ZINUS ESBS-4K

ZINUS Upholstered Metal and Wood Box Spring

Model: ESBS-4K

Product Overview

The ZINUS Upholstered Metal and Wood Box Spring is designed to provide a sturdy and durable foundation for your mattress while offering an aesthetically pleasing upholstered finish. It features a robust steel and plywood framework, complemented by a woven grey fabric paneling. This foundation is suitable for various mattress types, including latex, memory foam, and spring mattresses.

Key Features

- Durable Steel and Plywood Construction with a Woven Fabric Cover
- Upholstered design for a polished look, eliminating the need for a bed skirt
- Thick plywood interior with 2.8-inch wood slats for optimal mattress support
- King size supports up to 700 lbs
- Compact packaging for convenient shipping and handling
- Simple assembly process, typically completed in under an hour

Assembly Instructions

This box spring requires assembly. Please follow the steps carefully. An installation manual in PDF format is available for detailed visual guidance. Ensure all components are present before beginning assembly.

Components Check

Before starting, verify that all parts are included in the package:

- Metal Frame Sections
- Wooden Slats (often pre-assembled in rolls)
- Fabric Cover
- Assembly Hardware (bolts, washers, nuts)

- Assembly Tool (ratchet tool often included)

Step-by-Step Assembly

1. **Unpack and Identify Parts:** Carefully remove all components from the packaging. Lay them out on a clean, flat surface to identify each part according to the instruction manual.
2. **Assemble the Metal Frame:** Connect the metal frame sections using the provided hardware. Ensure all bolts are loosely tightened initially to allow for adjustments. Once all sections are connected, fully tighten all bolts to secure the frame.
3. **Attach the Fabric Cover:** Drape the fabric cover over the assembled metal frame. Align the corners and edges, then secure the cover using the integrated hook-and-loop fasteners or other attachment mechanisms as indicated in the manual.
4. **Place the Wooden Slats:** Unroll the wooden slats over the top of the fabric-covered frame. Ensure the slats are evenly spaced and secured to the frame, typically using hook-and-loop fasteners or pre-drilled holes.
5. **Final Check:** Inspect all connections to ensure they are secure and the box spring is stable.

Usage and Compatibility

The ZINUS Upholstered Metal and Wood Box Spring is designed to be placed on an existing bed frame or platform bed. It provides a flat, supportive surface for your mattress, enhancing its comfort and longevity. This foundation is compatible with various mattress types, including memory foam, latex, and traditional innerspring mattresses.

Maintenance and Care

To maintain the appearance and integrity of your ZINUS Upholstered Metal and Wood Box Spring, follow these simple care instructions:

- **Cleaning:** Wipe the fabric and metal surfaces with a dry cloth to remove dust and debris. Avoid using harsh chemicals or abrasive cleaners, as these may damage the finish or fabric.

- **Spills:** In case of spills, blot immediately with a clean, dry cloth. Do not rub, as this can spread the stain. For stubborn stains, consult a professional upholstery cleaner.
- **Inspection:** Periodically check all bolts and connections to ensure they remain tight. Re-tighten if necessary to maintain stability.

Troubleshooting

If you encounter any issues with your ZINUS Upholstered Metal and Wood Box Spring, consider the following common solutions:

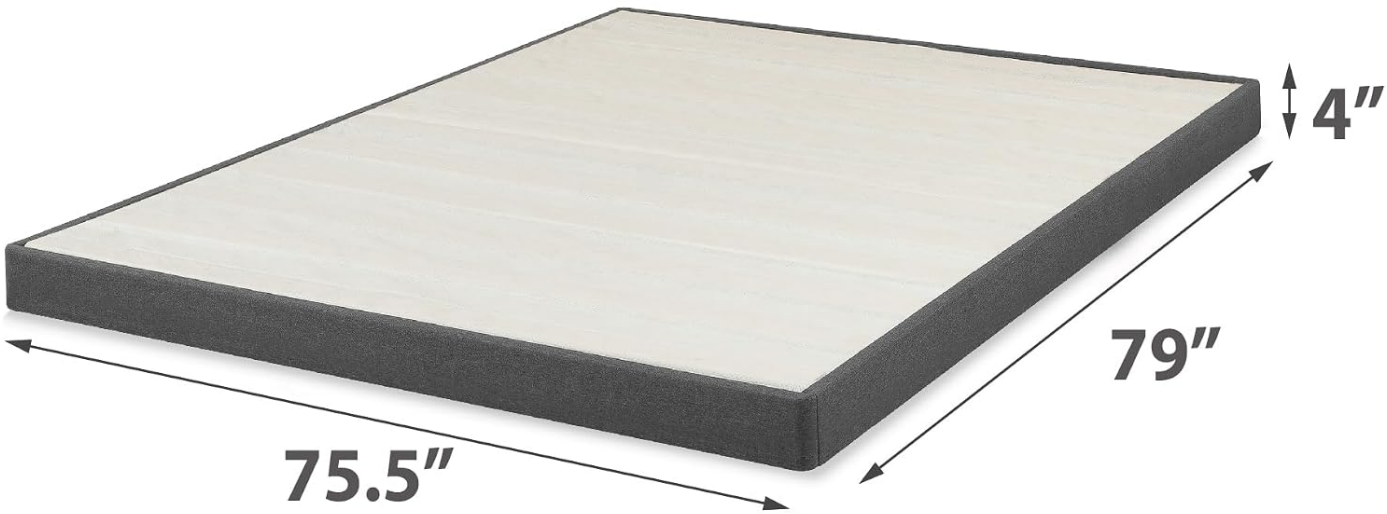

- **Squeaking or Noise:** If the box spring produces noise, ensure all assembly bolts are fully tightened. Loose connections are a common cause of squeaking. Verify that the box spring is placed on a stable, level bed frame.
- **Instability or Wobbling:** Check that the box spring is correctly seated within your bed frame. If your bed frame lacks a lip or sufficient support, the box spring may shift. Ensure all frame components are securely connected.
- **Fabric Fit Issues:** While the fabric cover is designed for a snug fit, some users may find it challenging to pull into place. Ensure the frame is correctly assembled and square before attempting to fully secure the fabric. Gentle stretching may be required.
- **Mattress Sagging:** If your mattress appears to sag, first check the condition of the mattress itself. Then, inspect the box spring's wooden slats for any damage or displacement. Ensure they are evenly spaced and properly secured.

If these steps do not resolve the issue, please refer to the Warranty and Support section for further assistance.

Product Specifications

Attribute	Detail
Size	King
Product Dimensions	79"L x 75.5"W x 4"H
Weight Capacity	Up to 700 lbs (King size)
Color	Grey
Material	Durable Steel and Plywood With a Woven Fabric Cover
Item Weight	52 pounds
Model Number	ESBS-4K
UPC	841550241594
