Behringer ULTRALINK PRO MX882 V2 User Manual

Ultra-Flexible 8-Channel Splitter/Mixer

[Introduction](#)[Safety Instructions](#)[Features](#)[Setup](#)[Operation](#)[Connections](#)[Maintenance](#)[Troubleshooting](#)[Specifications](#)[Warranty & Support](#)

1. INTRODUCTION

The Behringer ULTRALINK PRO MX882 V2 is an ultra-flexible 8-channel splitter/mixer designed for professional audio applications. This versatile unit can operate independently in either mixer or splitter mode, providing solutions for signal distribution, level matching, and mixing. Its robust design ensures high signal integrity and reliable performance in various live and studio environments.

This manual provides essential information for the safe and efficient operation of your MX882 V2. Please read it thoroughly before use and retain it for future reference.

Figure 1.1: Front view of the Behringer ULTRALINK PRO MX882 V2. This image displays the front panel with all controls and indicators, including input/output level meters, channel level knobs, balance/pan controls, and mode switches.

2. IMPORTANT SAFETY INSTRUCTIONS

To reduce the risk of electric shock, fire, or damage to the unit, please observe the following safety precautions:

- Read these instructions.
- Keep these instructions.
- Heed all warnings.
- Follow all instructions.

- Do not use this apparatus near water.
- Clean only with a dry cloth.
- Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
- Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding-type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
- Protect the power cord from being walked on or pinched, particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
- Only use attachments/accessories specified by the manufacturer.
- Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
- Unplug this apparatus during lightning storms or when unused for long periods of time.
- Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

3. KEY FEATURES

The ULTRALINK PRO MX882 V2 offers a range of features designed for audio signal management:

- Each channel can operate independently in mixer or splitter mode.
- Extremely wide bandwidth for highest signal integrity.
- Usable as a six-in/six-out level matching amplifier or direct injection box.
- Ultra-low noise operation ensures clean audio.
- Versatile 8-channel configuration for various audio routing needs.

4. SETUP

4.1 Unpacking

Carefully unpack your MX882 V2 and inspect it for any signs of damage that may have occurred during transit. If damage is found, contact your dealer immediately. Retain the packing materials for future shipping.

4.2 Rack Mounting

The MX882 V2 is designed for standard 19-inch rack mounting. Ensure adequate ventilation around the unit to prevent overheating. Do not block the ventilation openings.

4.3 Power Connection

Connect the supplied AC power cord to the rear panel AC INLET and then to a suitable power outlet. Ensure the power switch on the front panel is in the OFF position before connecting. The unit operates on standard line voltage as indicated on the rear panel.

Figure 4.1: Rear panel of the Behringer ULTRALINK PRO MX882 V2, showing the AC power inlet and various audio input/output connectors.

5. OPERATION

5.1 Front Panel Controls and Indicators

The front panel of the MX882 V2 provides all necessary controls for configuring and monitoring your audio signals.

Figure 5.1: Detailed view of the MX882 V2 front panel, highlighting individual channel controls and LED meters.

- **INPUT LEVEL / OUTPUT LEVEL LEDs:** These multi-segment LED meters display the signal level for the main input/output and individual channels. Aim for levels that illuminate green, occasionally touching yellow, to avoid clipping (red).
- **MAIN INPUT LEVEL:** Adjusts the overall input level when operating in mixer mode.
- **MAIN OUTPUT LEVEL:** Adjusts the overall output level when operating in mixer mode.
- **CHANNEL LEVEL:** Controls the output level for each individual channel.
- **BALANCE / PAN:** In mixer mode, this knob controls the stereo pan position for the channel. In splitter mode, it controls the balance between the two outputs for that channel.
- **SPLIT / MIX Switch:** This button toggles the operating mode for each channel. When engaged (LED lit), the channel operates in **Splitter Mode**. When disengaged, it operates in **Mixer Mode**.
- **POWER Switch:** Turns the unit on or off.

5.2 Mixer Mode (Channels 1-6)

In Mixer Mode, the MX882 V2 functions as a 6-input, 2-output line mixer. Each of the six channels can accept an input signal, which is then mixed down to the main stereo outputs (MAIN OUT L/R).

- Ensure the **SPLIT / MIX** switch for the desired channel is disengaged (LED off).
- Connect your audio source to the corresponding **CH IN** (1-6) on the rear panel.

- Adjust the **CHANNEL LEVEL** knob to set the individual channel's volume.
- Use the **BALANCE / PAN** knob to position the channel's signal within the stereo field of the main outputs.
- Monitor the **INPUT LEVEL** and **OUTPUT LEVEL** LEDs to prevent clipping.

5.3 Splitter Mode (Channels 1-6)

In Splitter Mode, the MX882 V2 takes a single input signal and distributes it to two separate outputs for each channel. This is useful for sending a signal to multiple destinations, such as a main PA system and a monitor mix.

