Sougayilang 2.1M/6.89Ft Rod+XY 3000 Reel

Sougayilang Telescopic Fishing Rod and Spinning Reel Combo User Manual

Model: 2.1M/6.89Ft Rod + XY 3000 Reel

INTRODUCTION

Thank you for choosing the Sougayilang Telescopic Fishing Rod and Spinning Reel Combo. This versatile and portable fishing set is designed for both freshwater and saltwater environments, offering durability and smooth performance. This manual provides essential information for the proper setup, operation, and maintenance of your fishing gear to ensure a rewarding fishing experience.

PRODUCT FEATURES

Fishing Rod Features:

- **Material:** Constructed from high-density carbon fiber blended with fiberglass for superior strength and durability.
- **Reel Seat:** Features a corrosion-resistant stainless steel reel seat, ensuring longevity in various fishing conditions, including saltwater.
- **Guide Rings:** Equipped with anti-corrosion SIC ceramic guide rings, designed for smooth line flow and improved heat dissipation, enhancing durability.
- **Handle:** Comfortable and breathable EVA handle for extended fishing sessions.
- **Portability:** Telescopic design allows for compact storage and easy transport.

Spinning Reel Features:

- **Bearings:** 13+1 high-quality, corrosion-resistant ball bearings, double-shielded for smooth and long-lasting operation.
- **Main Shaft:** Stainless steel main shaft for increased strength and smoother performance.

- **Gears:** Sealed, water and dust-resistant zinc alloy gears.
- **Drag System:** High-quality wool washers provide a stable and reliable drag system.
- **Line Roller:** Special design line roller reduces line twist and fatigue, preventing breakage.
- **Body:** Lightweight, corrosion-resistant graphite spinning reel body with an attractive finish.
- **Handle:** CNC-machined aluminum handle, interchangeable for right or left-hand use, offering strength and lightness.
- **Spool:** Aerospace-grade aluminum spool with honeycomb cells for optimal strength and reduced weight. Includes an excellent extra aluminum spool.

PACKAGE CONTENTS

Your Sougayilang fishing combo package includes the following items:

- 1 x Sougayilang Telescopic Fishing Rod (2.1M/6.89Ft)
- 1 x Sougayilang XY3000 Spinning Fishing Reel
- 1 x Spare Aluminum Spool
- 1 x 100m Fishing Line
- 3 x Fishing Lures
- 12 x Essential Fishing Accessories (e.g., hooks, swivels, sinkers)

Note: A carrying bag is not included with this set.

SETUP INSTRUCTIONS

1. Attaching the Reel to the Rod:

1. Unscrew the locking nut on the reel seat located at the base of the fishing rod.
2. Place the foot of the spinning reel into the reel seat.
3. Tighten the locking nut securely to hold the reel firmly in place. Do not overtighten.

2. Extending the Telescopic Rod:

1. Hold the rod by the handle.
2. Gently pull out each section of the rod, starting from the tip, until it is fully extended.
3. Ensure each section is straight and securely seated by giving it a slight twist. Avoid excessive force.

Image: Illustration of extending a telescopic fishing rod.

3. Spooling the Fishing Line:

1. Open the bail arm of the spinning reel.
2. Tie the end of the fishing line to the reel spool using an arbor knot or similar secure knot.
3. Close the bail arm.
4. Hold the spool of new line so it can rotate freely.
5. Begin reeling in the line, applying slight tension with your fingers to ensure it spools tightly and evenly onto the reel.
6. Fill the spool to about 1/8 inch from the rim. Do not overfill.
7. Thread the line through all the guide rings on the rod, starting from the reel to the tip.

OPERATING INSTRUCTIONS

1. Adjusting the Drag:

The drag system controls the amount of resistance the line experiences when a fish pulls on it. To adjust, turn the drag knob on the front of the spool. Turn clockwise to increase drag (tighter) and counter-clockwise to decrease drag (looser). Set the drag to approximately one-third of your line's breaking strength.

2. Casting:

1. Hold the rod with your dominant hand, gripping the reel foot between your fingers.

2. Use your index finger to hold the fishing line against the rod handle.
3. Open the bail arm with your other hand.
4. Bring the rod back over your shoulder, then swiftly cast it forward, releasing your index finger as the rod reaches a 45-degree angle to propel the lure.
5. Close the bail arm manually or by turning the reel handle once the lure hits the water.

3. Retrieving Line:

Turn the reel handle to retrieve the line. The 5.5:1 gear ratio ensures efficient line retrieval. Maintain a steady retrieve speed appropriate for your lure and target fish.

MAINTENANCE

Proper maintenance will extend the life and performance of your Sougayilang fishing gear.

After Each Use:

- **Rinse:** If used in saltwater, rinse the rod and reel thoroughly with fresh water to remove salt residue. Avoid spraying water directly into the reel's internal components.
- **Wipe Down:** Wipe the rod and reel with a clean, dry cloth.

- **Dry:** Allow all components to air dry completely before storage.

Regular Maintenance:

- **Lubrication:** Periodically apply a small amount of fishing reel oil to moving parts of the reel (e.g., handle shaft, line roller) and grease to gears. Refer to specialized fishing reel lubricants.
- **Line Inspection:** Regularly inspect your fishing line for fraying, nicks, or wear. Replace line as needed.
- **Guide Rings:** Check rod guide rings for any damage or sharp edges that could fray the line.
- **Storage:** Store the rod and reel in a dry, cool place, away from direct sunlight and extreme temperatures. Retract the telescopic rod fully for storage.

TROUBLESHOOTING

- **Line Tangles/Twists:**

Cause: Overfilling the spool, improper casting technique, or worn line roller.

Solution: Ensure spool is not overfilled. Practice smooth casting. Check line roller for smooth rotation and clean if necessary. Replace line if damaged.

- **Stiff Reel Handle:**

Cause: Lack of lubrication, dirt/debris, or corrosion.

Solution: Clean the reel thoroughly and apply appropriate fishing reel oil to moving parts. If corrosion is present, professional servicing may be required.

- **Drag Slipping/Too Tight:**

Cause: Drag washers are dry, worn, or improperly adjusted.

Solution: Adjust the drag knob. If issues persist, inspect drag washers for wear and lubricate with specialized drag grease if needed.

- **Rod Sections Sticking:**

Cause: Dirt, sand, or overtightening.

Solution: Gently twist and pull to separate. Clean the rod sections with fresh water and a soft cloth. Avoid overtightening when extending.

SPECIFICATIONS

Fishing Rod (2.1M/6.89Ft):

Attribute	Value
Material	Carbon Fiber & Fiberglass
Length (Open)	2.1 meters (6.89 feet)
Length (Closed)	42.02 cm
Weight	195.7 grams
Sections	6
Tip Diameter	0.22 cm

Spinning Reel (XY3000):

Attribute	Value
-----------	-------

Attribute	Value
Model	XY3000
Ball Bearings	13+1 BB
Gear Ratio	5.5:1
Weight	276.5 grams
Spool Weight	25.5 grams
Line Capacity (lb/yd)	10/190, 12/160, 14/130
Handle Orientation	Left/Right Interchangeable

WARRANTY AND SUPPORT

Sougayilang products are manufactured to high-quality standards. For specific warranty information, please refer to the product packaging or contact your retailer. If you encounter any issues or require assistance with your product, please reach out to Sougayilang customer support through the retailer's platform or the official Sougayilang website.

Please retain your proof of purchase for any warranty claims.
