HARBOR BREEZE 806192

HARBOR BREEZE Sauble Beach 44-in Brushed Nickel Indoor Ceiling Fan

Model: 806192

PRODUCT OVERVIEW

The HARBOR BREEZE Sauble Beach 44-inch Brushed Nickel Indoor Ceiling Fan is designed to provide both style and functionality to your living space. Featuring a sleek brushed nickel finish and reversible blades, this fan complements various interior decors while ensuring excellent air circulation. It includes an integrated light kit for added illumination and is equipped with a powerful motor for quiet, efficient operation.

This ceiling fan is suitable for indoor use and can be mounted with or without the included 4-inch downrod, accommodating flat ceilings or sloped ceilings up to 16 degrees.

KEY FEATURES

- **Indoor 44-inch Design:** Features a brushed nickel finish with three reversible blades (nutmeg and natural finishes).
- **Integrated Light Kit:** Includes a globe-style light kit with alabaster glass, providing ambient lighting.
- **Energy Efficient Lighting:** Comes with two 13-watt CFL bulbs.
- **Versatile Mounting:** Can be mounted with or without the 4-inch downrod, suitable for flat or sloped ceilings (up to 16° max slope).
- **Powerful & Quiet Motor:** Generates high airflow with 3-speeds and a reverse function for year-round versatility.
- **Convenient Control:** Includes a remote control for easy operation of both fan speeds and light.

WHAT'S IN THE BOX

Upon opening your HARBOR BREEZE Sauble Beach Ceiling Fan package, you will find the following components:

- Ceiling Fan Assembly (Motor Housing, Blades, Light Kit)

- Remote Control
- 4-inch Downrod
- Mounting Hardware
- Two 13-watt CFL Bulbs
- Instruction Manual

SETUP AND INSTALLATION

Installation of the HARBOR BREEZE Sauble Beach Ceiling Fan is designed to be straightforward. It is recommended to have basic electrical knowledge or consult a qualified electrician for installation to ensure safety and proper functionality.

Pre-Installation Checklist:

- Ensure power is turned off at the circuit breaker before beginning installation.
- Verify that all components listed in the "What's in the Box" section are present.
- Gather necessary tools, including a screwdriver, wire strippers, and a ladder.

Mounting Options:

The fan can be installed using the included 4-inch downrod for standard ceiling heights, or it can be flush-mounted for lower ceilings. For sloped ceilings, the fan is compatible with slopes up to 16 degrees when using the downrod.

General Installation Steps:

1. Secure the mounting bracket to the ceiling electrical box.
2. Assemble the fan motor and downrod (if using).
3. Hang the fan assembly onto the mounting bracket.
4. Connect the electrical wiring according to local codes and the provided wiring diagram in the manual.
5. Attach the fan blades, ensuring they are securely fastened.
6. Install the light kit and bulbs.
7. Attach the canopy to cover the wiring and mounting bracket.

Refer to the detailed diagrams and instructions in the included manual for specific wiring and assembly steps.

OPERATING INSTRUCTIONS

Your HARBOR BREEZE Sauble Beach Ceiling Fan is designed for easy operation using the included remote control.

Fan Speed Control:

The fan offers three distinct speed settings (High, Medium, Low) to adjust airflow according to your comfort needs. Use the fan speed buttons on the remote control to cycle through these settings.

Light Control:

The integrated light kit can be turned on or off using the dedicated light button on the remote control. The fan uses two 13-watt CFL bulbs, providing ample illumination.

Reverse Function (Year-Round Use):

The fan features a reversible motor, allowing for year-round use to optimize energy efficiency:

- **Summer Mode (Counter-clockwise rotation):** Pushes cool air down, creating a refreshing breeze.
- **Winter Mode (Clockwise rotation):** Draws cool air up, circulating warm air trapped near the ceiling downwards.

To change the direction of the blades, locate the reverse switch on the fan motor housing (usually near the top of the motor). Ensure the fan is off before changing the direction.

MAINTENANCE

Regular maintenance will help prolong the life and performance of your ceiling fan.

- **Cleaning:** Dust the fan blades and motor housing periodically with a soft, lint-free cloth. Do not use abrasive cleaners or solvents, as they may damage the finish.
- **Blade Tightness:** Check the blade screws annually to ensure they are tight. Loose blades can cause wobbling and noise.
- **Light Bulbs:** Replace CFL bulbs with the same type and wattage (13-watt CFL) when they burn out. Ensure power is off before replacing bulbs.
- **Motor Lubrication:** The fan motor is permanently lubricated and does not require additional oiling.

Always turn off the power to the fan at the circuit breaker before performing any cleaning or maintenance.

TROUBLESHOOTING

If you encounter issues with your ceiling fan, refer to the following common troubleshooting tips:

Problem	Possible Cause	Solution
Fan does not start	No power to the fan; Loose wire connections; Remote control battery low.	Check circuit breaker; Verify all wire connections are secure; Replace remote control battery.
Fan wobbles	Loose blade screws; Unbalanced blades; Improper mounting.	Tighten all blade screws; Use a balancing kit (not included) if necessary; Ensure mounting bracket is securely installed.
Light does not work	Bulb burned out; Loose wire connection in light kit; Incorrect bulb type.	Replace bulb; Check light kit wiring; Ensure correct 13-watt CFL bulbs are used.
Noisy operation	Loose screws; Motor hum; Blades hitting an obstruction.	Check and tighten all screws; Some motor hum is normal; Ensure nothing is obstructing blade rotation.

If problems persist, contact customer support or a qualified electrician.

SPECIFICATIONS

Attribute	Detail
