Paulmann 93999

Paulmann 93999 Plug & Shine Zigbee Controller Instruction Manual

Model: 93999

INTRODUCTION

The Paulmann 93999 Plug & Shine Zigbee Controller is an essential component for integrating your Paulmann Plug & Shine outdoor lighting system into a smart home environment. This controller enables convenient control and dimming of your Plug & Shine lights via Zigbee-compatible devices and smart home assistants like Amazon Alexa and Google Assistant. Designed for outdoor use, it features an IP68 rating, ensuring high resistance to dust and water.

SETUP

Installation Steps

- Connect to Plug & Shine System:** Ensure your Paulmann Plug & Shine lighting system is powered off. Connect the controller to the 24V DC Plug & Shine cables. The system is designed for easy, tool-free assembly.
- Placement:** Position the controller in a suitable outdoor location. Its IP68 rating allows for placement in areas exposed to water, including direct surroundings of pools.
- Initial Zigbee Pairing:** For initial pairing with your Zigbee gateway (e.g., Philips Hue Bridge, Smart Friends Box, Home Assistant), it is highly recommended to place the controller in close proximity (within 1 meter) to the gateway during the pairing process. This helps ensure a stable connection for the first time.
- Power On:** Once connected and positioned, power on your Plug & Shine lighting system.

OPERATING

The Paulmann 93999 Zigbee Controller allows for flexible control of your outdoor lighting:

- **Remote Control:** If you have a compatible Paulmann remote control, you can switch the lights on/off and dim them directly.
- **Smart Home Integration:** Connect the controller to a Zigbee 3.0 compatible gateway (e.g., Paulmann Smart Friends Box, Philips Hue Bridge, Home Assistant). Once connected, you can control your lights via the respective smart home app.
- **Voice Control:** With a connected Zigbee gateway, the controller is ready for voice commands through Amazon Alexa and Google Assistant, allowing you to manage your lighting hands-free.
- **Memory Effect:** The controller features a memory effect, meaning it will recall the last dimming level or on/off state when powered back on.

MAINTENANCE

The Paulmann 93999 Zigbee Controller is designed for durability and minimal maintenance. Due to its IP68 rating, it is highly resistant to environmental factors.

- **Cleaning:** Periodically wipe the controller with a damp cloth to remove dirt or debris. Avoid using harsh chemicals or abrasive cleaners, as these may damage the plastic material.
- **Inspection:** Occasionally inspect the cables and connections for any signs of wear or damage. Ensure all connections remain secure.

TROUBLESHOOTING

If you encounter issues with your Paulmann 93999 Zigbee Controller, refer to the following common solutions:

- **Controller Not Responding:**

- Ensure the Plug & Shine system is powered on and the controller is properly connected.
- Verify that your Zigbee gateway is powered on and functioning correctly.

- **Difficulty Pairing with Gateway:**

- During initial pairing, bring the controller as close as possible to your Zigbee gateway (within 1 meter). Once paired, it can be moved to its intended location.
- Check your gateway's instructions for specific pairing modes or reset procedures.

- **Weak Zigbee Signal / Disconnections:**

- If the controller is far from the gateway or separated by thick walls, the Zigbee signal might be weak. Consider repositioning the gateway or adding Zigbee signal repeaters (other Zigbee devices can act as repeaters).

- **Lights Not Dimming:**

- Ensure the lights connected to the Plug & Shine system are dimmable.
- Verify that the dimming function is enabled and correctly configured in your smart home app or via the remote control.

- **Requires a Smart Hub/Gateway:**

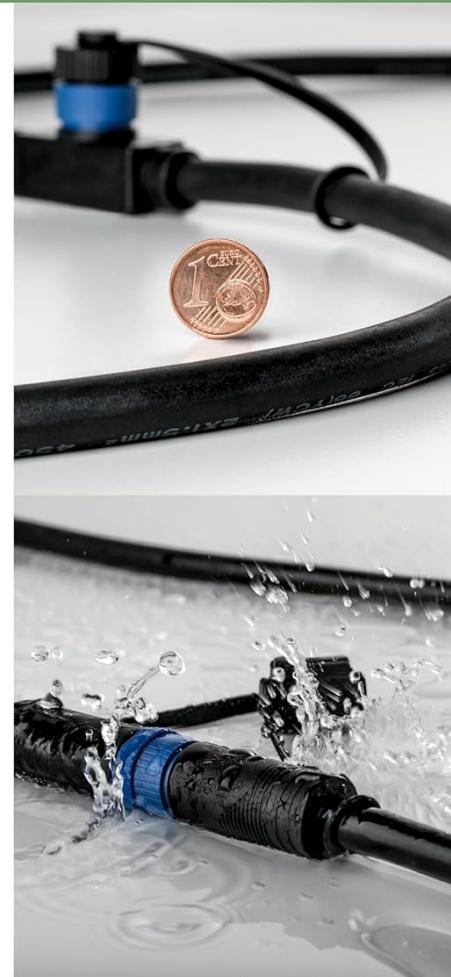

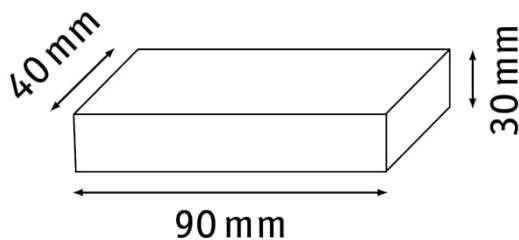

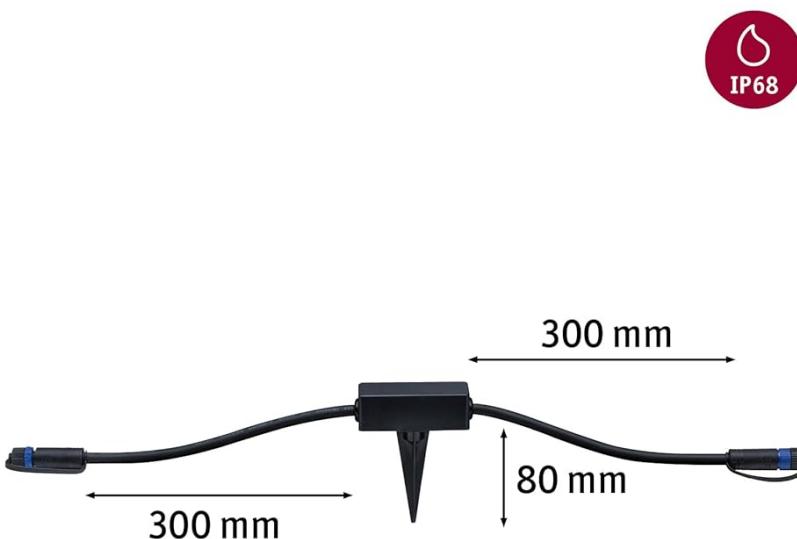

- Note that this controller requires a separate Zigbee-compatible smart hub or gateway (e.g., Paulmann Smart Friends Box, Philips Hue Bridge) to function with smartphones or voice assistants. It does not connect directly to Wi-Fi.

SPECIFICATIONS

Feature	Specification
Brand	Paulmann
Model Number	93999
Dimensions (L x W x H)	26 x 4 x 3 cm
Weight	279 g
Material	Plastic
Color	Black (Zigbee Controller)
IP Rating	IP68
Max Watts	75 Watts
Voltage	24 Volts
Dimmable	Yes
Average Lifespan	30000 Hours
Light Source Type	Accessories without bulb
Specific Uses	Garden
