Frigidaire FRIGCOMBO

Frigidaire Water and Air Filter Combo Pack (ULTRAWF & PAULTRA) Instruction Manual

Model: FRIGCOMBO | Brand: Frigidaire

PRODUCT OVERVIEW

The Frigidaire Water and Air Filter Combo Pack is designed to maintain the quality of your refrigerator's water and air. This pack includes the PureSource Ultra® water filter (ULTRAWF) and the PureAir Ultra® air filter (PAULTRA). The ULTRAWF water filter is engineered to reduce up to 99% of common contaminants, ensuring clean and great-tasting water. The PAULTRA air filter utilizes carbon technology to effectively absorb undesirable odors, keeping your refrigerator interior fresh. Both filters are genuine Frigidaire replacement parts, compatible with select Frigidaire refrigerator models, and are designed for easy, tool-free installation.

SETUP AND INSTALLATION

Water Filter Installation (PureSource Ultra® ULTRAUF)

- 1. Remove Old Filter:** Locate the existing water filter inside your refrigerator. Push the filter to release it, then remove and discard the old filter.
- 2. Prepare New Filter:** Unpack the new PureSource Ultra® water filter. Remove any protective caps from the filter's ends.
- 3. Install New Filter:** Slide the new filter into the housing until it locks securely into place. You should feel or hear a click.
- 4. Prime the System:** After installation, run water through the dispenser for approximately 3 minutes (or 1.5 gallons) to prime the filter and flush out any air or carbon fines. Discard this initial water.

Air Filter Installation (PureAir Ultra® PAULTRA)

1. **Locate Air Filter:** The PureAir Ultra® air filter is typically located in the upper left section of the fresh food compartment.

2. **Remove Old Filter:** Open the air filter housing and remove the old air filter.
3. **Install New Filter:** Insert the new PureAir Ultra® air filter into the housing, ensuring it is properly seated. Close the housing.
4. **Mark Installation Date:** The air filter packaging includes a section to mark the installation month. This helps track when the filter needs to be replaced.

OPERATING INSTRUCTIONS

Priming the Water Dispenser

After installing a new water filter, it is crucial to prime the water dispenser to ensure optimal performance and taste. This process flushes air from the system and removes any loose carbon particles from the new filter.

1. Place a large container (at least 1.5 gallons capacity) under the water dispenser.
2. Dispense water continuously for approximately 3 minutes. This is equivalent to about 1.5 gallons of water.
3. Discard the water collected during the priming process. It may appear cloudy or discolored initially, which is normal.
4. The water should now run clear and taste fresh. If not, continue dispensing water until it does.

MAINTENANCE

Filter Replacement Schedule

To ensure continuous access to fresh, clean water and odor-free air, it is recommended to replace both the water and air filters regularly.

- **Water Filter (ULTRAWF):** Replace every 6 months or after dispensing 200 gallons of water, whichever comes first.
- **Air Filter (PAULTRA):** Replace every 6 months.

Regular replacement helps maintain the effectiveness of the filters in reducing contaminants and odors, and ensures the longevity of your appliance.

TROUBLESHOOTING TIPS

If you experience issues with your water or air filtration system, consider the following common troubleshooting steps:

- **Slow Water Flow:** If water flow from the dispenser is slow, it may indicate a clogged water filter. Replace the water filter as per the maintenance schedule.
- **Bad Taste/Odor in Water:** A metallic or unusual taste/odor in water often means the water filter needs replacement or was not properly primed after installation. Ensure proper priming or replace the filter.
- **Odors in Refrigerator:** Persistent odors in the refrigerator suggest the air filter needs replacement. Ensure the air filter is correctly installed and replace it if it's past its recommended lifespan.
- **Filter Indicator Light:** If your refrigerator has a filter indicator light, ensure you reset it after replacing the filter. Refer to your refrigerator's user manual for specific instructions on resetting the filter light.

For more complex issues, consult the comprehensive user manual provided with your refrigerator or contact customer support.

SPECIFICATIONS

Feature	Detail
Brand	Frigidaire
Model Number	FRIGCOMBO
Material	Carbon filter media
Product Dimensions	4.25"D x 11.75"W x 7.25"H
Item Weight	0.01 Ounces
External Testing Certification	NSF
Product Benefits	Reduces Chromium, Chlorine Taste & Odor, Lead, Mercury, Pharmaceuticals
Unit Count	2.0 Count (Water + Air Filter)
Style	Water + Air Filter
Installation Method	Free Standing (within refrigerator)
Country of Origin	USA

WARRANTY & SUPPORT

Warranty Information

The Frigidaire Water and Air Filter Combo Pack comes with a **6-month in-use warranty**. This warranty covers defects in materials and workmanship under normal use conditions for the specified period from the date of installation.

Customer Support

For additional assistance, detailed instructions, or to address any concerns not covered in this manual, please refer to the official user manual for your specific Frigidaire refrigerator model or contact Frigidaire customer support.
