# **Nanit Plus Smart Baby Monitor and Wall Mount Instruction Manual**

Model: N211US

## **1. INTRODUCTION**

The Nanit Plus Smart Baby Monitor and Wall Mount provides a comprehensive solution for monitoring your baby. This system offers a crystal-clear overhead view of the crib, enabling HD video and audio monitoring, sleep tracking, and breathing motion detection. It integrates advanced sensors for temperature and humidity, ensuring a comfortable environment for your baby. This manual provides detailed instructions for setting up, operating, and maintaining your Nanit Plus monitor.

## 2. PACKAGE CONTENTS

Verify that all components are present in your Nanit Plus package:

- Nanit Plus Camera Unit
- Wall Mount (includes cable management)
- Power Adapter
- Mounting Hardware (screws, anchors)
- Quick Start Guide

*Note: Breathing Wear for breathing motion monitoring is sold separately.*

Also Sold Separately:

◆◆ BREATHING WEAR™

Sensor-Free Breathing  
Motion Monitoring

The Nanit Plus camera reads the  
custom-designed pattern to detect  
your baby's breathing motion.

### 3. SETUP AND INSTALLATION

#### 3.1. App Download and Account Creation

1. Download the Nanit app from the Apple App Store or Google Play Store.
2. Open the app and follow the on-screen instructions to create a new account or log in to an existing one.
3. Add your Nanit Plus camera to your account by following the in-app pairing process. Ensure your device is connected to a 2.4 GHz Wi-Fi network during setup.

#### 3.2. Wall Mount Installation

The wall mount positions the Nanit Plus camera securely above your baby's crib, providing an optimal bird's-eye view. Proper installation is crucial for accurate monitoring and safety.

1. Choose a wall location directly above the center of the crib. Ensure there are no obstructions to the camera's view.

2. Use the provided mounting template to mark the drill holes on the wall.
3. Drill pilot holes and insert the wall anchors if necessary.
4. Secure the wall mount base to the wall using the provided screws.
5. Attach the camera arm to the base.
6. Route the power cable through the integrated cable management system to ensure it is out of reach of your baby.
7. Connect the power adapter to the camera and plug it into a power outlet.

*Image 3: Wall mount installation demonstrating bird's-eye view and safe cable management.*

### **3.3. Free Stand Installation (Optional)**

If using the optional free stand, assemble the tripod base and attach the camera arm. Position the stand next to the crib, ensuring stability and a clear view of the baby.

## **4. OPERATING THE NANIT PLUS MONITOR**

The Nanit app serves as your primary interface for controlling and monitoring your Nanit Plus camera.

## 4.1. Live View and Basic Controls

Access the live feed of your baby's crib through the Nanit app. The live view provides:

- **HD Video & Night Vision:** Clear video feed day and night.
- **Zoom:** Pinch to zoom in on your baby.
- **Two-Way Audio:** Use the microphone icon to speak to your baby and the speaker icon to hear them.
- **Background Audio:** Listen to your baby even when the app is in the background.
- **Built-in Night Light:** Control the camera's integrated night light.

