MisterVac Compatible Filter Replacement Set

Model: 4054288036875 for CleanMaxx Zyklon 2400-C-320-70

1. INTRODUCTION

This manual provides essential information for the proper installation, operation, and maintenance of your MisterVac compatible filter replacement set. Designed for the CleanMaxx Zyklon 2400-C-320-70 vacuum cleaner, this set ensures optimal filtration and extends the life of your appliance. Please read these instructions carefully before use.

2. PRODUCT OVERVIEW

The MisterVac filter replacement set includes the following components:

- **1x Dust Container Filter (Fine Filter):** This filter is crucial for capturing fine dust particles and ensuring clean exhaust air.
- **1x Foam Filter:** This filter works in conjunction with the dust container filter to provide comprehensive filtration.

Figure 2.1: The primary dust container filter, designed to capture fine particles and ensure clean air output.

Figure 2.2: The foam filter, an essential component for comprehensive air filtration within the vacuum cleaner system.

3. SETUP AND INSTALLATION

Follow these steps to correctly install your new MisterVac filters:

1. **Preparation:** Ensure your vacuum cleaner is unplugged from the power outlet before attempting any filter replacement.
2. **Access Filter Compartment:** Refer to your CleanMaxx Zyklon 2400-C-320-70 vacuum cleaner's original manual to locate and open the dust container and filter compartments.
3. **Remove Old Filters:** Carefully remove the existing dust container filter and foam filter. Dispose of them according to local regulations.
4. **Install New Foam Filter:** Place the new MisterVac foam filter into its designated slot. Ensure it sits securely and flat.
5. **Install New Dust Container Filter:** Insert the new MisterVac dust container filter. Make sure it is properly seated and sealed to prevent air leakage.
6. **Close Compartment:** Securely close the filter and dust container compartments.

7. **Important Note:** If you have washed the dust container filter (foam filter) for maintenance, ensure it is completely dry before re-installing it. Installing a wet filter can damage the vacuum cleaner or reduce its performance.

4. OPERATING INSTRUCTIONS

Once the filters are correctly installed, your vacuum cleaner is ready for operation. The high-quality filter material ensures clean exhaust air and excellent filtration performance during use. No special operating procedures are required for the filters themselves; they function automatically as part of the vacuum cleaner's filtration system.

5. MAINTENANCE

Regular maintenance of your MisterVac filters will ensure optimal performance and longevity:

- **Dust Container Filter (Foam Filter) Cleaning:** The dust container filter (foam filter) is washable and designed for long-term use.
- **Cleaning Procedure:** Before washing, lightly blow out the filter to remove loose dust and any coarse dirt. You can rinse it under running water.
- **Drying:** After washing, allow the filter to air dry completely. **Do not** place it back into the vacuum cleaner until it is thoroughly dry. This may take up to 24 hours depending on humidity.
- **Replacement Frequency:** While washable, filters have a finite lifespan. Replace your filters periodically, or if you notice a significant decrease in suction power or if the filter appears damaged or excessively worn.

6. TROUBLESHOOTING

If you encounter issues after installing your new filters, consider the following:

- **Filter Not Fitting:** Double-check the model compatibility. This filter set is specifically designed for CleanMaxx Zyklon 2400-C-320-70. Ensure the filters are oriented correctly and seated firmly in their respective compartments. Do not force the filters into place.
- **Reduced Suction Power:** This could indicate an improperly installed filter, a clogged filter, or a filter that needs cleaning/replacement. Ensure the filter is dry if it was recently washed. Check for any blockages in the vacuum cleaner's hoses or nozzles.
- **Unusual Odor:** If an unusual odor occurs, the filter might be dirty and require cleaning or replacement. Ensure the filter is completely dry before re-installation.

7. SPECIFICATIONS

Attribute	Detail
Brand	MisterVac
Model Number	4054288036875
Compatible Models	CleanMaxx Zyklon 2400-C-320-70
Material	Foam
Reusability	Reusable (Washable Foam Filter)

Number of Items	1 (set includes 1 dust container filter + 1 foam filter)
Package Dimensions	14.1 x 13.7 x 3.9 cm
Weight	61 g

8. WARRANTY INFORMATION

MisterVac® Device Warranty:

The warranty is valid in all member states of the European Union. The statutory rights in case of material defects remain unaffected and are not limited by this warranty. The warranty covers all repair and shipping costs for defects that occur during the warranty period and are reported by the end-user to MisterVac, provided these defects are not based on intended use, wear and tear, improper handling, or the use of force.

For warranty claims, please contact the guarantor directly. Upon receipt of the purchase and the shipment of the defective goods, the goods will either be repaired free of charge or replaced with an equivalent product, at the discretion of the guarantor. This warranty does not justify further claims beyond the repair or replacement of the product.

9. SUPPORT

For further assistance, questions regarding installation, maintenance, or warranty claims, please contact MisterVac customer support. Refer to the contact information provided with your product packaging or visit the official MisterVac website for current support details.

MisterVac is committed to providing quality products and excellent customer service, offering individual solutions for any issues you may encounter.
