Blink Blink XT

Blink XT Home Security System Instruction Manual

Your guide to setting up, operating, and maintaining your Blink XT cameras.

1. Introduction

The Blink XT Home Security System provides a wireless, battery-powered solution for monitoring your home or property. Designed for ease of use, the system integrates with your home Wi-Fi network and allows for remote viewing and management via the Blink Home Monitor app.
This manual will guide you through the installation, configuration, and daily operation of your Blink XT system, ensuring optimal performance and security.

2. System Components

Your Blink XT system typically includes the following components:

- **Blink XT Camera(s):** Wireless, weather-resistant cameras with motion detection and night vision capabilities.
- **Blink Sync Module:** The central hub that connects your cameras to the internet via your Wi-Fi network.
- **Mounting Hardware:** Screws and mounts for camera installation.
- **AA Lithium Batteries:** For powering the cameras.
- **USB Cable and Power Adapter:** For the Sync Module.

3. Setup Guide

3.1. Download the Blink Home Monitor App

Before beginning installation, download the Blink Home Monitor app from your device's app store. The app is available for both iOS and Android devices.

Download for iOS (Apple App Store)
Download for Android (Google Play Store)

Follow the on-screen instructions within the app to create a new account or log in to an existing one.

3.2. Set Up the Sync Module

1. Plug the Sync Module into a power outlet using the provided USB cable and power adapter. Ensure it is placed centrally within your home, ideally within range of your Wi-Fi router and where your cameras will be located.

2. Open the Blink Home Monitor app and select "Add a System."
3. Follow the app's prompts to connect the Sync Module to your home Wi-Fi network. You will need your Wi-Fi network name (SSID) and password.
4. Once connected, the Sync Module's blue and green lights will be solid.

3.3. Install and Add Cameras

1. Insert the two AA lithium batteries into each Blink XT camera.
2. In the Blink app, select "Add a Device" and choose "Blink Camera."
3. Scan the QR code located on the back of the camera or manually enter its serial number.
4. The app will guide you through connecting the camera to your Sync Module.
5. **Camera Placement:** Choose a location for your camera that provides the desired view and is within effective range of the Sync Module and your Wi-Fi network. Consider using a Wi-Fi extender if coverage is an issue in larger homes or properties. Mount the camera securely using the provided hardware.

4. Operating Your Blink XT System

4.1. Arming and Disarming the System

The Blink app allows you to arm or disarm your entire system or individual cameras. When armed, cameras will record clips upon detecting motion.

- **Arm:** Tap the "Arm" button in the app to activate motion detection for all cameras in the system.
- **Disarm:** Tap the "Disarm" button to temporarily disable motion detection.
- **Schedules:** Set up custom schedules within the app to automatically arm and disarm your system at specific times.

4.2. Motion Detection Settings

Customize motion detection to suit your environment and reduce false alarms:

- **Sensitivity:** Adjust the motion sensitivity slider in camera settings. Higher sensitivity detects smaller movements, while lower sensitivity requires more significant motion.
- **Activity Zones (BETA):** Define specific areas within the camera's view where motion detection should be active or ignored. This is useful for excluding areas with constant movement like swaying tree branches or busy streets.
- **Retrigger Time:** Set the delay before the camera can detect motion again after recording a clip.

4.3. Live View

You can view a live feed from your cameras at any time through the app. Note that continuous live viewing can consume battery life more quickly.

- Tap the camera icon next to the camera name in the app to start a live view.
- Live view is typically limited to one camera at a time.

4.4. Viewing and Managing Clips

Recorded motion clips are stored in the cloud and accessible via the app.

- Access your clips from the "Clips" tab in the app.
- You can play, download, or delete clips from this section.
- Cloud storage capacity and retention policies may vary; refer to Blink's official website for current details.

4.5. Alexa Integration

The Blink system can be integrated with Amazon Alexa for voice control.

- Enable the "Blink SmartHome" skill in the Alexa app.
- Link your Blink account.
- Use voice commands such as "Alexa, arm the [System Name] system" or "Alexa, show me [Camera Name]."

5. Maintenance

5.1. Battery Replacement

Blink XT cameras are designed for extended battery life, often lasting up to two years under typical usage. Battery life can be affected by factors such as temperature, number of motion events, and frequency of live view sessions.

