Bergmann Stunner

Bergmann Stunner Car Vacuum Cleaner User Manual

Model: Stunner (BAV-150B)

1. Product Overview

The Bergmann Stunner Car Vacuum Cleaner is designed for efficient cleaning of vehicle interiors. It features a powerful motor and a durable stainless steel HEPA filter for effective dust and debris collection.

Key Features:

- **Powerful Suction:** Equipped with a 150W 100% copper motor for strong suction.
- **Stainless Steel HEPA Filter:** A permanent, washable filter that requires no replacement.
- **Durable Body:** Constructed from virgin, piano-grade ABS material for enhanced durability.
- **Long Power Cord:** A 5-meter power cord allows reach to all areas of the car, including the boot.

2. Included Components

Verify that all the following components are present in your package:

- 1 Car Vacuum Cleaner (Main Unit)
- 1 Nozzle Attachment
- 1 Brush Attachment
- 1 Flexible Hose Pipe
- 1 Extra Fuse
- 1 Warranty Card & User Manual
- 1 Storage Bag

3. Setup

Follow these steps to prepare your vacuum cleaner for use:

1. **Connect to Power:** Insert the 12V power plug into your car's cigarette lighter socket. Ensure the connection is secure.
2. **Attach Accessories:** Select the appropriate attachment (nozzle, brush, or flexible hose) for the cleaning task. Attach it firmly to the vacuum cleaner's suction inlet.
3. **Engine On (Recommended):** For optimal suction power and to prevent draining your car battery, it is recommended to keep your car engine running during operation.

4. Operating Instructions

To operate the Bergmann Stunner Car Vacuum Cleaner:

1. **Power On:** Press the power button located on the unit to turn on the vacuum cleaner.
2. **Cleaning Technique:**
    - For stubborn dirt embedded in car mats, use the brush attachment to agitate and loosen the particles before vacuuming.
    - Utilize the 5-meter long power cord to comfortably reach all areas of your car, including under seats and the boot.
    - For best results, move the nozzle slowly over the surfaces to allow the vacuum to pick up debris effectively.
3. **Intermittent Use:** To prolong the life of the motor and prevent overheating, operate the vacuum cleaner intermittently. After approximately 10-15 minutes of continuous use, allow the unit to rest for 10-15 minutes.
4. **Power Off:** Once cleaning is complete, press the power button to turn off the vacuum cleaner and disconnect it from the car's power outlet.

Image 5: The vacuum cleaner effectively cleaning different areas of a car's interior, including seats, floor, and boot.

5. Maintenance

Regular maintenance ensures optimal performance and extends the lifespan of your vacuum cleaner.

Filter Cleaning:

1. **Remove Filter:** Twist and detach the dust collection chamber from the main unit. Carefully remove the stainless steel HEPA filter.
2. **Wash Filter:** Clean the filter regularly under running tap water. Ensure all trapped dirt and debris are removed.
3. **Dry Filter:** Allow the filter to air dry completely before reinserting it into the vacuum cleaner. Do not use the vacuum cleaner with a wet filter.
4. **Reassemble:** Once dry, place the filter back into the dust collection chamber and reattach the chamber to the main unit, ensuring a tight seal to prevent suction loss.

Note: The stainless steel HEPA filter is designed for lifelong use and does not require replacement under normal conditions.

Image 6: The durable stainless steel HEPA filter, designed for longevity and superior filtration compared to disposable paper filters.

Dustbin Emptying:

Empty the dust collection chamber after each use or when it appears full to maintain strong suction.

6. Troubleshooting

Refer to the table below for common issues and their solutions:

Problem	Possible Cause	Solution
Low Suction Power	• Clogged filter • Full dustbin • Insufficient power supply from car • Loose attachment	• Clean the HEPA filter thoroughly. • Empty the dustbin. • Ensure car engine is running for optimal power. • Check that attachments are securely fitted.
Vacuum Cleaner Not Turning On	• No power from car socket • Blown fuse	• Check car's cigarette lighter socket with another device. • Replace the fuse (an extra fuse is provided).

Problem	Possible Cause	Solution
Unit Overheating	• Prolonged continuous use • Blocked airflow	• Allow the unit to cool down. Use intermittently (10-15 mins on, 10-15 mins off). • Ensure filter and suction inlet are clear of obstructions.

7. Specifications

Feature	Detail
Brand	Bergmann
Model Name	Stunner
Model Number	BAV-150B
Wattage	150 Watts
Voltage	12 Volts
Power Source	Corded Electric
