APS IB-D6258T

APS Premium 6in 304 Stainless Steel Running Boards - Instruction Manual

Brand: APS | Model: IB-D6258T

INTRODUCTION

Thank you for choosing APS Premium 6in 304 Stainless Steel Running Boards. These running boards are designed to provide a secure and convenient step for your vehicle, enhancing both accessibility and appearance. Crafted from durable 304 stainless steel with a polished finish, they offer high resistance to rust and corrosion. The massive 6-inch wide solid one-piece boards provide an extra-wide step area for secure footing, covered with a premium quality UV-resistant non-slip top. This manual provides essential information for installation, operation, maintenance, and troubleshooting to ensure optimal performance and longevity of your product.

General Installation Tips:

- **Preparation:** Before installing, ensure all mounting points on your vehicle are clear of debris, rust, or excess paint. Some users find it helpful to 'chase' the threads on existing studs or use a wire brush for optimal fit.
- **Hardware:** Use the provided mounting brackets and hardware. Ensure all bolts and nuts are securely tightened, but avoid overtightening square bolts to prevent damage.
- **Alignment:** Carefully align the running boards with the mounting brackets. It may be beneficial to have assistance to hold the boards in place while securing them.
- **Tools:** A cordless impact wrench can significantly speed up the installation process.

OPERATING INSTRUCTIONS

The APS Premium Running Boards are designed to provide a stable and convenient step for entering and exiting your truck. To use, simply place your foot firmly on the non-slip surface of the running board. The wide 6-inch platform ensures ample space for secure footing. Always ensure the running board is clear of obstructions before stepping.

MAINTENANCE

Proper maintenance will ensure the longevity and appearance of your running boards.

- Cleaning:** Regularly clean the running boards with mild soap and water. Use a soft cloth or sponge to wipe down the polished stainless steel and the non-slip top. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- Inspection:** Periodically inspect all mounting brackets and hardware for tightness. Over time, vibrations from driving can cause bolts to loosen. Re-tighten any loose bolts as needed to maintain stability and safety. Check for any signs of wear, damage, or corrosion, especially after off-road use or exposure to harsh weather conditions.

TROUBLESHOOTING

- Loose Fit After Installation:** If the running boards feel loose after installation, re-check all bolts and nuts on both the mounting brackets and the running boards themselves. Ensure they are tightened securely according to the installation instructions.
- Difficulty with Bolt Alignment:** If you encounter difficulty aligning bolts with the vehicle's mounting points, ensure you have the correct brackets for the specific side of the vehicle (driver/passenger) and that the brackets are oriented correctly. Minor adjustments to the bracket position before final tightening can help.
- Product Damage:** If the product arrives damaged, document the damage with photographs and contact the seller immediately for assistance with replacement or resolution.

SPECIFICATIONS

Color	Aluminum Silver
Brand	APS
Material	Aluminum
Exterior Finish	Polished Finish
Item dimensions L x W x H	86 x 6 x 1.5 inches
