least 2 meters (6.5 feet) away from the pool.
- Operate the filter pump daily to circulate and filter the pool water. The duration of operation depends on pool size and usage.
- Always turn off and unplug the filter pump before any maintenance or when people are in the pool.

5.2 Water Level

Maintain the water level between the upper and lower fill lines indicated on the pool liner. Overfilling or underfilling can affect pump performance and pool stability.

6. MAINTENANCE

Regular maintenance is essential to keep your pool water clean and extend the life of your pool.

6.1 Water Treatment

- Use appropriate pool chemicals (e.g., chlorine, pH adjusters) to maintain proper water balance and sanitation. Follow chemical manufacturer's instructions carefully.
- Test water chemistry regularly using a pool test kit.

6.2 Filter Cartridge

- Clean the filter cartridge frequently (daily or every other day, depending on usage).
- Replace the filter cartridge every two weeks or sooner if it remains dirty after cleaning.

6.3 Pool Cleaning

- Skim debris from the water surface daily.
- Vacuum the pool floor as needed to remove settled dirt.
- Wipe down the pool walls with a soft brush or cloth to prevent algae buildup.

6.4 Winterization

For seasonal use, properly drain, clean, and store the pool and its components in a dry, protected area during the off-season.

7. TROUBLESHOOTING

This section addresses common issues you might encounter with your pool. For more complex problems, refer to the detailed troubleshooting guide in your filter pump manual or contact customer support.

7.1 Cloudy Water

- **Cause:** Insufficient filtration, improper chemical balance, or high organic load.
- **Solution:** Check filter cartridge for cleanliness and replace if necessary. Test and adjust water chemistry (chlorine, pH). Run filter pump for longer periods.

7.2 Leaks

- **Cause:** Puncture in liner, loose connections.
- **Solution:** Locate the leak and use a vinyl repair kit. Tighten all hose connections to the filter pump.

7.3 Poor Filter Pump Performance

- **Cause:** Clogged filter cartridge, air in the system, low water level.
- **Solution:** Clean or replace filter cartridge. Bleed air from the pump system. Ensure water level is adequate.

8. SPECIFICATIONS

Feature	Specification
Brand	Intex
Model Number	26784NP
Shape	Rectangular
Material	Metal Frame
Color	Grey
Product Dimensions (L x W x H)	3 x 1.75 x 0.8 meters (9.84 x 5.74 x 2.62 feet)
Water Capacity (90%)	3539 Liters (935 Gallons)
Item Weight	41.1 kg (90.6 lbs)
Assembly Required	Yes
Special Features	Prism Frame Structure, Hydro Aeration Technology Filtration System
Included Components	Liner, Ladder, Filter Pump
