### 3. PRODUCT FEATURES AND DESIGN

#### 3.1. Premium Quality Racket Construction

Each Glymnis ping pong paddle is constructed with 7 layers of high-quality poplar wood, providing a solid foundation. A 1.5 mm high-elasticity soft sponge layer is integrated, topped with durable inverted rubber. Advanced side bands are included to protect the paddle edges from wear. This design aims to enhance ball speed, control, and rotation during play.

#### 3.2. Inverted Rubber Surface

The inverted 1.5 mm rubber surface is engineered for excellent control and rotation performance. This surface contributes to strong spin and stability when striking the ball, allowing for varied shot types.

### 3.3. Ergonomic Handle Design

The handle features a flared design, which is narrower at the top and gradually widens towards the bottom. This ergonomic shape provides a secure and comfortable grip, reducing hand fatigue during extended play sessions.

## 4. SETUP AND FIRST USE

### 4.1. Removing Protective Film

Before first use, a thin protective film must be removed from the rubber surface of each paddle. If the film is difficult to remove, especially in cold environments, gently warm the paddle surface with a hairdryer for a few minutes. This will soften the adhesive, allowing for easier removal.

## 4.2. Initial Stickiness

It is normal for the rubber surface to feel slightly sticky during initial use. This characteristic will typically diminish after several uses without affecting performance.

## 5. USAGE GUIDELINES

---

The Glymnis Ping Pong Paddles Set is suitable for 2-4 players and can be used for both indoor and outdoor table tennis games. The paddles are designed to provide a balanced experience for beginners, intermediate players, and recreational users.

## **6. CARE AND MAINTENANCE**

---

### **6.1. Cleaning**

To maintain optimal performance, regularly clean the rubber surfaces of the paddles. Use a soft, damp cloth to gently wipe away dust and dirt. Avoid using harsh chemicals or abrasive materials, as these can damage the rubber.

### **6.2. Storage**

Store the paddles and balls in the provided storage bags when not in use. This protects them from dust, scratches, and environmental factors that could affect their lifespan. Keep the set in a cool, dry place away from direct sunlight and extreme temperatures.

## 7. TROUBLESHOOTING

If you encounter any issues with your Glymnis Ping Pong Paddles Set, consider the following:

- **Rubber Peeling:** If the rubber begins to separate from the paddle, a suitable rubber adhesive designed for table tennis rackets may be used for repair. Ensure the surface is clean and dry before applying adhesive.
- **Reduced Performance:** Ensure the rubber surfaces are clean and free from debris. Excessive dirt can reduce grip and spin.
- **Ball Irregularities:** Check balls for cracks or deformities. Damaged balls can affect play consistency and should be replaced.