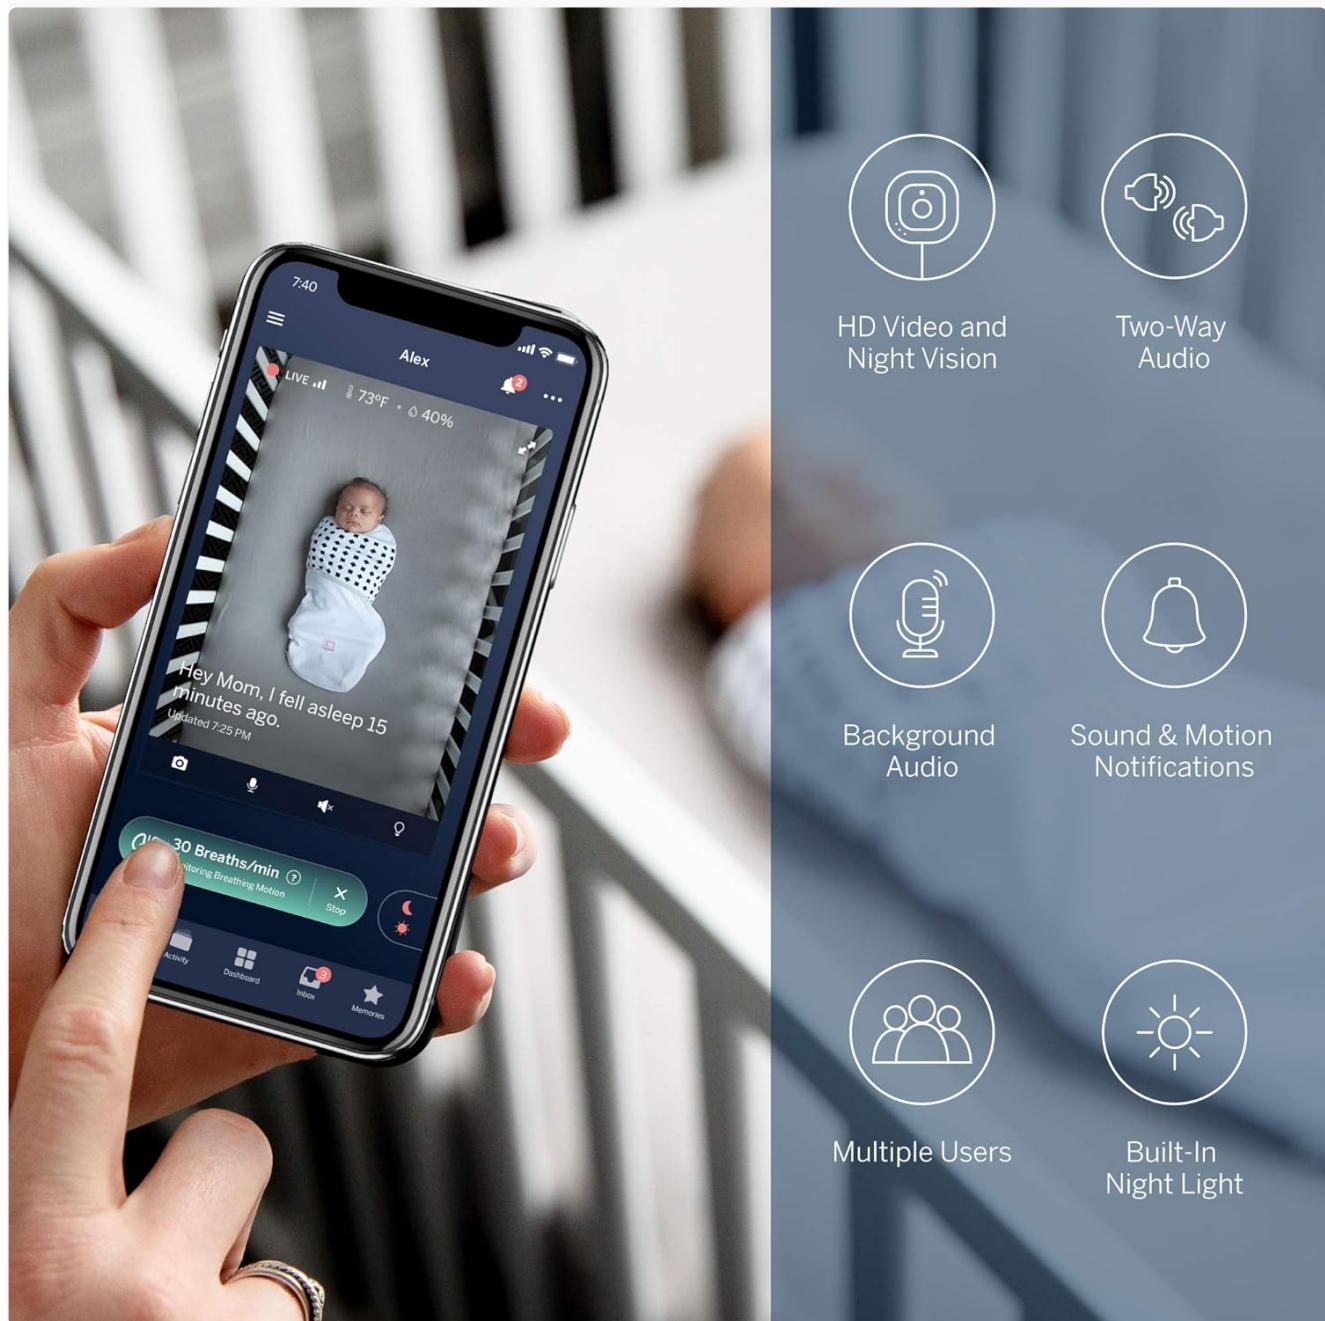

Image 4: Nanit app live view with various control options and feature indicators.

