Maintenance

Proper care will ensure the longevity and enjoyment of your MyBuild Mecha Frame Titan.

- **Cleaning:** To clean the bricks, wipe them gently with a soft, dry cloth. For stubborn dirt, a slightly damp cloth can be used, followed by immediate drying. Do not submerge in water or use harsh chemicals.
- **Storage:** Store the assembled model or loose bricks in a cool, dry place away from direct sunlight and extreme temperatures to prevent warping or discoloration.
- **Handling:** Handle the assembled mech with care, especially when adjusting poses, to avoid accidental detachment of parts.

Troubleshooting

If you encounter any issues during assembly or play, consider the following common solutions:

- **Missing Pieces:** Double-check all packaging and sorting areas. If a piece is genuinely missing, please contact MyBuild customer support.

- **Loose Connections:** Ensure that all bricks are firmly pressed together. Some connections may require a bit more pressure to secure properly.
- **Difficulty Posing:** If a joint feels stiff, gently work it back and forth. If parts detach during posing, reattach them firmly. The design allows for robust articulation, but excessive force should be avoided.
- **Compatibility Issues:** While MyBuild bricks are compatible with major brands, slight variations in clutch power may occur. Ensure proper alignment when connecting different brands of bricks.
