GODOX AK-R1

Godox AK-R1 Accessories Kit Instruction Manual

Brand: GODOX | Model: AK-R1

Product Overview

The Godox AK-R1 Accessories Kit is designed to enhance the versatility and creative control of your compatible Godox round head flash units. This kit features a magnetic attachment system for quick and easy setup, allowing photographers to modify light output efficiently for various shooting scenarios.

- **Magnetic Port:** The AK-R1 accessory kit utilizes a magnetic accessory port, enabling the simultaneous use of multiple accessories to achieve diverse and creative light effects. This design is ideal for portraits, product photography, and artistic shoots.
- **Wide Compatibility:** This kit is compatible with Godox V1, V1mid, V1Pro, V100, AD100Pro, and AD100ProII round camera flashes. It can also be used with the Godox H200R (sold separately) round flash head, which then installs onto AD200Pro, AD200, and AD200 Pro II pocket flashes.
- **Abundant Accessories:** The AK-R1 kit includes a dome diffuser, diffuser plate, four-wing reflector, bounce card, honeycomb grid, color filters, snoot, and a portable bag for convenient storage and transport.
- **Quick Installation:** The magnetic accessory port ensures simple and fast installation, offering great convenience and portability during shoots.
- **Stacked Use:** Optional magnetic accessories can be attached quickly and stacked on top of each other as needed, providing flexible light modification options.
- **Note:** Godox EC200, Godox H200R, and Godox AD200 Flash units shown in some images are not included with this accessory kit.

Setup and Installation

Attaching Accessories

The Godox AK-R1 accessories utilize a magnetic attachment system for quick and secure installation onto compatible round flash heads. Follow these steps for proper attachment:

1. Ensure your Godox flash unit (V1 series, V100, AD100Pro series, or AD200/AD200Pro with H200R head) is powered off.

2. Align the desired AK-R1 accessory with the magnetic rim of the flash head.
3. The magnets will automatically snap the accessory into place, securing it firmly.
4. To stack multiple accessories, simply align the next accessory with the magnetic rim of the previously attached accessory.
5. To remove an accessory, gently pull it away from the flash head.

This image illustrates the magnetic attachment of the Godox AK-R1 accessories to a compatible round flash head. Different modifiers like the dome diffuser, honeycomb, and barn doors are shown in use, highlighting the versatility and ease of attachment.

Operating Instructions for AK-R1 Accessories

Dome Diffuser

The Dome Diffuser softens and spreads light evenly, providing a wider and more natural light source. It is ideal for portraits and general fill light, reducing harsh shadows.

The Dome Diffuser is shown attached to a Godox AD200 flash, demonstrating its spherical shape designed to spread light broadly and softly.

Diffuser Plate

The Diffuser Plate provides soft and even light, similar to the dome but with a slightly different light spread, offering a natural result.

This image displays the Diffuser Plate mounted on a Godox V1 flash, illustrating its flat, translucent surface for gentle light diffusion.

Four-Wing Reflector (Barn Doors)

The Four-Wing Reflector, commonly known as barn doors, allows precise control over the light beam direction. Adjust each wing individually to shape the light, prevent unwanted spill, and create specific lighting patterns.

The Four-Wing Reflector is shown on a Godox AD200 flash, with its adjustable flaps used to direct and control the spread of light.

Bounce Card

The Bounce Card is used to reflect light onto your subject, providing a softer fill light. It can be angled to direct the bounce, offering flexibility in lighting setups.

A Bounce Card is attached to a Godox AD200 flash, illustrating its reflective surface used to soften and redirect flash output.

Honeycomb Grid

The Honeycomb Grid narrows the light beam, creating a more focused and precise light output with minimal spill. This is particularly useful for accent lighting, hair lights, or creating dramatic effects.

The Honeycomb Grid is shown on a Godox AD200 flash, demonstrating its cellular structure for concentrating the light beam.

Color Filters

The kit includes various color filters (gels) to adjust the color temperature of your flash output or create special effects. Simply place the desired filter onto the magnetic base of the flash head or stack it with other modifiers.

This image displays a set of circular color filters (gels) from the AK-R1 kit, used to modify the color of the flash output.

Snoot

The Snoot creates a very narrow, concentrated beam of light, ideal for highlighting small areas, creating dramatic spot effects, or separating a subject from the background.

The Snoot accessory is shown, featuring a conical shape designed to produce a tight, focused beam of light.
