TimeStrip 30 Day 1.5X.75in

TimeStrip 30 Day Indicator User Manual

Model: 30 Day 1.5X.75in

1. INTRODUCTION

This manual provides essential instructions for the proper use and understanding of TimeStrip 30 Day Indicators. These indicators are designed to monitor elapsed time for up to 30 days, providing a clear visual indication of the duration a product or item has been in service or exposed.

Please read this manual thoroughly before activating and using the TimeStrip indicators to ensure accurate monitoring and optimal performance.

2. PRODUCT OVERVIEW

The TimeStrip 30 Day Indicator is a small, self-adhesive label that visually tracks elapsed time. It features a clear window that changes color (typically from white to red) as time progresses after activation.

Figure 1: TimeStrip 30 Day Indicators. The left indicator is inactive, showing a white window. The right indicator is activated, showing a red color filling the window, indicating elapsed time. Both indicators display "1 MONTH" and "LIFE IN SERVICE".

Key Features:

- **Visual Indication:** Clear color change to show elapsed time.
- **Self-Adhesive:** Easy application to various surfaces.
- **Compact Design:** Small size (1.5" x 0.75") for versatile use.
- **30-Day Monitoring:** Tracks time up to one month.

3. SETUP AND ACTIVATION

TimeStrip indicators are shipped in an inactive state. Activation is a simple process.

Activation Steps:

1. **Prepare Surface:** Ensure the surface where the TimeStrip will be applied is clean, dry, and free from dust or grease.
2. **Locate Activation Button:** Identify the circular activation button on the indicator, typically marked with a power symbol ().
3. **Activate:** Firmly press the activation button until a clear line appears in the first window, indicating the start of the time measurement. You may hear a slight click.
4. **Apply:** Immediately after activation, peel the TimeStrip from its backing and firmly apply it to the desired surface.
5. **Verify Activation:** Observe the indicator. The window should begin to change color (e.g., from white to red) over time, confirming successful activation.

Important: Once activated, the TimeStrip cannot be stopped or reset. Activate only when ready to begin monitoring.

4. OPERATING INSTRUCTIONS

Once activated and applied, the TimeStrip indicator continuously monitors elapsed time.

Reading the Indicator:

- The indicator features a window with markings (e.g., "1/2", "1 MONTH").
- As time progresses, a colored dye (typically red) will migrate across the window.
- The extent of the color fill corresponds to the elapsed time. For example, if the color reaches the "1/2" mark, approximately half of the 30-day period has passed. When the color reaches the "1 MONTH" mark, the full 30 days have elapsed.
- Refer to the specific markings on your TimeStrip for precise readings.

The indicator provides a clear, irreversible visual record of elapsed time.

5. STORAGE AND HANDLING

Proper storage and handling are crucial for maintaining the integrity and accuracy of unactivated TimeStrip indicators.

Storage Guidelines:

- Store unactivated indicators in their original packaging.
- Keep in a cool, dry place, away from direct sunlight and extreme temperatures.
- Avoid exposure to high humidity.
- Do not store near strong magnetic fields or chemicals.
- Ensure the activation button is not accidentally pressed during storage or transport.

Once activated, no specific maintenance is required for the indicator itself. Its function is to provide a one-time, irreversible

time indication.

6. TROUBLESHOOTING

This section addresses common issues encountered with TimeStrip indicators.

Problem	Possible Cause	Solution
Indicator does not activate (no color change after pressing button).	<ul style="list-style-type: none">Insufficient pressure during activation.Indicator is faulty or expired.	<ul style="list-style-type: none">Ensure firm and direct pressure on the activation button.Check the expiry date on the packaging. Replace with a new indicator if faulty.
Color change is too fast or too slow.	<ul style="list-style-type: none">Exposure to extreme temperatures (hotter environments accelerate, colder environments slow down).Indicator is faulty.	<ul style="list-style-type: none">TimeStrip indicators are designed for specific temperature ranges. Ensure the environment is within the intended operating conditions.Replace with a new indicator if performance is consistently inaccurate.
Adhesive fails to stick.	<ul style="list-style-type: none">Surface is dirty, oily, or wet.Surface is unsuitable (e.g., highly textured, porous).	<ul style="list-style-type: none">Clean and dry the application surface thoroughly before applying.Ensure the surface is smooth and non-porous for optimal adhesion.

If issues persist, contact customer support for further assistance.

7. SPECIFICATIONS

Feature	Detail
Monitoring Duration	30 Days (1 Month)
Dimensions	Approximately 1.5 inches x 0.75 inches
Activation Method	Manual pressure button
Indication Type	Irreversible color change
Adhesive	Self-adhesive backing
ASIN	B07FBRJSJW

8. WARRANTY INFORMATION

TimeStrip products are manufactured to high-quality standards. For specific warranty details regarding manufacturing defects or performance issues, please refer to the packaging or contact TimeStrip customer support directly. Warranty typically covers defects in materials and workmanship under normal use. It does not cover damage resulting from improper activation, storage, or use outside of specified conditions.

9. CUSTOMER SUPPORT

For technical assistance, product inquiries, or to report issues, please contact TimeStrip customer support.
