Wellneo B07HC3WMHS

Wellneo Epilator Instruction Manual

Model: B07HC3WMHS

1. INTRODUCTION

Thank you for choosing the Wellneo Epilator. This device is designed for efficient hair removal, providing smooth skin. Please read this instruction manual carefully before first use to ensure safe operation, optimal performance, and proper maintenance of your epilator. Keep this manual for future reference.

2. SAFETY INFORMATION

WARNING: This device is NOT water resistant. Do not use it in the shower or bath, and do not rinse it under running water.

- Ensure the power cord is not damaged before connecting to a power source.
- Only use the power cord supplied with the device.
- Keep the device away from water and other liquids.
- Do not use the epilator on irritated, inflamed, infected, or broken skin. Consult a doctor if you have any skin conditions.
- Avoid using on sensitive areas such as eyelids, eyebrows, or inside the nose/ears.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- Unplug the device from the power outlet when not in use and before cleaning.

3. PACKAGE CONTENTS

Please check the box for the following items:

- Wellneo Epilator Unit
- Power Cord
- Instruction Manual (this document)

4. SETUP

4.1 Powering the Device

The Wellneo Epilator operates using a power cord.

1. Locate the power input port on the epilator unit.
2. Insert the small end of the provided power cord into the epilator's power input port.
3. Plug the larger end of the power cord into a standard electrical outlet.
4. The device is now ready for use.

Image: The Wellneo Epilator unit, showing its design and where the power cord connects.

5. OPERATING INSTRUCTIONS

5.1 General Use

1. Ensure your skin is clean and dry before epilation.
2. Turn on the epilator using the power switch.
3. Hold the epilator at a 90-degree angle to your skin.
4. Gently glide the epilator against the direction of hair growth.
5. Move the epilator slowly and steadily over the skin. Do not press too hard.
6. After epilation, you may apply a soothing lotion or cream to your skin.

5.2 Usage on Different Body Areas

The Wellneo Epilator can be used on various parts of the body. Always ensure the skin is taut to minimize

discomfort.

Image: Examples of using the Wellneo Epilator on facial areas, underarms, and arms.

- **Face:** For upper lip, chin, and cheek areas, stretch the skin with one hand and gently glide the epilator. Avoid the eye area.

Image: Detailed views of the epilator being used for facial hair removal.

- **Legs:** Start from the ankle and move upwards against the direction of hair growth.
- **Underarms:** Lift your arm and stretch the skin. Glide the epilator in different directions as hair growth can vary.
- **Bikini Line:** Stretch the skin firmly. Use short, quick strokes.
- **Stomach/Other Body Areas:** Ensure skin is taut. Use gentle, consistent movements.

6. MAINTENANCE

6.1 Cleaning the Epilator Head

Regular cleaning ensures optimal performance and hygiene.

1. Ensure the epilator is turned off and unplugged from the power source.
2. Use the small cleaning brush (not included, but typically supplied with similar devices) to brush away any trapped hairs from the epilator head.
3. Do NOT rinse the epilator head or the device under water as it is not water resistant.
4. For thorough cleaning, you may gently wipe the epilator head with a dry cloth.

6.2 Storage

Store the epilator in a cool, dry place, away from direct sunlight and moisture. Keep it out of reach of children.

7. TROUBLESHOOTING

If you encounter any issues with your Wellneo Epilator, please refer to the table below for common problems and solutions.

Problem	Possible Cause / Solution
---------	---------------------------

Problem	Possible Cause / Solution
Epilator does not turn on.	<ul style="list-style-type: none"> • Ensure the power cord is securely plugged into both the epilator and the electrical outlet. • Check if the electrical outlet is functioning correctly by plugging in another device. • Verify the power switch on the epilator is in the 'ON' position.
Hair is not being removed effectively.	<ul style="list-style-type: none"> • Ensure the epilator head is clean and free of trapped hairs. • Hold the epilator at a 90-degree angle to the skin. • Glide the epilator slowly against the direction of hair growth. • Ensure skin is taut during epilation.
Device stops working intermittently.	<ul style="list-style-type: none"> • Check for loose power cord connections. • The device may be overheating. Turn it off and let it cool down for a few minutes before resuming use.
Skin irritation after use.	<ul style="list-style-type: none"> • Ensure skin is clean and dry before epilation. • Do not press too hard on the skin. • Apply a soothing lotion or aloe vera gel after epilation. • If irritation persists, discontinue use and consult a dermatologist.