## 4.2. Sleep Tracking and Analysis

The Nanit Plus camera tracks your baby's sleep patterns and provides personalized insights and guidance directly through the app.

- View daily and weekly sleep summaries, including sleep duration, wake-ups, and sleep efficiency.
- Receive personalized tips and recommendations to improve your baby's sleep.

## Sleep Guidance Made Easy.

Automatically see your baby's sleep stats, updated every day and night. Plus, personalized sleep guidance at your fingertips.

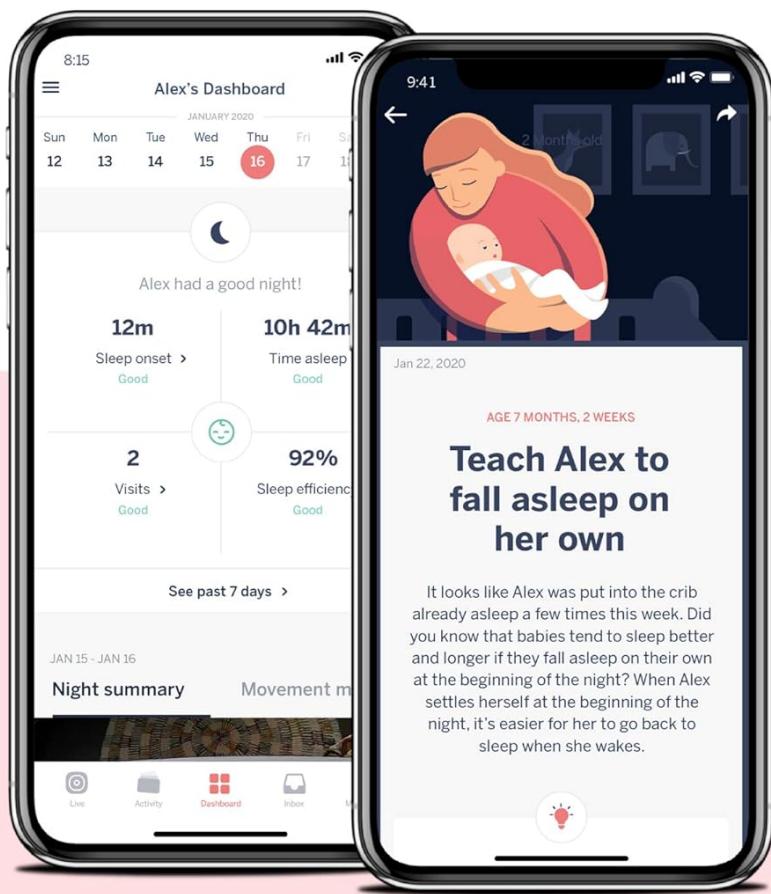

Image 5: Nanit app displaying sleep guidance and daily sleep statistics.

### 4.3. Breathing Motion Monitoring

When used with Nanit Breathing Wear (sold separately), the camera can monitor your baby's breathing motion without any electronic sensors touching them.

1. Dress your baby in the Nanit Breathing Wear. The unique pattern on the fabric allows the camera to detect subtle movements.
2. Activate breathing motion monitoring in the Nanit app.
3. The app will display real-time breathing rate and alert you if no breathing motion is detected for a specified period.

*Image 6: Baby in crib wearing Nanit Breathing Wear for motion monitoring.*

#### 4.4. Smart Notifications and Sensors

The Nanit Plus provides intelligent alerts to keep you informed about your baby's environment.

- **Sound & Motion Notifications:** Receive alerts for significant sound or movement in the crib.
- **Temperature & Humidity Sensors:** Monitor the nursery's temperature and humidity levels directly from the app. Set custom thresholds for alerts.

