Kingston Brass VTAP543022R

Kingston Brass VTAP543022R Aqua Eden 54-Inch Alcove Bathtub User Manual

Model: VTAP543022R | Brand: Kingston Brass

1. PRODUCT OVERVIEW

The Kingston Brass VTAP543022R Aqua Eden 54-inch alcove bathtub is designed for comfort and durability. Constructed from acrylic with fiberglass and resin reinforcement, this tub features a high-gloss white finish for easy maintenance and a clean aesthetic. It is designed for a three-wall alcove installation with a right-hand drain placement.

Key Features:

- Acrylic construction with fiberglass and resin reinforcement for durability.
- Alcove tub design with an integrated apron.
- Overall dimensions: 54" (L) x 30" (W) x 21-5/8" (H).

- Water depth to overflow: 14-3/8".
- Capacity: 55.6 gallons.
- Finished in brilliant glossy white on all exposed sides.
- Right-handed drain placement.
- Designed for three-wall alcove installation with a tile flange.
- Ergonomic design for enhanced comfort.

2. SETUP AND INSTALLATION

Proper installation is crucial for the functionality and longevity of your bathtub. This model is designed for a three-wall alcove installation. It is recommended that installation be performed by a qualified professional.

2.1 Pre-Installation Checklist

- Inspect the tub for any damage prior to installation. Do not install a damaged tub.
- Ensure the alcove dimensions are appropriate for the 54" (L) x 30" (W) tub.
- Confirm all necessary plumbing connections (drain and overflow) are accessible and correctly positioned for a right-hand drain.
- Gather all required tools and materials, including drain assembly components.

2.2 Installation Steps

1. **Positioning:** Carefully place the tub into the alcove. Ensure the tile flange is correctly aligned with the wall studs.
2. **Leveling:** The tub features adjustable feet. Adjust these feet to ensure the tub is perfectly level. This may require multiple adjustments, moving the tub in and out of position until stable and level.
3. **Drain Assembly:** Install the drain and overflow assembly according to the manufacturer's instructions for

those components. Ensure a watertight seal.

4. **Water Test:** Before sealing the tub into place or finishing the surrounding walls, fill the tub with water and allow it to sit for a period to check for any leaks around the drain and overflow. Verify proper drainage.
5. **Securing:** Secure the tub to the wall studs through the tile flange.
6. **Finishing:** Complete the wall tiling and sealing around the tub.

Image 2.1: Exploded view diagram showing the bathtub and its associated parts, including the adjustable feet (Item 3) and drain components (Item 2).

2.3 Drain Orientation

This model features a right-hand drain. To determine drain orientation, stand facing the front apron (skirt) of the tub. If the drain opening is on your right side, it is a right-hand drain tub.

3. OPERATING INSTRUCTIONS

Using your Aqua Eden alcove tub is straightforward. Ensure the drain stopper is closed before filling the tub. The tub has a water depth of 14-3/8 inches to the overflow and a capacity of 55.6 gallons.

- **Filling:** Use a wall-mount tub filler (not included) to fill the tub with water to your desired level, ensuring it does not exceed the overflow opening.
- **Draining:** Open the drain stopper to allow water to empty from the tub.
- **Safety:** Always test water temperature before entering the tub to prevent scalding. For children or individuals with mobility issues, consider using a non-slip mat and grab bars for safe entry and exit.

4. CARE AND MAINTENANCE

Regular care will maintain the brilliant high-gloss white finish and extend the life of your Kingston Brass bathtub. The acrylic surface is designed for easy cleaning.

4.1 Cleaning Instructions

- Use only non-abrasive cleaners specifically designed for acrylic surfaces.
- Avoid harsh chemicals, abrasive pads, or scouring powders, as these can scratch or dull the finish.
- For general cleaning, a soft cloth or sponge with mild soap and water is sufficient.
- Rinse thoroughly after cleaning to remove all soap residue.
- Wipe dry with a soft cloth to prevent water spots.

4.2 Preventing Damage

- Do not drop heavy or sharp objects into the tub, as this can chip or crack the acrylic.
- Avoid prolonged contact with strong dyes or chemicals that could stain the surface.
- Minor scratches on the acrylic surface can often be buffed out with a specialized acrylic repair kit.

5. TROUBLESHOOTING

This section addresses common issues you might encounter with your bathtub.

5.1 Water Not Draining Completely

- **Issue:** Water pools in the drain recess or drains slowly.
- **Solution:**
 - Ensure the tub was properly leveled during installation. Uneven installation can cause water to pool.
 - Check the drain assembly for obstructions or improper sealing. The drain ring should be appropriately sized and installed correctly to prevent water from sitting.
 - Clear any hair or debris from the drain stopper mechanism.

5.2 Visible Marks or Scratches on Surface

- **Issue:** Small marks, scratches, or imperfections are noticed on the tub's finish.
- **Solution:**
 - Always inspect the tub thoroughly upon delivery and before installation.
 - For minor surface scratches, specialized acrylic repair or buffing kits may be used. Follow the product instructions carefully.
 - For significant damage, contact a professional for assessment and repair.

6. PRODUCT SPECIFICATIONS

Detailed specifications for the Kingston Brass VTAP543022R Aqua Eden Alcove Bathtub.

Feature	Specification
Model Number	VTAP543022R
Brand	Kingston Brass
