Taylor 480BZ

Taylor Heritage Collection Dial Indoor Outdoor Thermometer

Model: 480BZ

INTRODUCTION

The Taylor Heritage Collection Dial Indoor Outdoor Thermometer, Model 480BZ, is designed to provide accurate temperature readings for both indoor and outdoor environments. Featuring an 8.5-inch metal dial with large, easy-to-read numbers, this thermometer is constructed from anodized aluminum and glass with a decorative copper pointer, ensuring durability and a classic aesthetic. It measures temperature in both Fahrenheit and Celsius, with a wide range suitable for various climates.

KEY FEATURES

- **8.5-inch Metal Dial:** Large, clear font for easy readability from a distance.
- **Wide Temperature Range:** Measures from -40°F to 120°F (-40°C to 50°C).
- **Durable Construction:** Made of anodized aluminum and glass with a decorative copper pointer.
- **Easy Installation:** Includes mounting bracket and screws for convenient setup.
- **Weatherproof Design:** Suitable for both indoor and outdoor use.

PACKAGE CONTENTS

- Taylor Heritage Collection Dial Indoor Outdoor Thermometer (Model 480BZ)
- Mounting Bracket
- Mounting Screws (3)

SETUP AND INSTALLATION

The Taylor 480BZ thermometer is designed for straightforward installation. Choose a location that provides an accurate representation of the ambient temperature and is easily visible.

1. **Select Location:** Choose a shaded area for outdoor placement to avoid direct sunlight, which can cause inaccurate readings. For indoor use, select a central location away from direct heat sources or drafts.
2. **Position Mounting Bracket:** Hold the mounting bracket against the desired surface (wall, fence post, etc.)

at the desired height. Ensure it is level.

3. **Mark Drill Holes:** Use a pencil to mark the positions for the three mounting screws through the holes in the bracket.

4. **Drill Pilot Holes (Optional):** Depending on the surface material, you may need to drill small pilot holes before inserting screws.

5. **Secure Bracket:** Attach the mounting bracket securely to the surface using the provided screws.

6. **Mount Thermometer:** Slide the thermometer onto the mounting bracket. The design allows for easy attachment and removal if needed.

OPERATING INSTRUCTIONS

The Taylor 480BZ is a passive, analog thermometer that requires no power source. Once installed, it will continuously display the ambient temperature.

- **Reading Temperature:** The large dial features clear markings for both Fahrenheit (°F) and Celsius (°C). The copper pointer indicates the current temperature.

- **Temperature Scales:** The outer scale displays Fahrenheit readings from -40°F to 120°F. The inner scale displays Celsius readings from -40°C to 50°C.

- **Response Time:** The thermometer typically responds to temperature changes within 5 seconds. Allow a few minutes for the reading to stabilize after installation or significant temperature shifts.

CARE AND MAINTENANCE

To ensure the longevity and accuracy of your thermometer, follow these simple care instructions:

- **Cleaning:** Wipe the thermometer clean with a soft, damp cloth. Do not use abrasive cleaners or harsh chemicals, as these may damage the finish or the glass.

- **Weather Protection:** While the thermometer has weatherproof construction, extreme weather conditions (e.g., severe hail, prolonged heavy rain) may still impact its appearance over time.

- **Storage:** If storing the thermometer for an extended period, keep it in a dry, protected environment.

TROUBLESHOOTING

If you encounter issues with your thermometer, consider the following:

- **Inaccurate Readings:** Ensure the thermometer is not in direct sunlight or near a heat source (e.g., a vent, appliance exhaust) if placed outdoors. For indoor use, avoid placing it near windows that receive direct sun or near heating/cooling vents.

- **Pointer Not Moving:** Verify that the thermometer is securely mounted and not obstructed. If the temperature is within the operating range and the pointer remains static, contact customer support.

- **Missing Parts:** If any parts were missing from the original packaging, contact the retailer or manufacturer for assistance.

SPECIFICATIONS

| Specification	Detail
Model Name	Heritage 8.5" Dial Thermometer
Model Number	480BZ
Brand	Taylor
Color	Copper
Outer Material	Bronze, Copper, Glass, Metal
Display Type	Analog
Temperature Range	-40°F to 120°F (-40°C to 50°C)
