

## Invicta 26972

# Invicta Men's Pro Diver Quartz Watch

MODEL: 26972 - INSTRUCTION MANUAL

## 1. OVERVIEW

---

The Invicta Men's Pro Diver Quartz Watch (Model 26972) is a robust and stylish timepiece designed for performance and durability. Featuring a two-tone stainless steel strap and a vibrant blue dial, this watch is built to withstand the rigors of professional marine activity and surface water sports.

Key features include:

- Stainless steel case with 40mm diameter and 12.5mm thickness.
- Blue dial with magnified date window and luminous hands/hour markers.
- Japanese quartz movement (PC32 Caliber) for precise timekeeping.
- Steel and gold-tone stainless steel band, 180mm L x 20mm W, with a fold-over safety clasp.
- Flame Fusion crystal for enhanced scratch resistance.
- Push/pull crown and uni-directional stainless steel bezel with a blue top ring.
- 200-meter water resistance, suitable for diving.

## 2. COMPONENTS AND FEATURES

---

Figure 2.1: Front view of the Invicta Pro Diver Quartz Watch (Model 26972).

## 2.1 Watch Face and Crystal

The watch features a striking blue dial with luminous hands and hour markers for visibility in low light conditions. A magnified date window is positioned at the 3 o'clock mark. The dial is protected by a durable Flame Fusion crystal, known for its extra scratch resistance and durability.

Figure 2.2: Detail of the watch movement and date display.

## 2.2 Bezel and Crown

The watch is equipped with a uni-directional stainless steel bezel featuring a blue top ring. This bezel can be rotated to track elapsed time, a useful feature for divers. The push/pull crown is located on the side of the case and is used for setting the time and date.

Figure 2.3: Key features including the crown and bezel.

## 2.3 Bracelet and Clasp

The two-tone (steel and gold-tone) stainless steel band provides both durability and a classic aesthetic. It features a fold-over safety clasp for secure wearing. The band length is 180mm and width is 20mm, designed as a men's standard size.

## 3. SETUP

---

### 3.1 Setting Time and Date

1. To set the time, gently pull the crown out to the second click position.
2. Rotate the crown to move the hands clockwise or counter-clockwise until the desired time is displayed.
3. To set the date, pull the crown out to the first click position.
4. Rotate the crown to adjust the date. Avoid setting the date between 9 PM and 3 AM to prevent damage to the movement.
5. Once the time and date are set, push the crown back in fully to its original position to engage the movement.

### 3.2 Adjusting the Bracelet

The stainless steel bracelet can be adjusted by adding or removing links to achieve a comfortable fit. It is recommended to have this adjustment performed by a professional jeweler to prevent damage to the band or clasp.

## 4. OPERATING INSTRUCTIONS

---

### 4.1 Water Resistance

This watch is water resistant up to 200 meters (660 feet), making it suitable for professional marine activity, surface water sports, and diving. To maintain water resistance, ensure the crown is fully pushed in before exposing the watch to water. Do not operate the crown or pushers while the watch is submerged.

Figure 4.1: Water resistance capabilities.

## 4.2 Unidirectional Bezel

The uni-directional rotating bezel can be used to measure elapsed time. Rotate the bezel counter-clockwise to align the zero marker with the minute hand. The minute hand's position on the bezel will then indicate the elapsed time.

## 5. MAINTENANCE

---

### 5.1 Battery Replacement

This watch uses a Japanese quartz movement (PC32 Caliber) powered by an SR626SW battery. When the watch stops or the second hand begins to skip, it indicates that the battery needs to be replaced. Battery replacement should be performed by a qualified watch technician to ensure the watch's water resistance and proper function are maintained.

### 5.2 Cleaning and Care

To keep your watch in optimal condition:

- Wipe the watch regularly with a soft, dry cloth to remove dust and smudges.
- For stainless steel parts, a damp cloth can be used, followed by a dry cloth.
- Avoid exposing the watch to extreme temperatures, direct sunlight for prolonged periods, or strong magnetic fields.
- Rinse the watch with fresh water after exposure to salt water or chlorine, then dry thoroughly.

## 6. TROUBLESHOOTING

---

If your watch is not functioning correctly, consider the following:

- **Watch not running:** Check if the crown is fully pushed in. If it is, the battery may need replacement.
- **Incorrect time/date:** Refer to Section 3.1 for instructions on setting the time and date.
- **Water inside the watch:** If condensation or water appears inside the watch, immediately take it to a

professional for inspection and repair to prevent further damage.

For issues not resolved by these steps, please contact customer support or a certified watch repair center.

## 8. WARRANTY AND SUPPORT

---

### 8.1 Manufacturer's Warranty

The Invicta Men's Pro Diver Quartz Watch comes with a manufacturer's warranty. For specific details regarding the warranty period and coverage, please refer to the warranty information included with your product or contact Invicta customer service directly.

### 8.2 Protection Plans

Extended protection plans may be available for purchase to cover your watch beyond the standard manufacturer's warranty. These plans typically offer additional coverage for accidental damage or mechanical failures. Options may include:

- 2-Year Protection Plan
- 3-Year Protection Plan
- Complete Protect (monthly billing for eligible purchases)

Please check with your retailer for availability and terms of these protection plans.

### **8.3 Customer Service**

For any questions, technical assistance, or warranty claims, please contact Invicta customer service. Contact information can typically be found on the official Invicta website or in the documentation provided with your watch.
