Beurer 1568

Beurer Power Supply User Manual

For Blood Pressure Monitors BM23, BM28, BM40, BM44, BM45, BM49, BM55, BM58, BM60, BM65, BM75

1. Introduction

This manual provides essential information for the proper use and maintenance of your Beurer Power Supply. This power supply is designed to provide continuous power to compatible Beurer blood pressure monitors, offering an alternative to battery operation. Please read this manual thoroughly before first use to ensure safe and efficient operation.

2. Product Overview

The Beurer Power Supply is a compact and reliable adapter designed for specific Beurer blood pressure monitor models. It consists of a main adapter unit and an integrated power cable with a compatible connector.

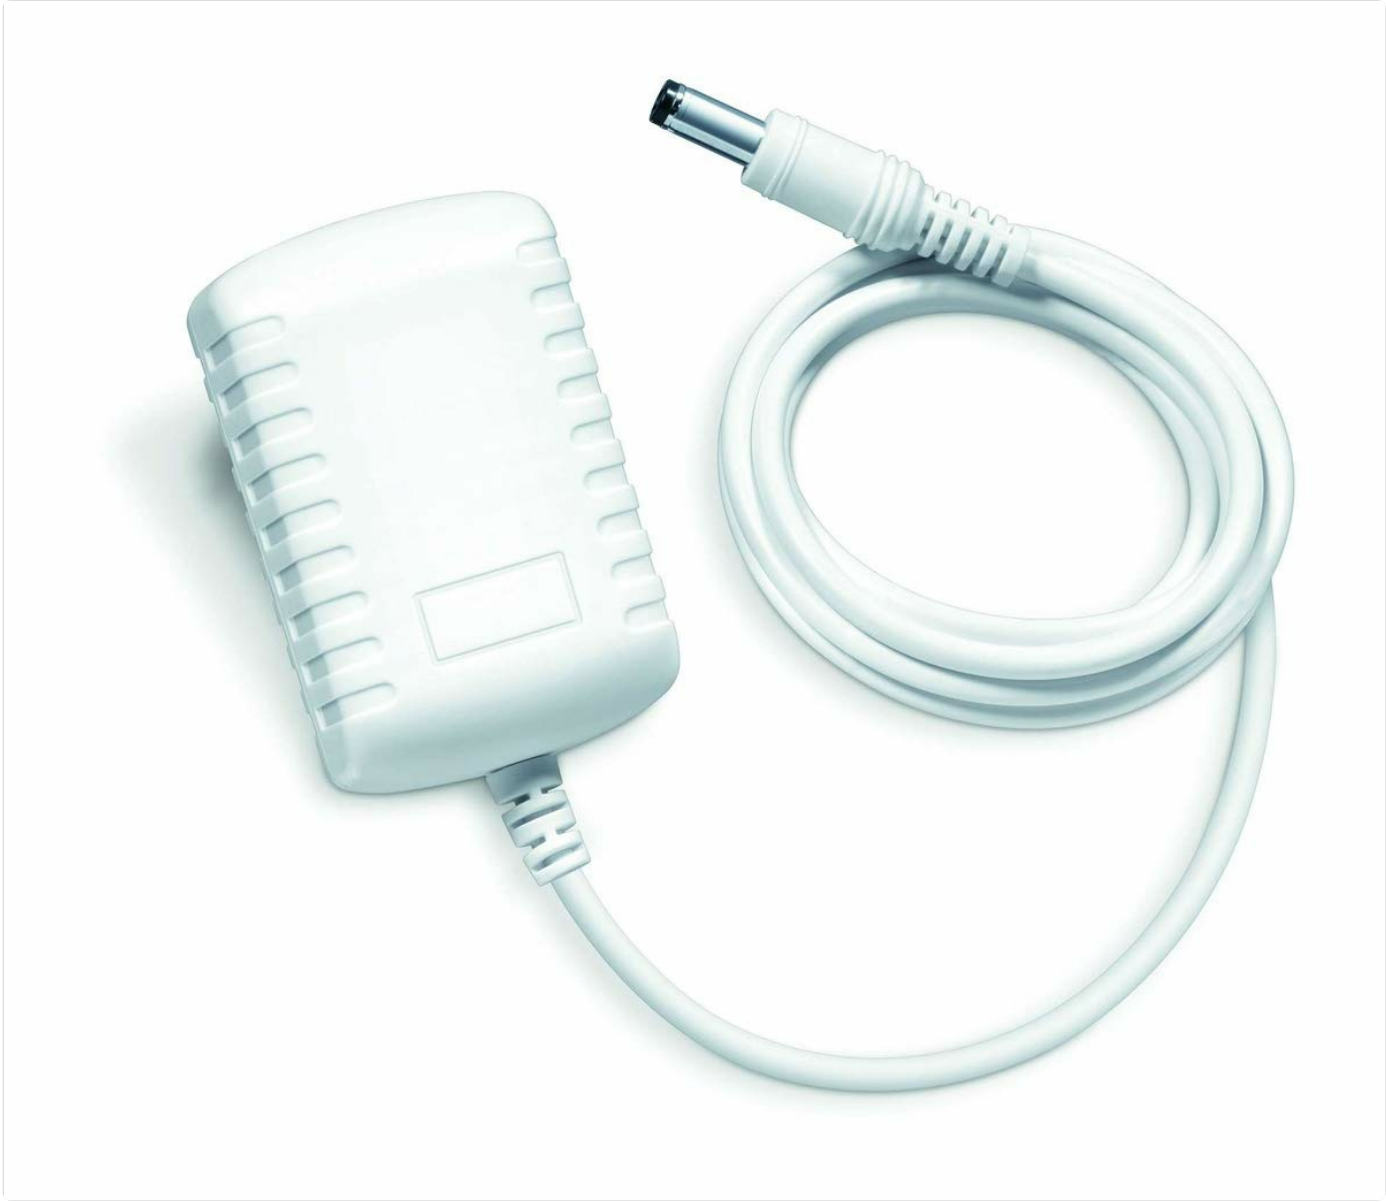

Figure 1: Beurer Power Supply Unit. This image shows the white Beurer power supply unit. It features a rectangular adapter block connected to a white cable, which terminates in a cylindrical DC power connector. The cable is coiled neatly beside the adapter.

3. Setup

Follow these steps to set up your Beurer Power Supply:

1. **Identify the Power Port:** Locate the DC power input port on your Beurer blood pressure monitor. This port is typically a small, round socket.
2. **Connect the Power Supply:** Insert the cylindrical connector of the Beurer Power Supply cable firmly into the power input port of your blood pressure monitor. Ensure a secure connection.
3. **Plug into Outlet:** Plug the main adapter unit of the power supply into a standard electrical wall outlet. Ensure the outlet provides the correct voltage as specified in the product's technical data.
4. **Verify Power:** Once connected, your blood pressure monitor should receive power. If it has an indicator light, it may illuminate. You can now operate your device without batteries.

4. Operating Instructions

The Beurer Power Supply is designed for simple plug-and-play operation. Once correctly connected to your blood

pressure monitor and a power outlet, it will provide the necessary power for the device to function.

- The power supply replaces the need for batteries, providing a continuous and stable power source.
