

Farpoint B07HGDSYYB

Farpoint Super Bright 4000 Lumen Tactical Flashlight User Manual

Model: B07HGDSYYB

1. INTRODUCTION

This manual provides essential information for the safe and effective use of your Farpoint Super Bright 4000 Lumen Tactical Flashlight. Please read these instructions carefully before operating the device and retain them for future reference.

2. SAFETY INFORMATION

WARNING: Failure to follow these safety instructions may result in fire, electric shock, injury, or damage to the product or property.

- **Battery Installation:** Always ensure correct battery polarity (+/-) when installing batteries. Incorrect installation can cause damage to the flashlight and pose a fire hazard.
- **Battery Type:** Use only 12 AA Alkaline batteries as specified. Do not mix old and new batteries, or different types of batteries.
- **Overheating Risk:** If the flashlight becomes excessively hot during operation or battery replacement, immediately remove the batteries and discontinue use. Contact the manufacturer if this issue persists.
- **Eye Safety:** Do not shine the flashlight directly into eyes. The high lumen output can cause temporary vision impairment or permanent eye damage.
- **Children:** Keep the flashlight and batteries out of reach of children.
- **Disassembly:** Do not attempt to disassemble or modify the flashlight. This will void the warranty and may cause damage or injury.

3. PACKAGE CONTENTS

Verify that all items are present in your package:

- Farpoint Super Bright 4000 Lumen Tactical Flashlight
- 12 AA Alkaline Batteries (pre-installed with a protective tab)

4. PRODUCT OVERVIEW

The Farpoint Super Bright 4000 Lumen Tactical Flashlight is designed for high performance and durability. It features a robust aluminum body, multiple light modes, and an adjustable focus beam.

Image 2: The Farpoint Super Bright 4000 Lumen Tactical Flashlight, showcasing its robust design.

Key Features:

- 4000 Lumens Verified Brightness
- Three Beam Modes: Max, Low, and Strobe
- Slide Focus Functionality
- Weatherproof and Impact Resistant Design
- Durable Aluminum Body with Military-Grade Anodized Finish
- Long-lasting LED with up to 25,000 hours of life

5. SETUP

Battery Installation:

Your flashlight comes with 12 AA Alkaline batteries pre-installed. Before first use, a protective plastic tab must be removed to activate the batteries.

1. Unscrew the tail cap of the flashlight by turning it counter-clockwise.
2. Carefully remove the battery cartridge from the flashlight body.
3. Locate the small plastic tab positioned between the battery contacts, typically at the top of the battery cartridge. Gently pull and remove this tab.
4. Ensure all 12 AA batteries are correctly oriented within the cartridge according to the polarity markings (+/-).
5. Insert the battery cartridge back into the flashlight body, ensuring it slides in smoothly.
6. Screw the tail cap back on by turning it clockwise until securely tightened. Do not overtighten.

6. OPERATING INSTRUCTIONS

Power On/Off and Mode Selection:

The flashlight is operated using the power button located on the tail cap.

- **To Turn On:** Press the power button once. The flashlight will activate in Max Power mode.
- **To Cycle Modes:** With the flashlight on, lightly press the power button repeatedly to cycle through the available modes: Max Power → Low Power → Strobe.
- **To Turn Off:** Press the power button fully until it clicks.

Slide Focus:

The flashlight features a slide focus mechanism to adjust the beam from a wide floodlight to a narrow spotlight.

- Grasp the head of the flashlight firmly.
- Slide the head forward or backward along the body to adjust the beam focus.

7. MAINTENANCE

- **Cleaning:** Wipe the flashlight body with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Battery Replacement:** When the light output diminishes, replace all 12 AA Alkaline batteries simultaneously. Refer to the "Battery Installation" section for proper procedure.
- **Storage:** If the flashlight will not be used for an extended period, remove the batteries to prevent leakage and corrosion. Store in a cool, dry place.
- **O-Rings:** Periodically inspect the O-rings for wear and tear. Lubricate with silicone grease if necessary to maintain weatherproof sealing.

8. TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Flashlight does not turn on.	• Protective plastic tab not removed. • Batteries are dead or low. • Batteries installed incorrectly. • Loose tail cap.	• Remove the plastic tab (see Setup). • Replace all 12 AA batteries. • Reinstall batteries with correct polarity. • Tighten the tail cap securely.
Light is dim or flickers.	• Low battery power. • Loose connections.	• Replace all 12 AA batteries. • Ensure tail cap is tight and battery cartridge is fully inserted.
Flashlight becomes excessively hot.	• Incorrect battery type or mix. • Internal short circuit.	• Immediately remove batteries. Ensure only 12 AA Alkaline batteries are used and correctly installed. • If issue persists, discontinue use and contact customer support.
Beam focus does not adjust.	Mechanism is stuck or damaged.	Ensure no debris is obstructing the slide mechanism. Do not force.