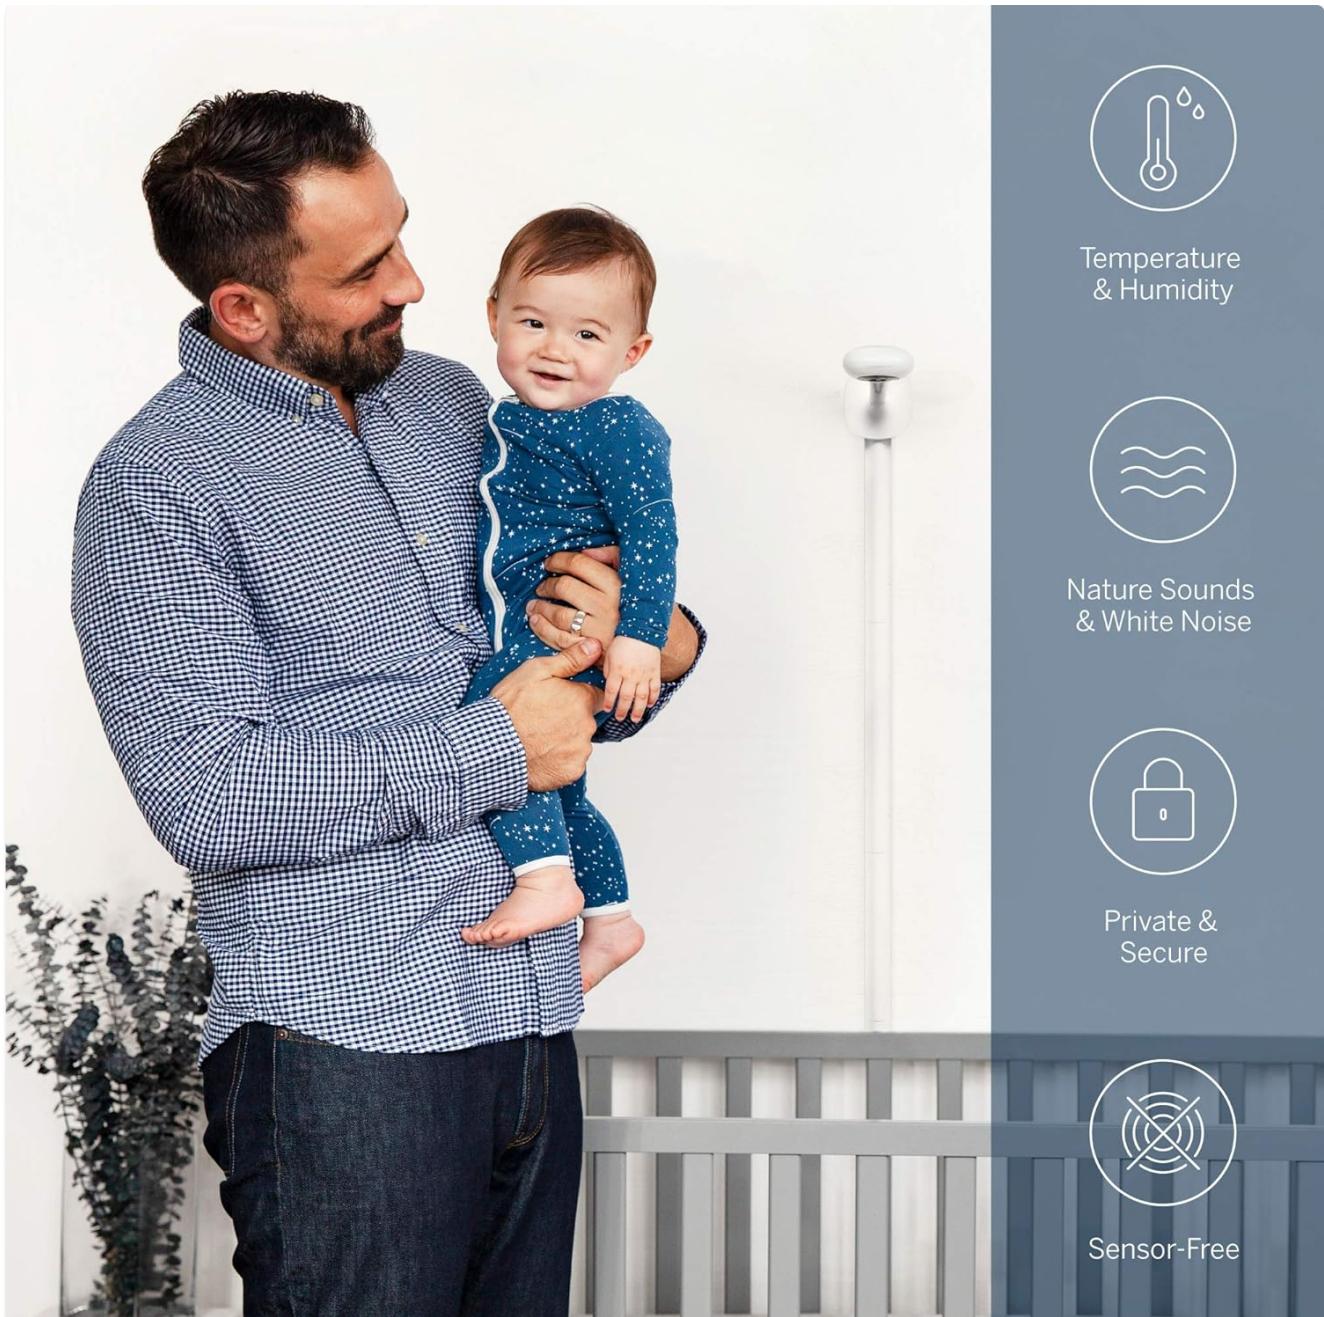

Image 7: Overview of Nanit Plus features including environmental sensors and security.

#### 4.5. Memories and Multiple Users

- **Memories:** The app automatically captures and organizes key moments and milestones, creating a digital baby book.
- **Multiple Users:** Share access to your Nanit camera with family members or caregivers through the app's 'Parenting Team' feature.

Image 8: Nanit app 'Memories' feature, capturing and organizing baby milestones.

#### 4.6. Product Overview Video

Your browser does not support the video tag.

### 5. MAINTENANCE

To ensure optimal performance and longevity of your Nanit Plus monitor, follow these maintenance guidelines:

- **Cleaning:** Gently wipe the camera lens and exterior with a soft, dry, lint-free cloth. Do not use abrasive cleaners or solvents.
- **Software Updates:** Keep your Nanit app and camera firmware updated to the latest versions. The app will notify you when updates are available.
- **Cable Inspection:** Periodically check the power cable and wall mount for any signs of wear or damage. Ensure cables remain securely managed and out of reach.

## 6. TROUBLESHOOTING

If you encounter issues with your Nanit Plus monitor, refer to the following common troubleshooting steps:

