OROPY 38.4" Industrial Pipe Clothing Rack User Manual

Model: 18QJ1201*1/DRLYM

1. Introduction

Thank you for choosing the OROPY 38.4" Industrial Pipe Clothing Rack. This wall-mounted garment rack is designed to provide sturdy and convenient storage for your clothing in various settings such as bedrooms, laundry rooms, closets, or retail spaces. Crafted from durable iron, its industrial design complements a range of interior styles. Please read this manual thoroughly before installation and use to ensure safe operation and optimal performance.

2. Safety Information

- **Wall Type:** This garment rack is designed for sturdy installation on solid walls. If installing on drywall, it is crucial to locate and secure the rack to wall studs for adequate support.
- **Mounting Hardware:** The included screws and plastic anchors are suitable for solid walls. For other wall types (e.g., plaster, hollow walls), consult a local hardware store for appropriate mounting hardware.

- **Weight Capacity:** Do not exceed the maximum weight recommendation of 135 pounds (60 kg) to prevent damage to the rack or wall.
- **Regular Inspection:** Periodically check all mounting screws to ensure they remain tight and secure.
- **Children and Pets:** Keep children and pets away from the installation area during assembly.

3. Package Contents

Please verify that all components are present before beginning assembly. If any parts are missing or damaged, please contact customer support.

- Industrial Pipe Sections (pre-assembled into rack shape)
- Flange Bases (pre-attached to pipe sections)

5. Setup and Installation

Follow these steps for secure installation. Ensure you have the necessary tools: a drill, a pencil, and a measuring tape.

1. **Choose Location:** Select a suitable wall location, ensuring it is clear of electrical wires or plumbing. Use a level to mark the desired height and horizontal alignment for the rack.
2. **Mark Drill Points:** Hold the rack against the wall at the desired position. Use a pencil to mark the locations for the screw holes through the flange bases.
3. **Drill Pilot Holes:**
    - For *solid walls (concrete, brick)*: Use a drill bit appropriate for the wall anchors. Insert the plastic wall anchors into the drilled holes.
    - For *drywall with studs*: Drill pilot holes directly into the center of the studs. Anchors are not typically needed when drilling into studs.
    - For *drywall without studs*: It is highly recommended to find studs for secure mounting. If studs cannot be used, specialized heavy-duty drywall anchors (not included) must be purchased and used according to their instructions.
4. **Mount the Rack:** Align the flange bases with the drilled holes. Insert the mounting screws through the flange holes and into the wall anchors (or directly into studs). Tighten all screws firmly with a screwdriver until the rack is securely fastened to the wall. Do not overtighten.

6. Operating Instructions

Once securely installed, your OROPY Industrial Pipe Clothing Rack is ready for use.

- **Hanging Garments:** Use standard clothing hangers to hang your clothes on the rod.
- **Weight Distribution:** Distribute the weight of your garments evenly across the rack to maintain balance and prevent undue stress on any single point.
- **Capacity:** The rack can hold up to 135 pounds (60 kg), which typically accommodates approximately 50 T-shirts or 20 winter jackets. Avoid overloading the rack.
- **Multi-purpose Use:** This rack is suitable for various items beyond clothing, such as scarves, hats, or even as a drying rack in a laundry room.

7. Maintenance

To keep your clothing rack in optimal condition, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the rack with a soft, damp cloth to remove dust and dirt. Avoid using abrasive cleaners or harsh chemicals, as these can damage the finish.
- **Screw Tightness:** Periodically check all mounting screws and tighten them if they have become loose. This ensures the

rack remains securely attached to the wall.

- **Avoid Impact:** Do not strike the rack with hard objects, as this may cause dents or damage to the finish.

8. Troubleshooting

Problem	Possible Cause	Solution
Rack feels loose or wobbly	Mounting screws are loose; rack not secured to studs (if drywall); incorrect anchors used.	Tighten all mounting screws. If on drywall, ensure it is mounted into studs. If not, consider relocating or using appropriate heavy-duty drywall anchors.
Rack appears to be bending	Overloaded beyond weight capacity.	Remove excess weight immediately. Ensure total weight does not exceed 135 pounds (60 kg).
Scratches on the finish	Abrasion from hangers or other objects.	Minor scratches can be touched up with matte black paint suitable for metal. Use care when hanging/removing items.
