SRE Granita Frozen Beverage Mix

SRE Granita Frozen Beverage Mix (Cappuccino) Instruction Manual

INTRODUCTION

Welcome to the SRE Granita Frozen Beverage Mix (Cappuccino) instruction manual. This guide provides essential information for preparing and enjoying your frozen cappuccino beverage. Please read these instructions carefully before use to ensure optimal results and product enjoyment.

PRODUCT OVERVIEW

The SRE Granita Frozen Beverage Mix is designed for creating delicious frozen cappuccino drinks. This product comes in a concentrated liquid form, intended to be mixed with water before freezing in a granita or frozen beverage machine.

SETUP AND PREPARATION

Mixing Instructions

To prepare the SRE Granita Frozen Beverage Mix, follow these steps:

- **Standard Mix Ratio:** Combine **4 parts water** with **1 part SRE Granita Frozen Beverage Mix**. For example, if using a 1/2 gallon bottle of mix, combine it with 2 gallons of water.
- **Margarita Mix Ratio (for other flavors):** For margarita-style frozen beverages, a ratio of **7 parts water** to **1 part mix** is recommended. This specific Cappuccino mix is not typically used for margaritas, but this information is provided for general reference of SRE mixes.

Ensure thorough mixing to achieve a consistent solution before adding to your frozen beverage machine.

OPERATING YOUR FROZEN BEVERAGE MACHINE

After preparing the mix according to the instructions above, pour the solution into the reservoir of your frozen beverage machine. Refer to your specific machine's manual for detailed operating procedures, including freezing time and temperature settings. The SRE Granita Frozen Beverage Mix is formulated to achieve optimal consistency in standard frozen beverage machines.

STORAGE AND MAINTENANCE

Product Storage

Store the unopened SRE Granita Frozen Beverage Mix in a cool, dry place away from direct sunlight. Once opened, refrigerate any unused portion and consume within the recommended period as indicated on the product packaging.

Machine Maintenance

Regularly clean your frozen beverage machine according to the manufacturer's instructions to ensure optimal performance and hygiene. This includes daily cleaning of parts that come into contact with the beverage.

TROUBLESHOOTING

Common Issues and Solutions

- **Mix too thin/watery:** Ensure the correct mix ratio (4 parts water to 1 part mix) was used. Check your machine's temperature settings; it might not be cold enough.
- **Mix too thick/icy:** Verify the correct mix ratio. The machine might be set too cold, or the sugar content of the mix is causing excessive freezing.
- **Uneven freezing:** Ensure the mix was thoroughly stirred before adding to the machine. Check the machine's agitator for proper function.

PRODUCT SPECIFICATIONS

Attribute	Detail
Brand	SRE

Attribute	Detail
Flavor	Cappuccino
Item Form	Liquid Concentrate
Unit Count	20 Cases (120 x 1/2 Gallon Bottles)
Total Yield	Approximately 420 gallons of finished product
UPC	720830127806
ASIN	B07H9JCZVL
Manufacturer	SRE Corp