- **No Live Video/Connectivity Issues:**

- Ensure your Wi-Fi network is active and the camera is within range.
- Restart your Wi-Fi router and the Nanit camera by unplugging it for 30 seconds and plugging it back in.
- Verify that the Nanit app is updated to the latest version.

- **Breathing Motion Not Detected:**

- Ensure your baby is wearing the Nanit Breathing Wear correctly and the pattern is visible to the camera.
- Check the app for a 'Restart monitoring session' prompt. You may need to adjust the baby's position or the camera's view to center the Breathing Wear pattern within the designated circle in the app.
- Confirm that the camera's view is unobstructed.

- **Poor Audio Quality:**

- Check the volume settings on your mobile device and within the Nanit app.
- Ensure there are no external sources of interference near the camera or your mobile device.

- **Temperature/Humidity Readings Incorrect:**

- Ensure the camera is not placed directly in sunlight or near a heat/AC vent, which can affect sensor accuracy.

For further assistance, consult the Nanit app's help section or contact Nanit customer support.

## 7. SPECIFICATIONS

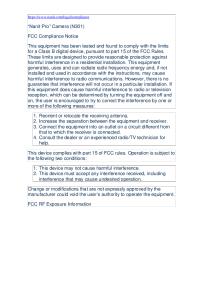

Feature	Detail
Brand	Nanit
Model Number	N211US
Material	Plastic
Color	White