- Always ensure the power supply is securely connected before operating your blood pressure monitor.
- Disconnect the power supply from the wall outlet when not in use for extended periods.

5. Maintenance

Proper maintenance ensures the longevity and reliable performance of your power supply:

- **Cleaning:** Clean the power supply unit and cable with a soft, dry cloth. Do not use abrasive cleaners or immerse the unit in water.
- **Storage:** Store the power supply in a cool, dry place away from direct sunlight and extreme temperatures. Avoid kinking or bending the cable excessively.
- **Inspection:** Periodically inspect the cable and connector for any signs of damage, such as fraying or exposed wires. If damage is observed, discontinue use immediately and replace the unit.

6. Troubleshooting

If you encounter issues with your Beurer Power Supply, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Blood pressure monitor does not power on when connected to the power supply.	• Power supply not properly connected. • Wall outlet is not active. • Power supply or monitor is faulty.	• Ensure the power supply connector is fully inserted into the monitor's port. • Check if the wall outlet is working by plugging in another device. • Try the power supply with another compatible monitor (if available) or contact customer support.
Power supply feels unusually hot.	• Overload or internal fault. • Poor ventilation.	• Immediately disconnect from the power outlet and monitor. Do not use if it remains hot or shows signs of damage. • Ensure the power supply is not covered or in an enclosed space.

If the problem persists after attempting these solutions, please contact Beurer customer support.

7. Specifications

Feature	Detail
Manufacturer	Beurer

Feature	Detail
Part Number	071.95
Item Weight	249 g
Package Dimensions	10.16 x 7.11 x 5.33 cm
Model Number	1568
Material	Stainless Steel
Batteries Included	No
Batteries Necessary	No
ASIN	B07H8FSRMM
First Available Date	October 22, 2018

8. Warranty and Support

For information regarding warranty coverage, technical support, or service, please refer to the official Beurer website or contact Beurer customer service directly. Keep your purchase receipt as proof of purchase for any warranty claims.
