## Zinus FRBF-F

# ZINUS Florence Full Panel Metal Platform Bed Frame User Manual

Model: FRBF-F

## PRODUCT OVERVIEW

---

The ZINUS Florence Full Panel Metal Platform Bed Frame is designed to provide sturdy and reliable support for your mattress without the need for a traditional box spring. Its classic metal design with a curved headboard and footboard offers a versatile aesthetic suitable for various room decors. This frame also provides ample under-bed clearance for storage solutions.

## SAFETY INFORMATION

---

- **Weight Limit:** Do not exceed the maximum weight capacity. Twin size supports up to 350 lbs, while all other sizes (Full, Queen, King) can support up to 700 lbs.
- **Assembly:** Always follow the assembly instructions carefully. Ensure all bolts and screws are securely tightened before use to prevent injury or damage.
- **Placement:** Place the bed frame on a flat, stable surface. Avoid placing near heat sources or in areas with excessive moisture.
- **Children:** Supervise children around the bed frame, especially during assembly.

## PACKAGE CONTENTS

Before beginning assembly, verify that all components listed below are present and undamaged. If any parts are missing or damaged, please contact Zinus customer support.

Component	Quantity	Description
Headboard	1	Main headboard panel.
Footboard	1	Main footboard panel.
Side Rails	2	Long metal rails connecting headboard and footboard.
Steel Slats	Varies by size	Horizontal metal bars for mattress support.
Support Legs	Varies by size	Central support legs for slats.
Hardware Pack	1	Includes bolts, washers, nuts, and assembly tools (Allen wrench).

## ASSEMBLY INSTRUCTIONS

---

Assembly is designed to be straightforward and typically requires no additional tools beyond what is provided. It is recommended to assemble the bed frame with two people.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, soft surface to prevent scratches.
2. **Attach Side Rails:** Connect the side rails to the headboard and footboard using the provided bolts and the Allen wrench. Ensure all connections are snug but do not overtighten initially.
3. **Install Slats:** Place the steel slats across the side rails. Some slats may have adhesive strips to help secure the mattress; remove the protective film if desired. Ensure all slats are evenly spaced and securely seated in their designated positions.
4. **Attach Support Legs:** Secure any central support legs to the slats or frame as indicated in the detailed

diagram.

5. **Final Tightening:** Once all components are in place, go back and fully tighten all bolts and screws.

Image: A detailed shot of a bolt being tightened on the bed frame, showing the included tool and secure fastening.

## USAGE

---

Once assembled, the ZINUS Florence bed frame is ready for use. Simply place your mattress directly onto the steel slats. No box spring is required, as the slats provide adequate support for memory foam, spring, and hybrid mattresses.

Image: The ZINUS Florence bed frame with a mattress in place, illustrating that a box spring is not required due to the integrated slat support.

Image: A close-up of the bed frame's side, highlighting the 10-inch under-bed clearance, perfect for storage solutions.

## CARE AND MAINTENANCE

---

- **Cleaning:** Wipe down the metal frame with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as they may damage the finish.
- **Inspection:** Periodically check all bolts and connections to ensure they remain tight. Retighten if necessary to maintain stability and prevent squeaking.
- **Moving:** When moving the bed frame, lift it rather than dragging it to prevent damage to the frame or your flooring.

## TROUBLESHOOTING

---

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Bed frame is wobbly or unstable.	Loose bolts or uneven assembly.	Ensure all bolts are fully tightened. Check that the frame is on a level surface.
Squeaking noises.	Loose connections or friction between metal parts.	Retighten all bolts. Apply a small amount of lubricant (e.g., silicone spray) to connection points if needed.
Mattress slides on the frame.	Lack of friction or adhesive strips not used.	If slats have adhesive strips, remove the protective film. Consider using a non-slip mattress pad.