- Engage the **SPLIT / MIX** switch for the desired channel (LED on).
- Connect your audio source to the corresponding **CH IN** (1-6) on the rear panel.
- The input signal will be routed to both **CH OUT** (1-6) and **MAIN OUT L/R** (if connected).
- The **BALANCE / PAN** knob now functions as a balance control, allowing you to adjust the relative levels of the two outputs for that channel.
- Adjust the **CHANNEL LEVEL** knob to control the overall output level for the split signal.

6. CONNECTIONS

The rear panel of the MX882 V2 features various input and output connectors. Always ensure the unit is powered off before making or changing connections.

Figure 6.1: Rear panel showing all input and output connectors, including XLR and 1/4" TRS jacks.

- **AC INLET:** Standard IEC connector for the power cord.
- **MAIN IN L/R:** Balanced XLR inputs for the main stereo signal when in mixer mode.
- **MAIN OUT L/R:** Balanced XLR outputs for the main stereo signal. These outputs carry the mixed signal in mixer mode or the split signal in splitter mode.
- **CH 1-6 IN:** Balanced XLR inputs for individual channels.
- **CH 1-6 OUT:** Balanced XLR outputs for individual channels. These outputs carry the split signal in splitter mode.
- **CH 7-8 IN / OUT:** These channels feature 1/4" TRS inputs and outputs, providing additional flexibility for line-level signals. They can also operate in mixer or splitter mode.

7. MAINTENANCE

The Behringer ULTRALINK PRO MX882 V2 requires minimal maintenance to ensure long-term performance.

- **Cleaning:** Use a soft, dry cloth to clean the exterior of the unit. Do not use liquid cleaners or solvents, as they may damage the finish or internal components.
- **Ventilation:** Ensure that the ventilation openings are not obstructed. Proper airflow is crucial for preventing overheating.
- **Storage:** If storing the unit for an extended period, disconnect it from power and store it in a dry, dust-free environment.
- **Servicing:** All servicing should be performed by qualified service personnel. Do not attempt to open the unit or perform repairs yourself.

8. TROUBLESHOOTING

If you encounter issues with your MX882 V2, refer to the following common troubleshooting steps:

Problem	Possible Cause	Solution
No sound output	Power off; incorrect connections; level knobs turned down; incorrect mode.	Check power switch and cable; verify all audio cables are correctly connected; ensure all relevant LEVEL knobs are up; confirm correct SPLIT/MIX mode for each channel.
Distorted sound	Input/output levels too high (clipping); faulty cables.	Reduce input/output levels to prevent red LED illumination; check and replace cables if necessary.
Hum or noise	Ground loop; faulty cables; interference from other equipment.	Ensure all equipment is properly grounded; use balanced cables where possible; try isolating the MX882 V2 from other electrical devices.
Channel not working	Incorrect mode; faulty cable; channel level down.	Check SPLIT/MIX switch for the channel; test with a different cable; ensure channel LEVEL knob is adjusted.

If the problem persists after trying these steps, please contact Behringer customer support or a qualified service technician.

9. TECHNICAL SPECIFICATIONS

Specification	Value
Model	MX882
Number of Channels	8
Connectivity Technology	XLR, 1/4" TRS
Item Weight	3.74 pounds (1.7 Kilograms)

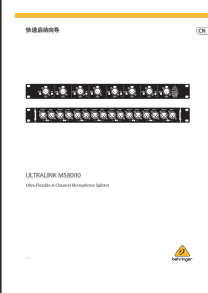

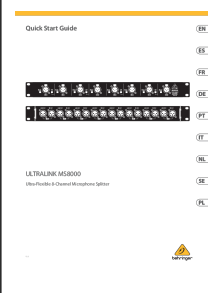

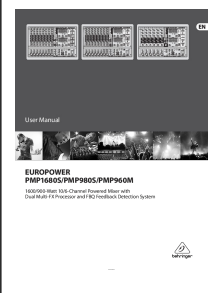

Specification	Value
Product Dimensions	19.02 x 5.87 x 1.73 inches
Power Source	Corded Electric
Date First Available	October 18, 2018

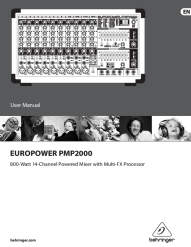

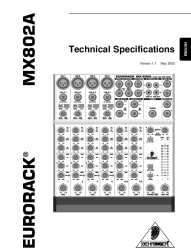

10. WARRANTY AND SUPPORT

For detailed warranty information and terms and conditions, please refer to the official Behringer website or the warranty card included with your product. Technical support is available through authorized Behringer service centers and online resources.

You can find further assistance and contact information on the [Behringer Store on Amazon](#) or the official Behringer website.
