## 5. TROUBLESHOOTING

Most issues with Hot Wheels vehicles are minor and easily resolved.

Problem	Possible Cause	Solution
Wheels do not spin freely.	Debris caught in axle, bent axle, or manufacturing defect.	Gently check for and remove any visible debris (e.g., hair, lint) from around the wheels and axles. If the axle appears bent, avoid forcing it. If the issue persists and is not due to debris, contact customer support.
Paint or decals are peeling.	Excessive handling, exposure to harsh conditions, or manufacturing defect.	Handle the vehicle with care. Store away from extreme temperatures or direct sunlight. This is typically cosmetic and does not affect playability.
