This image displays various shipping and handling symbols, including "UP", "FRAGILE", "WATER PROOF", "STACKING LAYER LIMIT", "PROHIBIT ROLLING", and "LIMIT DROP HEIGHT". These symbols indicate proper handling during transport and unpacking.

2.2 Connecting the Phone

- 1. Connect the Handset:** Plug one end of the coiled handset cord into the handset and the other end into the handset port on the phone base.
- 2. Connect to Network (PoE):** If using Power over Ethernet (PoE), connect one end of an Ethernet cable to the network port on the back of the phone and the other end to a PoE-enabled network switch or router. The phone will power on automatically.
- 3. Connect to Network (Non-PoE with Power Adapter):** If not using PoE, connect one end of an Ethernet cable to the network port on the back of the phone and the other end to a network switch or router. Then, connect the optional power adapter to the power port on the phone and plug it into a power outlet.

Figure 3: Ethernet Disconnected Message

This image shows the phone's display screen with the message "Ethernet Disconnected", indicating a network connectivity issue. This screen is typically seen during initial setup or troubleshooting network problems.

Once connected, the phone will attempt to connect to your Cisco Unified Communications Manager system. The display will show boot-up progress and then indicate readiness for use.

3. OPERATING INSTRUCTIONS

This section details the basic operation of your Cisco Unified IP VoIP Phone 7911G.
