Identifying a Moen Posi-Temp Valve:

To confirm if you have a Moen Posi-Temp valve, observe the handle operation. Posi-Temp valves typically feature a handle that rotates only to control temperature and flow. The escutcheon plate usually has visible screws.

The single lever handle controls both water temperature and flow. Rotate the handle counter-clockwise for warmer water and clockwise for cooler water. Push the handle in to turn off the water and pull it out to turn it on.

MAINTENANCE

To maintain the finish and performance of your Moen Align shower handle, follow these guidelines:

- **Cleaning:** Clean the handle and escutcheon plate regularly with a soft, damp cloth. Avoid abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the brushed gold finish. Mild soap and water are generally sufficient.
- **Hard Water Stains:** For hard water spots, use a solution of equal parts white vinegar and water. Apply with a soft cloth, let it sit for a few minutes, then rinse thoroughly and dry.
- **Avoid Wax-Based Cleaners:** Do not use wax-based polishes or cleaners, as they can build up and dull the finish.

TROUBLESHOOTING

If you encounter issues with your Moen Align shower handle, consider the following common troubleshooting steps:

- **Inconsistent Water Temperature:** If the water temperature fluctuates, ensure your Posi-Temp valve is correctly installed and functioning. Check for any blockages in the hot or cold water lines.
- **Low Water Flow:** Low water flow can be caused by mineral buildup in the showerhead or valve. Clean the showerhead nozzles and consult your Posi-Temp valve manual for cleaning instructions.
- **Leaking:** Leaks often indicate worn-out O-rings or cartridges within the valve. These components may need to be replaced. Refer to your Posi-Temp valve manual for specific part numbers and replacement procedures.
- **Handle Stiffness:** If the handle is stiff or difficult to turn, mineral deposits might be affecting the cartridge. Cleaning or replacing the cartridge may resolve this.

For persistent issues, it is recommended to contact a qualified plumber or Moen customer support.