- The Blink app will notify you when camera battery levels are low.
- To replace batteries, open the battery compartment on the back of the camera and insert two new AA 1.5V Lithium batteries. Ensure correct polarity.

5.2. Cleaning Your Camera

Periodically clean the camera lens and housing to ensure clear image quality. Use a soft, dry cloth. Avoid abrasive cleaners or excessive moisture.

6. Troubleshooting

6.1. Connectivity Issues

- **Sync Module Offline:** Ensure the Sync Module is plugged in and its lights are solid blue and green. Check your home Wi-Fi connection. Try restarting your Wi-Fi router and the Sync Module.
- **Camera Offline:** Verify the camera is within range of the Sync Module and has sufficient battery. Try moving the camera closer to the Sync Module or repositioning the Sync Module.
- **Weak Signal:** If the app indicates a weak signal (yellow bars), consider using a Wi-Fi extender or relocating your Sync Module for better coverage.

6.2. Motion Detection Problems

- **False Alarms:** Adjust motion sensitivity downwards. Utilize Activity Zones to exclude areas with irrelevant motion (e.g., tree branches, pets). Ensure the camera is not pointed directly at reflective surfaces or areas with rapid light changes.
- **Missed Detections:** Increase motion sensitivity. Verify Activity Zones are correctly configured to include the desired monitoring area. Ensure the camera lens is clean and unobstructed.

6.3. App Performance Issues

- **App Crashing/Freezing:** Ensure your Blink Home Monitor app is updated to the latest version. Try force-closing and reopening the app. If issues persist, clear the app's cache (Android) or reinstall the app.
- **Slow Loading:** Check your internet connection speed. A stable and fast connection is crucial for optimal app performance and clip viewing.

7. Specifications

Feature	Description
Connectivity	Wireless (Wi-Fi 802.11n)
Power Source	2x AA 1.5V Lithium Batteries (Cameras), USB Power Adapter (Sync Module)
Motion Detection	PIR (Passive Infrared) Sensor with adjustable sensitivity and activity zones
Night Vision	Infrared (IR) Illumination
Operating Environment	Indoor/Outdoor (Weather-resistant)
Storage	Cloud Storage for video clips

8. Support and Warranty

For further assistance, technical support, or warranty information, please refer to the official Blink support channels.

- **Online Support:** Visit the official Blink support website for FAQs, troubleshooting guides, and contact options.
- **Customer Service:** Contact Blink customer service directly for personalized assistance.

Specific warranty terms and conditions are provided at the time of purchase and can be found on the product packaging or Blink's official website.

What's the Difference Between Blink XT and XT2

There are a few subtle differences between the Blink XT and XT2 camera. We will cover those differences in this article.

First and most important is the speaker in the bottom. You'll see 15 small holes on the bottom of the camera. This is where the sound comes out when you're talking to someone you see on camera. This speaker is what enables the XT2 to have two-way audio.

The next difference is on the front of the camera. The blink logo on the bottom and the outline of the center plastic is a light shade of grey on the new XT2.

1. General

The Nexmosphere XT-EF Series offers E-field sensors in various sizes which are able to detect touchless input from the user. This document provides explanation of the available functionalities and instructions on how to install and integrate the sensor into your digital signage installation.

The information in this document is created for users who are familiar with the Nexmosphere API and are able to control a basic setup with a Nexmosphere API controller. If this is not the case yet, please read the general documentation on the Nexmosphere serial API first.

2. Product overview

The XT-EF Series consists out of 4 products:

XT-EF30 XT-EF650 XT-EF650 XT-EF680

All XT-EF sensors feature AirButton detection which will trigger whenever a person's hand either enters or leaves the sensor's detection field. The XT-EF630, XT-EF650 and XT-EF680 also offer AirGesture detection which includes detecting AirSwipes and AirWheels. The detection range of the sensors varies with the size.

FAQ

How do I set up my Blink system?

1. Plug the Sync Module (the small black square with two LED lights) into any wall outlet
2. Download the Blink app for iOS in the App store or from Google Play for Android. Launch the app and run the Setup Wizard
3. Place your Blink sync module near your wi-fi router for best connection.

Once these steps are complete, Blink's wire-free design and included mount make it simple to shift or relocate your units.

How much storage do I get for recorded videos?

