  - Try pressing the power button on the TV itself, if available.
- **No Picture/Sound:**
  - Verify that the correct input source is selected (e.g., HDMI 1, Antenna).

- Check all cable connections to external devices (HDMI, composite).
- Ensure the volume is not muted or set to a very low level.
- Restart the TV by unplugging it from the power outlet for 60 seconds, then plugging it back in.

- **Remote Not Responding:**

- Replace the batteries in the remote control.
- Ensure there are no obstructions between the remote and the TV.
- Try re-pairing the remote if it has become unpaired (refer to on-screen instructions during initial setup or in the TV's settings menu).

- **Network Connection Issues:**

- Check your Wi-Fi router and modem to ensure they are working correctly.

As a general rule, we support and test devices on the newest OS and the previous version. Listed below is a full list for TV, Phone, Tablet, and all features.

Please note that because this TV stick needs software (OS) to support that device and since this OS is, we support a minimum of Android 5.0 (Lollipop) or iOS 12.0 (iOS 12.0) or higher. If you get an error message, it's because the device is not compatible with the software. If the device does not work, we will not be able to support it.
