## Assembly Steps:

Follow the step-by-step instructions provided in the assembly manual included with your product. Pay close attention to the diagrams and ensure all screws and fittings are tightened securely, but do not overtighten to avoid damaging the wood particle board.

- The bed does not require separate bed bases as it includes integrated support boards for both the upper and lower mattresses.
- The lower bed and drawers are equipped with hidden wheels for smooth and easy operation.
- Attach the ABS handles to the drawers as indicated in the instructions.

## OPERATING INSTRUCTIONS

### Extending the Lower Bed:

To use the second sleeping surface, gently pull the lower bed frame outwards from beneath the main bed. The hidden wheels will allow it to slide out smoothly. Ensure there is sufficient clear space in front of the bed for full extension.

### Using the Storage Drawers:

The two integrated drawers are located beneath the lower bed. Pull them out using the attached ABS handles. These drawers are ideal for storing bedding, toys, or other items. Push them back in fully when not in use to maintain a tidy appearance and prevent obstruction.

## MAINTENANCE AND CARE

To ensure the longevity and appearance of your Habitdesign Ares Trundle Bed, follow these simple maintenance guidelines:

- **Cleaning:** The melamine particle board surface is non-porous and highly resistant. Clean regularly with a soft, damp cloth. For stubborn marks, a mild, non-abrasive cleaner can be used, followed by wiping with a dry cloth. Avoid harsh chemicals or abrasive materials that could damage the finish.
- **Spills:** Wipe up spills immediately to prevent moisture absorption and potential damage to the material.
- **Hardware Check:** Periodically check all screws and fittings to ensure they remain tight. Retighten if necessary, but do not overtighten.
- **Weight Limits:** Adhere to the specified weight capacities for both beds (90 Kg each) and drawers (8 Kg each) to prevent structural damage.
- **Mattress Care:** Ensure mattresses are of the correct size and that the lower bed mattress does not exceed 19 cm in height to allow for proper retraction.
