Emotionlite ELN-187

Emotionlite Plug-in Night Lights User Manual

Model: ELN-187

INTRODUCTION

Thank you for choosing Emotionlite Plug-in Night Lights. These LED night lights are designed to provide gentle, warm white illumination for various indoor spaces, enhancing safety and convenience. Featuring a built-in dusk-to-dawn sensor and a 360° rotatable head, these lights offer automatic operation and directional lighting to suit your needs.

Image: A pack of six Emotionlite Plug-in Night Lights, showcasing their compact design and warm white LED. Each light features a dome-shaped top with a clear lens and a light sensor on the front.

KEY FEATURES

- **Automatic On/Off:** Equipped with a dusk-to-dawn sensor, the night light automatically turns on when ambient light is low and off when it's bright.
- **Safety Illumination:** Provides a 2700K warm white glow, offering sufficient light without being overly bright or dim, ideal for nighttime navigation.
- **360° Rotation:** The light head can be swiveled 360 degrees, allowing you to direct the light beam precisely where needed.
- **Multi-Application:** Suitable for various indoor locations including bedrooms, hallways, bathrooms, kitchens, and stairways.
- **Energy Efficient:** Utilizes a 0.3W LED, ensuring low power consumption and a long lifespan of up to 50,000 hours.
- **Compact Design:** Designed not to block the second outlet when plugged in.

360 Degree Rotating

Light beams can be swivelled to any desired direction

Image: A close-up of the night light showing arrows indicating its 360-degree rotation capability, allowing light beams to be swiveled to any desired direction. Smaller images show the light pointed in various directions when plugged into an outlet.

AUTOMATIC ON/OFF

- Dusk to Dawn Sensor
- Only Activates in Darkness

Image: A split image showing the night light in a bright room (off) and a dark room (on), illustrating its automatic dusk-to-dawn sensor functionality. Icons for sun (off) and moon/stars (on) are included.

SETUP INSTRUCTIONS

1. **Unpack:** Carefully remove the night light from its packaging.
2. **Select Location:** Choose an indoor electrical outlet in the area where you desire illumination. Consider hallways, bedrooms, bathrooms, or stairways.
3. **Plug In:** Insert the night light directly into a standard 120V AC electrical outlet. Ensure it is securely plugged in.
4. **Position:** Adjust the rotatable head to direct the light beam as desired.

Note: The night light will automatically activate when the ambient light is low enough and turn off when sufficient light is detected.

Doesn't Block 2nd Outlet

Image: The night light plugged into a wall outlet, demonstrating its compact design that leaves the second outlet free for other devices.

OPERATING INSTRUCTIONS

The Emotionlite Plug-in Night Light operates automatically using its integrated dusk-to-dawn sensor.

- **Automatic Activation:** The light sensor detects the ambient light level. When the room darkens (e.g., at dusk or when lights are turned off), the night light will automatically turn on.

- **Automatic Deactivation:** When the room becomes sufficiently bright (e.g., at dawn or when lights are turned on), the night light will automatically turn off.
- **Adjusting Light Direction:** Gently rotate the top portion of the night light to swivel the LED light source 360 degrees. This allows you to aim the light beam towards the floor, wall, or any specific area you wish to illuminate.

Image: A night light plugged into an outlet near a baby crib, emitting a gentle warm white glow that illuminates the floor without harsh glare, suitable for a child's room.

Image: A collage showing the night light in three different home environments: a bathroom vanity, illuminating a staircase, and providing subtle light in a bedroom, demonstrating its versatility.

CARE AND MAINTENANCE

- **Cleaning:** To clean the night light, first unplug it from the electrical outlet. Use a soft, dry cloth to wipe the surface. Do not use abrasive cleaners, solvents, or immerse the unit in water.
- **Storage:** If storing the night light for an extended period, keep it in a cool, dry place away from direct sunlight and moisture.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Night light does not turn on in darkness.	Insufficient darkness (sensor detects too much light). Power outlet issue. Sensor obstructed.	Ensure the room is sufficiently dark. Test in a completely dark environment. Try plugging the night light into a different, working outlet. Ensure the light sensor (small clear circle on the front) is not covered or blocked.
Night light stays on during the day.	Sensor not detecting enough light. Light sensor obstructed.	Relocate the night light to an area with more ambient light during the day. Ensure the light sensor is not covered or blocked.
Light output is dim or flickering.	Power fluctuation. Unit malfunction.	Unplug and re-plug the unit. If the issue persists, contact customer support.