With our regular free cloud storage, you can store up to 7200 total seconds of video (or 1,440 five-second events) at no extra cost. However, customers who purchase this Blink XT 4-camera system will automatically receive double the free cloud storage for videos captured by this system only. This means that you will be able to store up to 14,400 total seconds of video (or 2,880 5-second events) for free! If you reach your storage limit, your oldest alert clips will automatically be deleted to make room for the next ones.

Does Blink come with a warranty?

Yes! On existing Blink devices, there is a one-year manufacturer's limited warranty. However, customers who purchase this Blink XT 4-camera system will automatically receive a two-year manufacturer's limited warranty.

Where can I find the Blink app?

iOS users can download the Blink app within the App Store. Android users can find the Blink app within Google Play.

Can the Blink app be accessed from more than one device?

Yes! You can download our app and log into the same account from as many iOS and Android devices as you'd like, so the entire household can receive alerts or check in at home. You do not need to create a new account, simply log in to the app on a new device with the email and password you or your family member has already created. Please note that Blink will only allow for one active Live View feed at a time.

Where can I place my Blink XT camera units?

Anywhere – Blink's Sync Modules can communicate with Blink cameras up to 100 ft. away (relative to the structure of your home). With no wires or cords to worry about and a completely weatherproof design, Blink XT can go where other systems cannot. Place it inside or outside, on a bookshelf, desk or tabletop, attach it to the front door, wall, or ceiling, or mount it in a corner.

2. Download the Blink app for iOS in the App Store, Google Play Store for Android, or Amazon App Store for FireOS. Launch the app and follow the in-app instructions
3. Place your Blink sync module near your WiFi router for best connection. Once these steps are complete, Blink's wire-free design and included mount make it simple to shift or relocate your units

How much storage do I get for recorded videos?
With our regular free cloud storage, you can store up to 7200 total seconds of video (or 1,440 five-second events) at no extra cost. However, customers who purchase this Blink XT2 4-camera system will automatically receive double the free cloud storage for videos captured by this system only. This means that you will be able to store up to 14,400 total seconds of video (or 2,880 5-second events) for free! If you reach your storage limit, your oldest alert clips will automatically be deleted to make room for the next ones.

Does Blink come with a warranty?
Yes! On existing Blink devices, there is a one-year manufacturer's limited warranty. However, customers who purchase this Blink XT2 4-camera system will automatically receive a two-year manufacturer's limited warranty.

Where can I find the Blink app ?
iOS users can download the Blink app within the App Store. Android users can find the Blink app within the Google Play Store . FireOS users can find the Blink app in the Amazon App Store.

Can the Blink app be accessed from more than one device?
Yes! You can download our app and log into the same account from as many iOS and Android devices as you'd like, so the entire household can receive alerts or check in at home. You do not need to create a new account, simply log in to the app on a new device with the e-mail and password you or your family member has already created. Please note that Blink will only allow for one active Live View feed at a time.

Where can I place my Blink XT2 camera units?
Anywhere – Blink's Sync Modules can communicate with Blink cameras up to 100 ft. away (relative to the structure of your home). With no wires or cords to worry about and a completely weatherproof design, Blink XT2 can go where other systems cannot. Place it inside or outside, on a bookshelf, desk or tabletop, attach it to the front door, wall, or ceiling, or mount it in a corner.

Does Blink XT2 work outside?
Yes, Blink XT2 is completely weatherproof and is designed to be used inside and out! Sunshine, rain, or snow, Blink XT2 is built to handle it all!

Blink Two-Year Limited Warranty

If you purchased your Blink XT 3 Camera System directly from QVC under item number E231650 (the "Device"), it is covered by this Two-Year Limited Warranty. QVC is not the warranty provider. This warranty is provided by Immedia Semiconductor (Blink).

Immedia Semiconductor warrants the Device against defects in materials and workmanship under ordinary consumer use for two years from the date of original shipment. During this warranty period, if a defect arises in the Device, and you follow the instructions for returning the Device, we will at our option, to the extent permitted by law, either (i) repair the Device using either new or refurbished parts, (ii) replace the Device with a new or refurbished Device that is equivalent to the Device to be replaced, or (iii) refund to you all or part of the purchase price of the Device. This limited warranty applies, to the extent permitted by law, to any repair, replacement part or replacement device for the remainder of the original warranty period or for ninety days, whichever period is longer. All replaced parts and Devices for which a refund is given shall become our property. This limited warranty applies only to hardware components of the Device that are not subject to accident, misuse, neglect, fire or other external causes, alterations, repair, or commercial use.

