## WD My PASSPORT ULTRA FOR MAC PORTABLE EXTERNAL HARD DRIVE

Model: WDBKYJ0020BSL-WESN | Brand: WD

### 1. Introduction

The WD My Passport Ultra for Mac is a portable external hard drive designed to expand your storage capacity. Equipped with USB-C technology, it offers seamless connectivity and is pre-formatted for macOS, ensuring compatibility with Time Machine for easy backups. Its modern metal design complements your Mac setup.

## 2. What's in the Box

Your WD My Passport Ultra for Mac package should contain the following items:

- My Passport Ultra for Mac portable storage device
- USB 3.0 cable (compatible with USB-C via adapter, if included, or direct USB-C cable)
- Quick Start Guide

## Included SuperSpeed USB-C cable

## 3. Setup

1. **Connect the Drive:** Use the provided USB 3.0 cable to connect your My Passport Ultra for Mac to an available USB-C or USB 3.1 port on your Mac computer.
2. **Power On:** The drive is bus-powered, meaning it draws power directly from your computer via the USB connection. No external power adapter is needed.
3. **Initial Recognition:** Your Mac should automatically recognize the drive. It comes pre-formatted for macOS (HFS+ Journaled or APFS, depending on manufacturing date) and is ready for use with Time Machine.

4. **Software Installation (Optional):** While the drive is ready for basic use, you may choose to install included WD software for enhanced features like backup and password protection. This software can typically be found on the drive itself or downloaded from the official WD support website.

### 4. Operating the Drive

The My Passport Ultra for Mac functions like any other external storage device on your Mac. You can drag and drop files, use it for Time Machine backups, or store large media libraries.

- **File Transfer:** Simply drag and drop files or folders to and from the My Passport Ultra icon on your desktop or in Finder.
- **Time Machine Backup:** For automatic backups, open System Preferences > Time Machine, select the My Passport Ultra as your backup disk, and turn Time Machine on.
- **Password Protection:** Utilize the included WD Security software (if installed) to set up password protection with 256-bit AES hardware encryption for your data.

- **Backup Software:** The drive includes backup software that can be configured to run automatically according to your schedule, ensuring your important files are always protected.

 **Backup Software<sup>1</sup> included**  
can be set to run automatically to your schedule

1 Download and installation required. Terms and conditions apply. User account registration may be required.

## 5. Maintenance

To ensure the longevity and optimal performance of your My Passport Ultra for Mac, consider the following:

- **Safe Ejection:** Always eject the drive properly from your Mac before disconnecting it to prevent data corruption. Drag the drive icon to the Trash (which changes to an Eject icon) or right-click and select "Eject".
- **Physical Care:** Keep the drive in a clean, dry environment. Avoid extreme temperatures, direct sunlight, and physical shocks. Its sleek metal design offers some durability, but it is not ruggedized.
- **Software Updates:** Periodically check the WD support website for firmware updates or software updates for the drive to ensure compatibility and performance improvements.

### 6. Troubleshooting

If you encounter issues with your My Passport Ultra for Mac, try the following common troubleshooting steps:

- **Drive Not Appearing:**

- Check the USB cable connection at both ends. Ensure it's securely plugged into the drive and your Mac.
- Try a different USB port on your Mac.
- Try a different USB cable if available.
- Restart your Mac.
- Check Disk Utility (Applications > Utilities > Disk Utility) to see if the drive is recognized there, even if not on the desktop. You may need to mount it or run First Aid.

- **Slow Performance:**

- Ensure you are using a USB 3.0 or USB 3.1 port for optimal speed.
- Avoid running too many demanding applications simultaneously while transferring large files.

- Check for available disk space on both the drive and your Mac.
- **Data Corruption:**
  - Always safely eject the drive before disconnecting.
  - Run Disk Utility's First Aid feature on the drive.
  - If issues persist, consider backing up your data (if possible) and reformatting the drive (this will erase all data).
