Artago 30X10

Artago 30X10 High-End Motorcycle Disc Lock User Manual

Model: 30X10 | Brand: Artago

1. PRODUCT OVERVIEW AND KEY FEATURES

Welcome to the instruction manual for your Artago 30X10 High-End Motorcycle Disc Lock. This device is engineered to provide maximum security for your motorcycle or maxi-scooter, featuring a robust double-locking system, hardened steel construction, and an advanced alarm system. It is SRA and Sold Secure Powered Cycle Gold certified, ensuring top-tier protection.

2. COMPONENTS INCLUDED

- Artago 30X10 Disc Lock Unit
- 3 High-Security Keys with Unique Code
- CR2 Battery (pre-installed or included)

3. INSTALLATION AND OPERATION

3.1. Activating the Alarm

The Artago 30X10 features an optional alarm system. To activate the alarm, insert the key and turn it twice (X2) to the

'ON' position before removing it. A single beep confirms the alarm is armed. To use the lock without the alarm, insert the key and turn it once (X1) to the 'OFF' position.

3.2. "Don't Touch" System and Warning

The integrated "Don't Touch" system features an optimized sensor. If the motorcycle is touched or the anti-theft device is forgotten, a 6-beep warning will activate. If tampering continues, a powerful 120dB alarm will sound, accompanied by a powerful light alert (LED signal) for increased visibility.

3.3. Securing the Disc Lock

To secure your motorcycle, place the disc lock onto the brake disc, ensuring the 10mm hardened steel shackle passes through a ventilation hole or opening in the disc. Push the locking mechanism until it clicks into place. Ensure the lock is firmly attached and cannot be easily removed.

3.4. Key Usage

The Artago 30X10 comes with 3 high-security keys. Each key has a unique code. It is recommended to keep this code in a safe place, separate from your keys, as it is essential for ordering key copies if needed. The lock features DISC-TECH ART+ technology, making it pick-resistant with a 5mm anti-drill disc.

4. MAINTENANCE

4.1. Battery Replacement

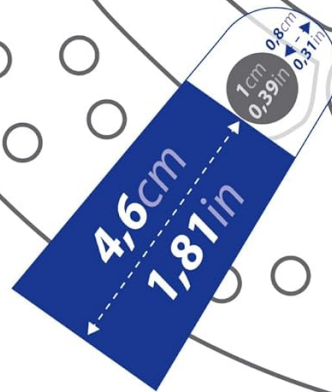

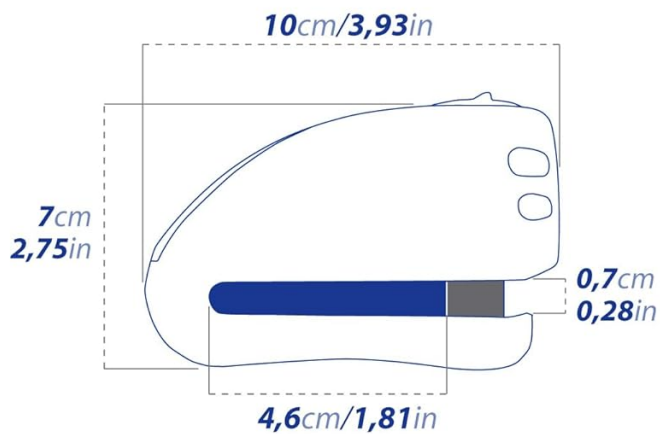

The alarm system is powered by a long-lasting CR2 battery. When the alarm sound becomes weak or inconsistent, it is time to replace the battery. Refer to the detailed instructions in the full product manual for specific steps on how to access and replace the battery module.

4.2. Water Resistance

The Artago 30X10 features a fully water-resistant design, ensuring reliable performance in various weather conditions. This design helps prolong the lifespan of the electronic module and battery.

DISC LOCK CHECKING

Check your brake disc to see if it is compatible.

4.3. General Care

To maintain optimal performance, keep the lock clean and free from dirt and debris. Periodically lubricate the locking mechanism with a suitable lock lubricant to ensure smooth operation.

5. TROUBLESHOOTING

- **Alarm not arming:** Ensure the key is turned twice (X2) to the 'ON' position and the lock is fully engaged. Check battery level.
- **False alarms:** The sensor is highly optimized. Ensure the motorcycle is stable and not subject to excessive movement from wind or passing vehicles.
- **Weak alarm sound:** Replace the CR2 battery.
- **Difficulty inserting/removing key:** Lubricate the lock cylinder with a specialized lock lubricant.

6. SPECIFICATIONS

Feature	Detail
Model Number	30X10
Dimensions (L x W x H)	10 x 3 x 70 cm (Product), 10 x 3 x 70 Centimetres (Item)
Weight	1.31 kg
Material	Special Hardened Steel
Shackle Diameter	10 mm
Anti-Drill Security	5 mm
Alarm Volume	120 dB
Battery Type	1 Lithium Metal (CR2)
Certifications	SRA Approved, Sold Secure Powered Cycle Gold
Control Method	Push Button
Color	Black / Yellow

7. OPTIONAL ACCESSORIES AND COMPATIBILITY

Artago offers various transport solutions to conveniently carry your 30X10 disc lock. Compatible supports such as the Artago K400, K402, and K403 can be purchased separately. Always ensure your motorcycle's brake disc is compatible with the lock's dimensions (e.g., 5mm anti-drill pin, 10mm shackle diameter).
