SETUP

What's in the Box

- GameSir M2 MFi Wireless Gamepad

Please note that a charging cable is not included in the box. The controller uses a Lightning cable for charging.

Charging the Controller

Before initial use, ensure the GameSir M2 controller is fully charged. The controller is powered by a Lithium Polymer battery (included).

1. Locate the Apple Lightning charging port on the controller.
2. Connect a standard Apple Lightning cable (not included) to the controller's charging port and a power source.
3. The LED indicator on the controller will show charging status. Refer to the LED indicator section for details.

APPLE LIGHTNING LIGHTNING CHARGING PORT

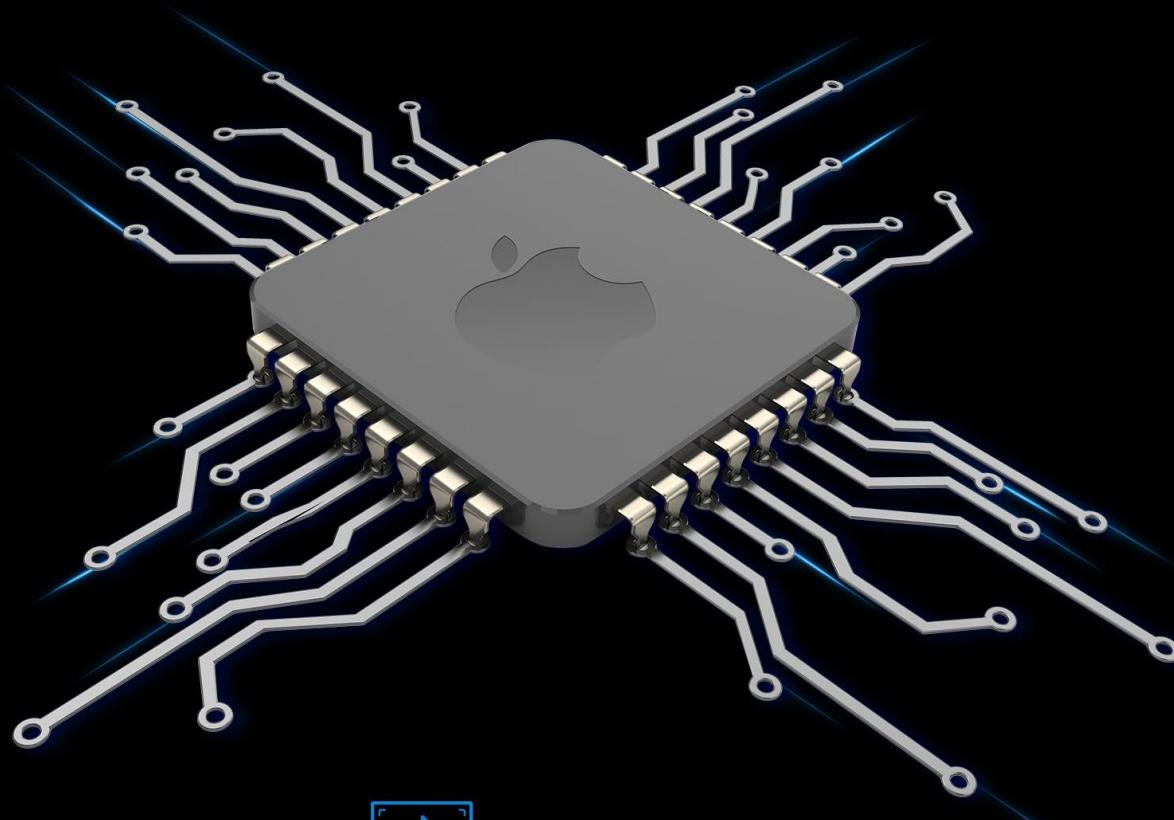

The GameSir M2 features an Apple Lightning charging port for convenient power replenishment.

Pairing with Your Device

The GameSir M2 uses Bluetooth 4.0 for wireless connectivity. Follow these steps to pair it with your Apple device:

1. Ensure your Apple device (iPhone, iPad, Apple TV, Mac) has Bluetooth enabled.
2. Turn on the GameSir M2 controller.
3. On your Apple device, navigate to the Bluetooth settings.
4. Select the GameSir M2 from the list of available devices to pair.
5. Once paired, the controller's indicator light will confirm the connection.

Using the Built-in Smartphone Holder

The GameSir M2 includes a built-in adjustable bracket to securely hold your smartphone, allowing for

portable gaming.

1. Gently extend the adjustable bracket located on the top of the controller.
2. Carefully place your smartphone into the bracket, ensuring it is securely held without obstructing the screen or buttons.
3. Adjust the angle for optimal viewing during gameplay.

The built-in adjustable bracket allows you to mount your smartphone directly onto the controller for gaming on the go.

Game Compatibility

The GameSir M2 is compatible with games that are MFi (Made for iPhone/iPad/iPod) gamepad-supported and certified by Apple. It fully supports games like Fortnite. However, it does not support games such as PUBG.

The controller also supports Tello Drones, enhancing the control experience for drone operation.

MAINTENANCE

To ensure the longevity and optimal performance of your GameSir M2 controller, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the controller. Avoid using harsh chemicals or abrasive materials that could damage the surface.
- **Storage:** Store the controller in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** For extended storage, charge the battery to approximately 50% to prevent deep discharge. Avoid fully discharging the battery frequently.
- **Handling:** Avoid dropping the controller or subjecting it to strong impacts, as this can damage internal components.

TROUBLESHOOTING

If you encounter issues with your GameSir M2 controller, refer to the following common troubleshooting steps:

- **Controller Not Connecting:**

- Ensure the controller is charged.
- Verify Bluetooth is enabled on your Apple device.
- Try unpairing and re-pairing the controller in your device's Bluetooth settings.
- Restart both the controller and your Apple device.

- **Buttons Unresponsive or Laggy:**

- Ensure the controller is within range of your device and there are no significant obstructions.
- Check for any firmware updates for the controller (refer to GameSir's official website for information).
- Confirm the game you are playing supports MFi controllers.

- **Shoulder Buttons (L1/R1, L2/R2) Issues:**

- Some users report that shoulder buttons may require pressing closer to the bottom edge to register input. Adjust your grip if necessary.

- **Analog Stick Drift/Incorrect Input:**

- If an analog stick consistently registers input in one direction (e.g., down-left), this may indicate stick drift. Try recalibrating the controller if an option is available through GameSir software, or contact support if the issue persists.

- **No Vibration Feedback:**

- The GameSir M2 controller does not feature vibration feedback. This is a design characteristic, not a malfunction.