Instructions. For specific instructions about how to obtain warranty service for your Device, please contact Customer Service using the contact information found at www.blinkforhome.com. In general, you will need to deliver your Device in either its original packaging or in equally protective packaging to the address specified by Customer Service. Before you deliver your Device for warranty service, it is your responsibility to back up any data, software, or other materials you may have stored using your Device. It is possible that such data, software or other materials will be lost during service, and we will not be responsible for any such damage or loss.

Limitations. TO THE EXTENT PERMITTED BY LAW, THE WARRANTY AND REMEDIES SET FORTH ABOVE ARE EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES AND REMEDIES, AND WE SPECIFICALLY DISCLAIM ALL STATUTORY OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, NON-INFRINGEMENT AND AGAINST HIDDEN OR LATENT DEFECTS. IF WE CANNOT LAWFULLY DISCLAIM STATUTORY OR IMPLIED WARRANTIES, THEN TO THE EXTENT PERMITTED BY LAW, ALL SUCH WARRANTIES SHALL BE LIMITED IN DURATION TO THE DURATION OF THIS EXPRESS LIMITED WARRANTY AND THE REMEDY SHALL BE LIMITED TO REPAIR, REPLACEMENT OR REFUND WITH RESPECT TO THE AFFECTED DEVICE.

WARRANTIES, THEN TO THE EXTENT PERMITTED BY LAW, ALL SUCH WARRANTIES SHALL BE LIMITED IN DURATION TO THE DURATION OF THIS EXPRESS LIMITED WARRANTY AND THE REMEDY SHALL BE LIMITED TO REPAIR, REPLACEMENT OR REFUND WITH RESPECT TO THE AFFECTED DEVICE.

To obtain the benefit of the above listed warranty, please contact Customer Service at:

ring

Amazon and Ring Close Acquisition—Now Working Together to Empower Neighbors with Affordable Ways to Monitor their Homes and Reduce Crime in Neighborhoods

Starting today, the popular Ring Video Doorbell has a new everyday low price of only $99

April 12, 2018—Seattle, Wash. & Santa Monica, Calif.—(NASDAQ: AMZN)—Amazon and Ring today announced that Amazon's acquisition of Ring is complete. The two companies will work together to accelerate Ring's mission to reduce crime in neighborhoods with affordable, effective home security products and services, so more customers can see, hear, and speak to people on their property from anywhere.

"Our mission to reduce crime in neighborhoods has been at the core of everything we do at Ring," said Jamie Siminoff, CEO and Chief Inventor of Ring. "Together with Amazon, we will accelerate our mission dramatically by connecting more neighbors globally and making our security devices and systems more affordable and accessible. The entire Ring team is excited to continue working hard to create products and services that bring real benefits to people's lives and build safer communities for all our neighbors."

To kick start this commitment, Amazon and Ring have dropped the price of the popular Ring Video Doorbell to $99.99, making home security more accessible than ever to customers. Ring's Video Doorbell has been effective in reducing burglaries in neighborhoods by as much as 55 percent, according to an LAPD pilot program. Now, with Amazon's aim to deliver premium products at non-premium prices, the two companies can help make peace of mind at home a reality for more neighbors than ever before.

"Ring's talented team has invented home security products and services that customers love. We're excited about their work, their products and their mission, and look forward to teaming together to keep delighting customers," said Dave Limp, SVP of Amazon Devices and Services. "And this is just the beginning—we will continue to move quickly and work hard to empower customers with a suite of security solutions that provide an affordable, effective way to secure homes and neighborhoods."

Amazon's relationship with Ring began in 2016 through the Alexa Fund, the company's investment arm to support companies with cutting-edge technologies that are innovating with voice. The investment provided a strong foundation for Ring to be able to lean into new Alexa APIs and capabilities, and develop a new Alexa skill that allows customers to use voice to view camera feeds directly from Echo Show and Fire TV.

Neighbors experience the power and impact of the Ring Video Doorbell every day. Ring has contributed to keeping neighborhoods and neighbors safer—from helping people with disabilities more easily see who's at the door and respond, to helping prevent activities like package theft or home burglaries.

Customers can now choose from a large selection of home security products, cameras, and solutions under the Amazon umbrella, including:

- Ring Video Doorbells, Ring Spotlight Cams, Ring Floodlight Cams, and all Ring Accessories
