6. CLEANING AND MAINTENANCE

Regular cleaning and maintenance will ensure the longevity and optimal performance of your WMF Electric Water Boiler.

- 1. Before Cleaning:** Always unplug the kettle from the power outlet and allow it to cool completely before cleaning.

- 3. Interior Cleaning (Descaling):** Limescale can build up inside the kettle, especially in hard water areas. Descaling regularly (e.g., monthly or as needed) to maintain efficiency and water taste.

- Fill the kettle with a mixture of water and white vinegar (e.g., 1 part vinegar to 2 parts water) or a commercial descaling solution.
- Bring the mixture to a boil.
- Let it stand for 15-30 minutes (or as per descaler instructions).
- Pour out the mixture and rinse the interior thoroughly with fresh water several times.
- Boil fresh water once or twice and discard to remove any residual descaling agent.

4. **Limescale Filter Cleaning:** The removable limescale filter helps prevent scale from entering your cup.
